Vice-Chairman.

Explanatory sheet to accompany the annual accounts.

Process fees.—Rupees thirty-six shown under this head were due for the period prior to the introduction of the system of realising talabana fees by court-fees stamps.

Grant from Government.—The sum of Rs. 2,600 paid by Government on account of contribution towards the joint road and public works cess establishment was for the cess year 1883-84 and 1884-85, and has been shown under this head as per Accountant-General's No. 0172LF, dated 9th September 1885.

Refund of cess.—Out of Rs. 506-0-1 refunded, Rs. 434-6-6 is on account of mehal Aronda, pergunnah Goa, towji No. 2232, belonging to Baboo Treguna Nund Upadhya, sanctioned in Commissioner's No. 169R, dated 23rd September 1884; Rs. 50-7-6 on account of mehal Dehribadar Zamin, pergunnah Goa, towji No. 2416, belonging to Baboo Bal Bhadar Sahoy, sanctioned in Commissioner's No. 169R, dated 23rd September 1884; and Rs. 21-2-1 on account of mehal Sahebpore, pergunnah Kasmar, towji No. 3176, sanctioned in Commissioner's No. 9R, dated 16th April 1884.

Original and repair works—The figures in antique with *plus* signs indicate the extra sums sanctioned by the Committee after the preparation of the budget estimates, and those with *minus* signs represent the sums transferred to other works. The statement of re-appropriation shows in detail the transfers made from one work to another.

Original works.—The following original works, though sanctioned, were not executed during the year under review:—

		Rs.
(*a*)	Constructing two 3′ barrel drains on the Domaigurh-Sohagpore road	306
(*b*)	Metalling Rajaputty bridge on the Pursa-Sahpore road ...	112
(*c*)	Metalling Bhugwan Bazar road	751
(*d*)	Nicking out boundaries of unraised roads	137

Sewan sub-division.

(*e*)	Metalling 40th mile, Chupra-Sewan road	274
(*f*)	Improving approaches to the Jhorai, 13th mile, Sewan-Goothny road	48
(*g*)	Constructing a 5′ culvert, Chupra-Goothny road ...	2,871
(*h*)	Improving 18th and 19th miles, Sewan-Durrowlee road ...	200
(*i*)	Constructing Gopalgunj Serai, Moharajgunj-Kochaikote road	2,000
(*j*)	Constructing bridges, Gopalgunj-Buturda road ...	2,211

(*a*). This work was not undertaken for want of bricks, as the estimate was sanctioned late in the year.

(*b*). Work not undertaken as kunkur metal was not procurable near at hand.

(*c*). This work was done by the Railway Department, but no payment was made during the year.

(*d*). The late District Engineer did not think these necessary.

(*e*). Work completed, but no payment was made on that account.

(*f*). The expenditure incurred on account of this work has been charged to road repairs.

(*g*). Work completed, but no payment was made during the year.

(*h*). Work not undertaken pending preparation of the estimate.

(*i*). The work was not undertaken pending sanction of the estimate.

(*j*). Work not undertaken pending preparation of the project.

Repairs.—The following repair works were not undertaken as they were not urgent and could conveniently be deferred till the next year.

Repairing bridges on roads Nos. 13, 15, 16, 41, 35, 43 and 51 in the Chupra sub-division.

The repairing of the bridges on roads Nos. 36, 45, 48, 56 and 59 were not undertaken as no contractors came forward to do the works. If they were done departmentally, the estimates would have been far exceeded.

The repairs to the bridges on roads Nos. 4, 6, 18, 23 and 46 in the Sewan sub-division were not wanted; hence not undertaken.

The repairs to the bridges on roads Nos. 37 and 56 were executed, but no payment was made during the year.

R. H. N. SING,
Vice-Chairman.

No. 175, dated Motihari, the 26th January 1886.

From—C. F. WORSLEY, ESQ., Collector and Chairman, Chumparun,
To—The Commissioner of the Patna Division.

WITH reference to the circular, No. 973A of the 14th September 1880, forwarded with your No. 283J.Cir. of the 25th September 1880, I have the honour to submit the annual accounts and report of the District Road Fund for the cess year 1884-85.

The balance left unrealized on the last day of the cess year is Rs. 15,402. This unusually large balance in the unrealized demand is mainly owing to the introduction of the new procedure in the working of the Certificate Act, concerning which some correspondence between the Collector of the district and you has passed, which has resulted in a modification of the original orders issued. There were six meetings of the Sudder District Road Cess and two of the Branch Committee held during the year.

* * * * * * *

During the year under review two bridges have been constructed—one over 150 feet in length, over Imirti Nuddee on the Motihari Dhaka road; and the other, 45 feet in length at Fatooha on Turkaulia to Sungrampore road.

Seven hundred and fifteen and a half miles of road have been repaired and kept in good order; also about 102 miles of village roads with their cart leeks have been repaired; and apart from the bridges noted above, 80 bridges have also been repaired and rebuilt.

Fifteen thousand four hundred and eighty trees have been planted along the sides of the different roads to demarcate the boundary of the district roads.

There is a Branch Committee at Bettiah in this district, and an allotment for expenditure in village roads is placed to the credit of the Chairman, Branch Road Cess Committee. Allotment for the year under report was Rs. 8,500.

The different establishments worked satisfactorily during the year.

Form of Audit Certificate.

WE hereby certify that the books and accounts specified below, prescribed for the Road Cess office and for the office of the District Engineer, are duly kept up, and that they have been posted for the year 1884-85, and have been duly scrutinized by the Sub-Committee.

Also that the Treasury officer's abstract of the account of the Committee for the year has been duly received, checked with the cash and pass-books, and found to agree therewith (except in respect of uncashed cheques, which are above enumerated and have been duly noted in the cash-book).

That the vouchers for the payments of the year have been cancelled.

That all necessary steps have been taken for the recovery or adjustment of outstanding advances.

That none but duly sanctioned expenditure has been incurred, and that, in the case of original works, the register of monthly expenditure shows clearly the amount of sanctioned estimate, the grant for the year, and the expenditure on each work to end of the year.

And generally that the work of the office has been performed with carefulness and regularity, and with a due observance of the rules prescribed by Government.

E. BOVILL,
Vice-Chairman.

No. 130G, dated Bankipore, the 12th March 1886.

From—F. M. HALLIDAY, Esq., Commissioner of the Patna Division,
To—The Secretary to the Government of Bengal, Public Works Department.

I HAVE the honour to forward herewith in original the annual accounts and reports of the several District Road Committees in this division for the cess year 1884-85.

2. The receipts in the whole division during the year amounted to Rs. 16,42,108, inclusive of Rs. 1,83,464 (the balance of the previous year), and Rs. 2,72,903 the receipts under the head "Advances" and "Deposits."

The expenditure of the year amounted to Rs. 14,06,511-5-2 as shown below:—

	Items.	Amount. Rs.	A.	P.
1.	Original works	4,85,184	1	9
2.	Repairs	3,59,299	15	11
3.	Establishment	1,94,179	5	0
Ditto	Contribution towards the cost of establishment of Divisional Superintendent of Works ...	25,789	5	5
4.	Tools and plant	26,992	11	3
5.	Staging bungalows, &c.	9,498	9	5
6.	Stationery and printing	5,585	3	2
7.	Refunds of cess and other receipts	4,302	12	7
8.	Toll and ferries	1,738	5	10
9.	Miscellaneous	1,731	11	0
10.	Advance and deposits	2,92,209	13	10
	Total ...	14,06,511	15	2

3. The expenditure on original works during the year exceeded that of the previous year by Rs. 1,04,752, and averaged about 40 per cent. of the aggregate net receipts of the Committees. But in the case of repair works the expenditure fell short of the estimate of the year by Rs. 95,376—nearly all the districts having failed to work to the full amount of their estimates, notably so the Gya district—where out of an estimate of Rs. 61,754, only Rs. 33,420 or about 53 per cent. was utilized.

4. The aggregate cost of establishment in the whole division, exclusive of that of the establishment of the Divisional Superintendent of Works, was Rs. 1,94,179-5 against Rs. 2,07,579 of the previous year, and equalled nearly 16 per cent. of the net receipts of the year.

There were some changes in the personnel of the executive staff in the districts of Sarun and Mozufferpore during the year—Messrs. J. Ellis and G. W. Disney being appointed District Engineers in the places of Messrs. G. St. Nixon and J. Davis respectively.

5. The improvement of village communication continues to receive a fair share of attention, but with one or two exceptions the District Road Cess Committees do not appear to attach so much importance to the maintenance and conservation of the cart tracks on the sides of the main roads as the subject requires. The result is that petty encroachments are constantly being made by the cultivators, and unless this practice is promptly and stringently guarded against, the width of the present district communications will be soon reduced to an impracticable working limit.

In the Sarun district much has been done to remedy the evil complained of, but generally speaking sufficient care is not exercised in this direction.

6. The working of some of the Branch Road Committees has not proved satisfactory. It is not, however, contemplated to make any change in the personnel of the committees—pending the introduction of the new Local Self-Government Act.

		Rs.	A.	P.
1.	Gya	3,540	0	0
2.	Patna	3,237	0	0
3.	Sarun	3,074	0	0
4.	Durbhunga	2,949	0	0
5.	Shahabad	2,660	0	0
6.	Mozufferpore	2,069	0	0
7.	Chumparun	1,389	5	6
8.	Hajipur Branch Committee with independent powers	668	1	0
	Total ...	19,526	6	6

7. The cost of the establishment of the Divisional Superintendent of Works during the year was Rs. 19,526-6-6, and was distributed proportionately among the several committees in the division as shown in the margin.

8. The supervision and control of the large expenditure in this extensive division, and of the important works under construction, have been, as usual, very ably carried out by Mr. Joll, the Divisional Superintendent of Road Cess Works.

PART III.

Act of the Bengal Council.

GOVERNMENT OF BENGAL.

LEGISLATIVE DEPARTMENT.

[First Publication.]

THE following Act, passed by the Lieutenant-Governor of Bengal in Council, received the assent of His Honor on the 14th April 1886, and having received the assent of His Excellency the Governor-General on the 24th May 1886, is hereby published for general information :—

ACT No. I OF 1886.

An Act to further amend the Village Chaukidari Act, 1870.

Preamble.

WHEREAS it is expedient to further amend the Village Chaukidari Act, 1870: It is enacted as follows :—

PRELIMINARY.

Extent.

1. This Act shall be read with, and taken as part of, Bengal Act VI of 1870 as amended by Bengal Act I of 1871.

Commencement.

And it shall come into force in all districts to which Bengal Act VI of 1870 as amended by Bengal Act I of 1871 has been extended from the date on which it may be published in the *Calcutta Gazette* with the assent of the Governor-General.

New section substituted for section 3.

2. For section 3 the following shall be substituted :—

Power to appoint panchayàt in villages.

"3. It shall be lawful for the Magistrate of the district, by a writing under his hand, to appoint not less than three nor more than five persons to be a panchayàt in any village containing more than sixty houses, within the district of which he has charge :

"Provided that no such panchayàt shall be appointed in any place to which the Bengal Municipal Act, 1884, has been, or may hereafter be, extended :

"Provided also that no panchayàt shall be appointed in any village until some officer exercising magisterial powers shall, in personal communication with the villagers, have explained to them the duties of a panchayàt, and shall have ascertained on the spot, by any means he thinks best to employ, the persons who, by reason of their local influence, in the opinion of the villagers, or for special reasons to be recorded by such magisterial officer, are most proper to be appointed members of the panchayàt :

"Provided also that in every village to which this Act has already been extended the Magistrate shall, as soon as may be, ascertain, in the manner hereinbefore provided, the persons most proper to be appointed as members of the panchayàt, and shall appoint them accordingly."

New section substituted for section 6.

3. For section 6 the following shall be substituted :—

Succession of member of panchayàt.

"6. Whenever any member of a panchayàt shall die or cease to be a member of such panchayàt, the Magistrate shall, by a writing under his hand, call on the remaining members of the panchayàt to nominate within thirty days a fit and proper person to be appointed as member of the panchayàt in the room of such member so dying or ceasing to be a member and the Magistrate

shall, unless he considers such nomination improper, appoint the person so nominated to be a member of the panchayàt:

"Provided that if no person shall have been so nominated, or if in the opinion of the Magistrate the person nominated is, for reasons to be recorded by him in writing, unfit to be appointed a member of the panchayàt, the Magistrate shall appoint a fit and proper person to be a member of the panchayàt."

Amendment of section 8.

4. In section 8 for the words "fifteen days" shall be substituted the words "thirty days," and for the words "two years," shall be substituted the words "three years."

New section substituted for section 9.

5. For section 9 the following shall be substituted:—

Period for which panchayàt to be appointed.

"9. Every member of a panchayàt appointed under section three shall be appointed for the term of three years. Every member of a panchayàt appointed under section six shall be appointed only for a term equal to the unexpired portion of the term for which the member whom he succeeds was appointed."

New sections to follow section 9.

6. After section 9 the following shall be inserted:—

Exemption from serving on panchayàt.

"9A. No member of a panchayàt, after the expiry of his term of office, shall be again appointed a member of a panchayàt, without his consent, till after the lapse of three years.

Appointment of fresh panchayàt.

"9B. On the expiry of the term for which the members of a panchayàt were appointed, the Magistrate shall appoint a new panchayàt in the manner prescribed in section three, the outgoing panchayàt continuing to exercise all the functions of a panchayàt until such new panchayàt has been appointed."

Amendment of section 22.

7. In section 22, for the words "six per cent." shall be substituted the words "ten per cent."

Amendment of section 39.

8. To section 39 the following shall be added:—

"8*th*—He shall assist the collecting member of the panchayàt in collecting the chaukidari assessment."

Amendment of section 41.

9. In section 41 after the words "such member shall himself report the same" and before the words "to such officer" shall be inserted the following:—

"or cause the same to be reported."

New section substituted for section 43.

10. For section 43 the following shall be substituted:—

Mode of paying chaukidars.

"43. Every chaukidar shall receive, quarter by quarter, the full amount of his salary from such officer or person as the Magistrate shall appoint."

New section substituted for section 44.

11. For section 44 the following shall be substituted:—

Panchayàt to pay or remit quarterly amounts for payment of chaukidars, &c.

"44. Within thirty days after the end of each quarter, every panchayat shall pay or remit to such officer or person as the Magistrate may appoint under the last foregoing section a sum equal to the pay of the chaukidar for the quarter, or any smaller amount which may stand to the credit of the Chaukidari Fund of the village."

Amendment of section 45.

12. In section 45 for the words "shall issue his warrant" shall be substituted the words "may issue his warrant," and at the end of the section the following shall be added:—

"An application for the appointment of a tehsildar under section 46A shall not of itself be deemed a sufficient step to realize from defaulters the arrears due from them."

New sections to follow section 46.

13. After section 46 the following shall be inserted:—

Appointment of tehsildar at request of panchayàt.

"46A. The Magistrate may at any time, on the application of the panchayàt of any village, appoint a tehsildar in such village to assist the collecting member of such panchayàt, and such tehsildar shall exercise all the powers vested in the panchayàt for the collection of the chaukidari assessment, and the Magistrate shall, on a like application, revoke such appointment.

Remuneration of tehsildar.

"46B. Every tehsildar appointed under the last foregoing section shall be remunerated at such rate and in such manner as the Magistrate may, from time to time, with the sanction of the Commissioner of the Division prescribe; and such remuneration shall be levied from those who have failed to pay their chaukidari assessments in the same manner and in the same proportion as the chaukidari assessment:

"Provided that one tehsildar may, in the discretion of the Magistrate, be appointed for more than one village."

RESOLUTION ON THE CHEMICAL EXAMINER'S REPORT FOR 1885.

MUNICIPAL DEPARTMENT—MEDICAL.

Dated Darjeeling, the 22nd May 1886.

RESOLUTION.

READ—

A letter from the Inspector-General of Civil Hospitals, Bengal, No. 2343, dated the 8th April 1886, forwarding the report of the Chemical Examiner for the year 1885.

Read also—

The Report for 1884 and the Resolution recorded on it.

There has been some delay in the submission of the report: it was due on the 1st March, but it did not reach Government until the 9th April. Dr. L. A. Waddell officiated as Chemical Examiner for the greater part of the year. He was relieved in the middle of November by Dr. C. J. H. Warden, who had been absent for eighteen months on furlough and the report is written by the latter officer.

2. The following table shows the general nature of the work done during the year compared with that of the two preceding years:—

	1st April to 31st December 1883.	1884.	1885.
Medico-legal—			
Human viscera tested for poison ...	127	217	234

In addition to the above, eight special opinions were furnished on technical matters during the year, and two memoranda on the Petroleum Bill and the Explosives Act.

3. In the analytical work there was a decrease of 406 cases as compared with the previous year. The decrease is specially noticeable under the heads of "Opium," "Salt," and "Spirit for deleterious adulterations." It is explained that in the report for 1884 the physical examination of 171 balls of opium was included in the list of analyses performed, whereas the cakes had only been handled to ascertain their freedom from grubs, &c. The decrease under the head of "Spirit for deleterious adulterations" is due to the fact that in 1884 an exceptionally large number of samples were examined for the Excise Commission, which represented work out of the usual routine of the department. Dr. Warden's report on the analysis of Australian and Kashmir wines is of much interest. He writes: "The Kashmir clarets compare most favourably with the imported clarets; and when we are acquainted with the extent to which French wines are adulterated, it becomes a matter of surprise that our locally manufactured wines are not largely used; but, as a matter of fact, probably 99 out of 100 consumers of claret in India have never heard of Kashmir claret."

4. During the year under report 234 human viscera were examined against 217 in 1884. Of these, poison was detected in 107 cases, giving a percentage of 45·72 against 38·25 in the previous year, the corresponding average of the past ten years being 42·6. It is satisfactory to notice the decrease in the number of autopsies conducted by Civil Hospital Assistants. In 1882-83 they performed 49 per cent. of the *post-mortem* examinations; in 1883, 14·9 per cent.; in 1884, 6·9 per cent.; and in 1885, 6·8 per cent.

5. Seven hundred and eighty articles suspected to be, or to contain, poison were submitted for examination during the year. Out of these, 394 were found to contain poison, giving a percentage of 50·5 against 47·7 and 33·4 in the two preceding years. One hundred and ninety-three animal viscera were examined against 137 in 1884 and 76 in the nine months of 1883. Poison was detected in 142 cases, and in all these, as in the previous year, death was caused by arsenic poisoning.

6. The Chemical Examiner reports that there was some improvement in the manner in which accounts of *post-mortem* examinations were submitted to him during the year, as well as in the mode of packing parcels containing articles for analysis. Officers conducting *post-mortem* examinations, and forwarding viscera, &c., for chemical analysis, should carefully adhere to the instructions on this important subject.

7. In paragraph 44 of his report, the Chemical Examiner represents the necessity of making certain alterations in the Laboratory. This matter should form the subject of a separate communication.

8. It is creditable to Dr. Warden that during a considerable period of his furlough in Europe he devoted himself to investigations on Indian indigenous drugs, and that he can report, after communication with Dr. Stevenson, the Official Analyst to the Home Office in London in medico-legal cases, that the rules for the guidance of medical officers in similar cases here, and the medico-legal return forms in use in Bengal, are excellently adapted for their purpose.

ORDER—Ordered that a copy of the Resolution, with a copy of the Report, be submitted to the Government of India, in the Home Department, for information.

Ordered also that a copy of the Resolution be forwarded to the Inspector-General of Civil Hospitals, Bengal, for information and for communication to the Chemical Examiner.

By order of the Lieutenant-Governor of Bengal,

R. H. WILSON,

Offg. Secretary to the Govt. of Bengal.

No. 2343, dated Calcutta, the 8th April 1886.

From—A. J. COWIE, ESQ., M.D., Inspector-General of Civil Hospitals, Bengal,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit the report of the Chemical Examiner for the calendar year 1885, with appendix. The report has been written by Dr. Warden, who returned from furlough on the 14th November 1885. Dr. Waddell officiated as Chemical Examiner from 1st January to 13th November of that year.

2. The Government order is that the report should be submitted not later than the 1st March every year, and in order to do so, I find the 31st January as the latest date it should be sent to my office. February was therefore available for checking and printing the report. This year the report was received in my office on the 27th February, or two days only before the date it ought to have been forwarded to Government.

3. Dr. Warden explains the delay in a letter No. 202A, dated 23rd March 1886, a copy of which I beg to enclose. From the 27th February much time has been occupied in checking the figures and printing, thus leaving but a short while in which to review the report.

4. The total number of analyses performed in 1885 was 2,343, or a decrease of 406 as compared with the work done in 1884.

5. The increase and decrease in the past ten years may be seen from the following figures :—

1876-77	...	...	...	1,172 Analyses.	
1877-78	...	...	...	1,182 An increase of	10.
1878-79	...	...	...	1,648 Ditto of	466.
1879-80	...	...	...	1,578 A decrease of	70.
1880-81	...	...	..	1,470 Ditto of	108.
1881-82	...	...	...	1,900 An increase of	430.
1882-83	...	...	...	2,133 Ditto of	233.
1883 (nine months)		...	...	1,211 A decrease of	922.
1884	...	...	...	2,749 An increase of	1,538.
1885	...	...	...	2,343 A decrease of	406.

6. In the year under review a large decrease took place. This is remarkable. The decrease is specially noticeable under the heads of "Opium," "Salt," and "Spirits for deleterious adulterations." There is an increase under every other head, except—

"Substances suspected to be or to contain poison, including cattle-poison."
"Articles tested for seminal stains."
"Petroleum and inflammable oils."
"Lime-juice."
"Spirit determination for the Collector of Customs."

Among articles tested for purity and quality, the following show a decrease :—

"Fort William Arsenal." | "Medical Store Department."

7. Dr. Warden explains that in the report for 1884, which was written by Dr. Waddell, "the physical examination of 171 balls of opium was recorded as 171 analyses, whereas the cakes had merely been handled to ascertain their freedom from grubs, &c, and were not subjected to chemical analysis."

Medico-legal analyses have increased.

In 1884 there were 1,328 cases.

In 1885 there were 1,437 cases, or an increase of 109 cases.

8. Two hundred and thirty-four specimens of human viscera were examined, against 217 in the preceding year, showing an increase of 17. In 107 instances poison was detected, or in 45·72 per cent. The result is satisfactory when compared with the poison detected in a total number of 2,439 viscera examined during the decennial period from 1875 to 1885, which was 42·6 per cent. only.

9. It is gratifying to note that Dr. Warden has no cause to complain this year of the manner in which the records of *post-mortems* have been submitted to him. He, however, intimates that in one district (Furreedpore) the amount of viscera despatched for examination was insufficient. The attention of the medical officers concerned will be drawn to this.

10. The animal viscera examined during the year was 193, against 137 in the previous year. The increase is represented by 56 cases. It is much larger than that of any of the previous years.

11. The percentage of cases in which poison was detected is thus exhibited :—

	Poison.	No poison.
1884	67·8	32·1
1885	73·5	26·4

Arsenic is still the chief poison employed in the destruction of cattle. Of the 281 substances received, suspected to be employed for cattle-poisoning, 176 contained arsenic.

12. Dr. Warden still urges the desirableness of legislation to restrict the sale of poisons. He says: "there does not appear to be any valid reason why an attempt should not be made to restrict the sale of some, if not of all, poisons." The difficulty in the matter is this, and it has been sufficiently illustrated by the Government, viz. that "poisonous substances exist in every hedge and garden throughout the country." No Act therefore prohibiting their sale could touch the matter, when there is no need to purchase the majority of such poisons. Take the Abrus, or Indian licorice, as the chief and best known substance used in cattle-poisoning. The plant grows everywhere. I admit, however, that the sale of some poisons could be restricted, and notably the common mineral arsenic. Still, even here, if the sale of arsenic were subjected to the same rules as in the case of sulphur, I fear trade might suffer, as this article is very largely used in preparing skins for the market.

13. I do not think that cattle-poisoners will resort very largely to the use of vegetable poisons in lieu of arsenic, "from its being known to *hakeems* and native druggists that, while minute traces of any mineral poison can be unerringly detected, most vegetable substances defy analysis in the present state of chemical science," because the latter is cheap, can be readily

strewn about the grass where cattle feed, and it is known to retard decomposition in the carcass of the animal destroyed by it. The increased exhibition of vegetable poisons, however, in other directions, I fear, we may expect, and Dr. Warden notes that they are now being more resorted to.

14. The note on the analyses of Australian and Kashmir manufactured wines is full and very interesting.

15. The increased examination of water is satisfactory. There were 57 examinations as against 46 in the previous year.

16. Dr. Warden devoted much of his time while on furlough in practical work in the chemical laboratories in Berlin. He also continued his investigations in Indian indigenous drugs, &c. The interest displayed in his profession, and the good work accomplished, is highly creditable to him.

17. In No. 1774T—M, dated 14th September 1885, the Government sanctioned the appointment of an assistant to the laboratory. I have placed Baboo Romanath Dey in the post on probation. Dr. Warden complains that he has no one to take the place of Assistant Surgeon Tara Prasanna Roy, should he through any cause be incapacitated. Dr. Warden knows perfectly well that practical chemists are not to be met with in Calcutta lying around loose. He must educate the man he needs himself. This he acknowledges, and practically this is what is being done. He considers, however, that "the department is still decidedly under-officered." The scope and work in the department steadily increases, and we must undoubtedly be prepared to augment the staff from time to time proportionately. The accommodation, too, will have to be seen to. Possibly a re-arrangement of the rooms and economising space may meet present difficulties. In consultation with the Department Public Works much, I think, might be done in this direction. I quite approve of Dr. Warden's request that sanction may be given for the construction of 20 separate closets. They are very necessary. The cost is not to exceed Rs. 900, which is not excessive.

18. The title of Assistant Chemical Examiner to Government cannot now be altered, unless section 510 of the Criminal Procedure Code is amended.

19. The amount of laborious work accomplished during the year is satisfactory, and the report is full and interesting.

CALCUTTA, *the 1st June* 1886.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 28TH OF MAY 1886.

ONE of the principal features in the meteorology of the past week has been in connection with a second advance of monsoon winds, which was taking place in the southern part of the Bay at the close of the previous week, and which, it was stated in the report for that week, would probably advance further up the Bay than the previous advance. The strong winds which were noticed at the Ceylon stations increased in force on Saturday, the 22nd, and pressure commenced to fall in the south-west of the Bay. On the morning of the 23rd a distinct cyclonic storm had formed off the South Madras coast, and by the following morning it had advanced over the coast line between Madras and Negapatam, the centre of the storm being apparently almost on the coast at 10 A.M. on the Monday morning, and nearer to Negapatam than to Madras. The storm was of considerable diameter, but the barometric depression at the centre was small, and though it was sufficiently powerful to give strong winds and rather stormy weather along the Madras coast, it cannot, so far as the observations received have shewn, be said to have been a violent storm or cyclone. On the following day, the 24th instant, the storm had apparently crossed the peninsula, and it ceased to affect the weather in the Bay of Bengal.

This moist southerly current, in front of which the storm just described had formed, apparently continued its advance up the Bay, and more particularly along the east coast, and on Wednesday, the 26th and on the 27th, there were indications that an extremely feeble cyclonic circulation had been set up by the advancing current over the centre of the Bay, and at this time a moist southerly and south-easterly wind current advanced over Bengal, giving rise to general rain in almost all districts of the province. This current can scarcely be said to have been the commencement of or the setting in of the rains, but it is rather a sort of preliminary advance of moist southerly winds, pushed forward or brought up by the strong winds in the south and centre of the Bay, which has drifted over the province, but which has not had sufficient strength to advance far into the interior of the country. During the earlier part of the week over the greater part of the province weather was fine, or in such parts as East and North Bengal decidedly showery, but with the advance of this southerly current from the 25th to the 27th rainfall became much more general and decidedly heavier over South-West Bengal, East and North Bengal, and over South Behar and Chutia Nagpur, while numerous showers fell in North Bengal and Orissa.

The variations of pressure during the week have not been of great importance, though for the first two or three days the variations were to a certain extent influenced by the formation of the cyclonic storm in the south of the Bay. After this pressure fell pretty steadily up till the 26th, when a slight recovery took place, which was, however, succeeded by a further fall on the last two days of the week. For almost the whole week therefore the general pressure has been steadily decreasing, and the effect has been to diminish the previous large excess pressure which had been registered. At the close of the previous week the excess pressure at many stations equalled 0·15″, while for the whole week pressure had been in excess by 0·1″. By the gradually diminishing pressure this week, the excess has been reduced to 0·062″, but the excess is generally smaller in the western and southern districts than it is in the eastern and northern districts.

Temperature has, with the comparatively heavy rainfall during the week, been decidedly low, and all districts except North Behar show temperature considerably below the normal. The greatest defects are in South Behar and Chutia Nagpur, where they are 3° and upwards; in Orissa, South-West and East Bengal the defects are from 1° to 2°, while in North Behar temperature has been nearly normal. For the whole province the mean temperature for the week has been 1·7° below the normal.

Rainfall has been most copious in East Bengal, which district has received 3·35 inches against the normal fall of 2·44 inches. The actual fall has therefore been considerably in excess of the normal. North Bengal has received an average rainfall of 2·82 inches, while the normal fall is 2·31 inches, and has thus also received considerably more than the usual amount. South-West Bengal has registered an average amount of 2·04 inches against the normal 1·27 inches, and again this district has received a fall largely in excess of the normal. Chutia Nagpur has received 1·81 inches against the normal fall of 0·40 inch, so here the fall has again been copious. South Behar has recorded an average fall of 0·99 inch, which is almost three times the normal fall of 0·37 inch; and North Behar has registered 0·79 inch against the normal 0·61 inch, and has received a considerable excess fall. Finally, in Orissa the rainfall has been in decided defect, and the average fall at all the stations from which records have been received shows only 0·53 inch, while the normal fall for the week is 0·86 inch; the actual is therefore less than two-thirds of the normal fall.

The distribution of the rainfall has, however, been somewhat irregular and capricious in the various districts, and thus while in South-West Bengal the rainfall has been generally considerably in excess, the Midnapur and South 24-Pergunnahs districts show falls in defect of the normal. Also in North Bengal, where again the general fall has been in excess, the Maldah district has only received about a third of the normal amount. In South Behar the rainfall has been deficient in the Sarun, Chumparun and Durbhunga districts, and largely in excess in Purneah. In South Behar the Patna district has shown a fall below the normal, though other districts round it have received four and five times their normal falls.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 28th of May 1886 :—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 8e, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

MEMORANDUM.

FROM the annexed table exhibiting the mortuary statistics of the districts in Bengal for the month of February 1886, the following results are apparent :—

1. That the deaths of 94,331 persons were registered among a population of 66,163,884, or at the rate of 17·04 per thousand per annum, against 22·32 per 1,000 in the preceding month, and 17·40 per 1,000 in the corresponding month of the preceding year, indicating, as compared with the preceding month, a considerable falling off in the number of deaths recorded.

2. That the highest casualty rates were returned from the following districts :—

	Deaths. Ratio per *mille.*		*Deaths.* Ratio per *mille.*
Balasore	28·32	Cuttack	26·40
Pubna	26·52	Jessore	25·68
Julpaiguri	26·52	Rungpore	25·20

3. That the mortality from the principal diseases specified in the following table exhibits no marked difference in comparison with the results of the corresponding month of 1885 :—

	Ratio per *mille* during the weeks ending— February 1886.	February 1885.
Cholera	1·08	1·20
Small-pox	·07	·12
Fever	12·48	12·60
Bowel-complaints	·60	·72
Injury	·12	·12
Other causes	2·52	2·40

4. That while the incidence of small-pox, bowel-complaints and injury was, on the whole, normal throughout the Province, and the maladies grouped under the head for "Other causes" proved conspicuously fatal only in the Puri district, viz. at 11·16 per 1,000 of population, cholera and fever caused the highest mortality in the following districts :—

	Cholera. Ratio per *mille.*		*Fever.* Ratio per *mille.*
Balasore	7·56	Pubna	25·56
Jessore	6·60	Julpaiguri	25·32
Cuttack	4·68	Rungpore	23·28
24-Pergunnahs	3·84	Dinajpur	21·12
Midnapore	3·72		
Puri	3·60		
Mymensing	2·88		
Nuddea	2·04		

5. That in relation to *Sex, Class* and *Age*, the death-rates during the months under notice stand as follows :—

OFFICE OF SANITARY COMMISSIONER FOR BENGAL,
The 29th May 1886.

R. LIDDERDALE, M.D., *Deputy Surgeon-General,*
Sanitary Commissioner for Bengal.

MEMORANDUM.

DURING the week ending 15th May 1886, the returns from the principal Municipalities in Bengal furnished the following results :—

1. That births were registered in the above Municipalities at the rate of 16·4 per 1,000 of population as opposed to very nearly the same proportion, viz., 16·1 per 1,000, in the preceding week ending 8th May, and deaths at 22·3 against 21·5 per 1,000, showing a small increase in death registration.

2. That the highest proportions of births and deaths were returned from the undermentioned Municipalities :—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille.*
Beauleah	36·8	Beauleah	57·8
Naraingunge	33·1	Puri	33·6
Kishnaghur	32·2	Kishnaghur	32·2
Burdwan	32·0	Burdwan	32·0
Durbhanga	30·7	Comillah	30·8

3. That the mean mortality from the principal diseases mentioned in the following table, in comparison with the mortality from the same diseases in the preceding week, stood as follows :—

	Ratio per *mille* during the week ending—	
	15th May 1886.	8th May 1886.
Cholera	1·9	2·2
Small-pox	·1	·1
Fever	9·5	9·9
Bowel-complaints	4·1	2·9
Injury	·4	·4
Other causes	6·3	6·0

The only noticeable fact revealed by the above figures is that the death-rate from bowel-complaints has risen sensibly.

4. That of the above-mentioned diseases, cholera and the maladies classed under the head of "Other causes" were more fatal to life in the following Municipalities :—

Cholera.	Ratio per *mille.*	*Other Causes.*	Ratio per *mille.*
Beauleah	23·6	Puri	16·8
Puri	12·6	Suburbs of Calcutta	10·8
Kishnaghur	7·5	Durbhanga	10·2

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population, upon all heads in the above table, except "Age," the ratios under which have been omitted, inasmuch as the census of the Europeans, always a factor to control, cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the multiplied form of age classification.

NOTICE TO MARINERS—(No 35.)

BAY OF BENGAL—BURMA COAST.

COAST OF TENASSERIM.

MERGUI ARCHIPELAGO.

(1) *Shoals in Fells' Passage.*

THE Officer in charge of the Marine Survey of India has reported that a *rock*, with a depth of only 6 feet at low-water, spring tides, lies 1½ miles N. E. by E. ½ E. of the South point of Cantor's Island.

The *rock* or *islet* marked on the latest corrected charts, two miles E. by N. of Bound island, does not exist.

The *Medina Patches* with a depth of 1½ fathoms, lie one mile E. by S. of Bound island, and join the 2½ and 3 fathoms marked to the South Eastward.

Directions.—By keeping the whole of Passage Island open West of Fell's Island, a vessel will pass over the tail of the bank in 3 fathoms at low-water, smooth bottom. The least water in Fell's Passage is 9 feet at low-water between Payee Kyun and the Small islet. The rise of tide at neaps is 12 feet above this.

(2) *Reef South-Eastward of Tavoy Island.*

Also, that information has been received of the existence of a *rocky patch* lying to the South-East of Tavoy Island :—

This reef (*Bowers Reef*) is half a cable in extent, and dries at low-water ; it lies 9½ miles S. S. E. ½ E. of Canister Bank (Eastward of Tavoy Island), and 5½ miles N. ¾ E. of Long Island.

The bearings are magnetic—Variation 3° Easterly in 1886.

ARABIA—EAST COAST.

PERSIAN GULF.

(1) *Non-existence of Oribe Shoal.*

THE British Admiralty have given notice, with reference to the reported existence by the master of the British barque *Oribe* in 1878, of a sunken danger lying in latitude 27° 27′ N., longitude 50° 39′E—about midway between Rás-al-Mutaf and Rennie shoal—in the fairway of the Persian Gulf, that, consequent on the unsuccessful search made by H.M.S. *Arab* in 1879 and H.M.S *Reindeer* in January 1886 the *Oribe* shoal has been expunged from the Admiralty Charts.

(2) *Non-existence of reported shoal North-West of Lárak Island.*

Also, that, consequent on an unsuccessful search having been made by H.M.S. *Reindeer* in January 1886 for the shoal on which the British India Steam Navigation Company's steam-ship *Oriental* was stated to have grounded in 1884, and reported as lying on the North-West side of Lárak Island, at the distance of about one mile from the shore, this shoal has been expunged from the Admiralty Charts.

GULF OF CAMBAY.

Particulars of Khúnbandar (Chilkari) Light.

THE following information has been received from the Hydrographer to the British Admiralty concerning the Khúnbandar (now named Chilkari) light, Western side of the head of Gulf of Cambay:—

The light, *fixed white*, is visible between the bearings of about E.¼N., through *West*, and about S. by E. ¾ E.; it is elevated 45 feet above the level of high-water, and should be seen in clear weather from a distance of 12 miles.

The light-house situated about one mile Southward of Chilkari Creek, and half a mile inland from the shore, is a *wooden* structure, *conical* in shape, with *two* small sheds at its base; the whole painted *black*.

Approximate present position on Admiralty Charts—latitude 22° 10′ 15″ N.; longitude 72° 20′ 35″ E.

Note.—From the falling away of the foreshore, the position of this light has of late years been several times altered.

The bearings are magnetic and from seaward.

6. Any matriculated student of the College may, with the permission of the Principal and the Professors of the subject, attend courses of lectures or departments of hospital practice in addition to the full curriculum for the year, and shall be entitled to certificates of attendance at such extra lectures, if the Professor is satisfied that he or she has really studied the subject. The fees payable in advance for such additional courses are the following :—

	Rs.
For a single course of lectures on each subject	40
For six months' attendance in each department of hospital practice	60

7. Any matriculated student who leaves the College before completing his University course, with the object of continuing his studies at a Medical School in Europe, may receive certificates of attendance at lectures on payment of fees at the rate fixed in the foregoing rule. But in calculating the sum to be so paid, the amount of the fees already paid by him as a regular student, or in the case of a free student, the amount which would have been paid by him had he been a paying student shall be deducted.

8. Any person not being a matriculated student of the College, who may be desirous of attending any course of lectures, or any department of hospital practice, may do so with the permission of the Principal and Professor of the subject, on payment, in advance, of fees at the rates fixed in rule 6.

If such student has passed the Entrance Examination of the University, he may receive certificates of attendance at lectures, provided the Professors are satisfied that he has attended the full course of lectures, and has mastered the subjects taught.

A student who has not passed the Entrance Examination will be entitled to no certificates of any kind.

9. College scholarships, prizes, and certificates of honour are open for competition only to matriculated students of the College, Hospital Apprentice and Female Certificate class.

PUBLIC WORKS DEPARTMENT, BENGAL.

DISTRICT ROAD FUND.

NOTIFICATION No. 214.

The 31st May 1886.

THE following accounts and reports of the Road Committees of the districts of Dacca, Furreedpore, Backergunge, and Mymensingh, for the cess year 1884-85, together with the remarks thereon of the Commissioner of the Dacca Division, are published for general information.

D. B. HORN,
Under-Secy. to the Govt. of Bengal.

No. 146, dated Dacca, the 6th January 1886.

From—F. WYER, Esq., Chairman of the District Road Cess Committee, Dacca,
To—The Commissioner of the Dacca Division.

I HAVE the honour to submit herewith two copies of the detailed accounts of the receipts and expenditure of the Road Fund of this district for the cess year ending on the 30th September last, together with the following report on the works of local improvement that were undertaken during that year, and those proposed to be carried out during the current year 1885-86. The accounts were duly audited by the standing Sub-Committee of audit and passed by the Committee at a special meeting held on the 6th instant in accordance with the provisions of section 179 of the Cess Act IX (B.C.) of 1880.

2. *Original Works.*—The most important original work undertaken during the year under review is the extension of the proposed Dacca-Manickgunge road from Bulliarpore to the bank of the Dhullessuri river. A bridge of 2 spans of 20 feet each was erected over the Bulliarpore khal lying on this section of the road. The masonry works of the bridge were nearly finished, but the iron platform was not put up owing to the loss of two rolled iron joists, which, by mistake of the Indian General Steam Navigation Company, were missent to Silchar. The bridge will be completed in the present year, and the new road, which has been completed up to the Dhullessuri, opened to traffic.

3. In order to remedy the inconvenience seriously felt by pilgrims and votaries in visiting the Durgah of Shah Ali Shaheb, well known in East Bengal, the District Road Committee, at the instance and expense of Nawab Ahsanoollah Khan Bahadoor, undertook the construction of a road from the Meerpore river to the Shah Ali Shaheb's Durgah. The road was partially constructed and about two-thirds of the estimated quantity of earthwork and turfing executed. The road will be completed in the present year as soon as the lands needed for it have been acquired. The Committee's thanks are due to Nawab Ahsanoollah Khan Bahadoor for his having liberally paid the entire cost of constructing the road.

4. *Survey Operations.*—The principal survey works carried on during the year under report for the preparation of projects for the construction of new roads were the following :—

(1) Surveying the first section of the proposed Dacca-Manickgunge road from Dhalla on the right bank of the Dhullessuri river, opposite Foolbaria, to Baitha, near Dassorah.

(2) Surveying the Durgah first road from the Meerpore river to the Shah Ali Shaheb's Durgah.

(3) Surveying the proposed Durgah second road from the Meerpore road to the Shah Ali Shaheb's Durgah.

(4) Levelling the Dacca-Toke road from Tokechandpore to Channa opposite Joydebpore.

5. *Repairs.*—All the existing district roads were maintained and repaired during the year, and they are reported by the District Engineer to have much improved with the exception of the roads from Moonsheegunge to Singpara, Keranygunge ferry to Nishanbaree and Moniat road, Nowabgunge to Moniat, which being below the level of high-flood were washed away in some places during the late rains. However, the general condition of these roads is reported to be fair.

6. In the road from Dacca to Naraingunge, the metalling operations were carried out systematically, and the quadrennial system of renewing entire miles, which was introduced in the preceding year, was adhered to. Three entire miles were renewed with jhama metal consolidated with Bhowal kunkur and the condition of the road has been greatly improved.

7. *Arboriculture.*—During the year under review no new trees were planted, but the old ones were maintained. In the undermentioned roads new trees were planted in place of those died out, and enclosures were repaired and put round them to protect them from animals :—

Name of road.			No. of enclosures repaired.	No. of trees planted.
Road from	Dacca to Naraingunge, No. 1	...	499	224
Ditto	Naraingunge to Byde Bazar, No. 2	...	753	72
Ditto	Dacca to Toke, No. 3	...	660	...
Ditto	Sealo to Manickgunge, No. 6	...	760	182
Ditto	Mirpore to Dacca, No. 10	...	183	1,030

8. The maintenance and the watering of trees were carried on by mallis under the supervision of overseers in charge of roads. The trees are reported by the District Engineer to have much improved, and some of them have already borne fruit.

9. Village communications, both in the shape of original works and repairs, were executed by the District Committee, as well as by the Branch Committees of Manickgunge and Moonshegunge out of the assignments set apart for the purpose, the details of which have been given in the annual account.

10. In the following two instances the grants for village works in the Manickgunge sub-division were supplemented by local subscriptions. The villagers of Nabogram contributed Rs. 700 for the excavation of a tank in their village, which cost Rs. 1,000, and one Krishto Kanta Karmokar contributed Rs. 25 for the construction of a road at Hizli which cost Rs. 100. The lands required for the construction of village works were given gratis in all cases but one. In this Rs. 21-12-6 only had to be paid on account of cost of land required for the tank in the town of Manickgunge.

* * * * * * * *

12. The District Road Committee worked as in former years. A few of the members did not attend a single meeting, but the rest of the members who attended the meetings evinced interest in the matters brought before them for discussion. Five members of the Moonsheegunge Branch Committee did not attend a single meeting ; the others, as well as the Manickgunge Branch Committee, have worked fairly well.

13. The Cess Act appears to have worked smoothly during the year.

14. The different establishments under the Road Cess Committee have worked well and given satisfaction in the discharge of their respective duties. The District Engineer, Baboo Shoshi Bhoosun Mitter, has attended to his work very well, and given great satisfaction by the way in which he has carried it out. The Accountant, too, Baboo Rakhal Chunder Sing, has carried out his duties efficiently and to my satisfaction.

ANUND CHUNDER SEN,
Vice-Chairman.

No. 185—III-5C, dated Furreedpore, the 27th January 1886.

From—F. H. BARROW, Esq., Chairman, District Road Committee, Furreedpore,
To—The Commissioner of the Dacca Division.

I HAVE the honour to submit herewith two copies of the detailed accounts of the receipts and expenditure of the Road Fund of this district for the cess year ending the 30th September 1885, together with the following report on the administration of that fund during the year. The accounts were duly audited by the standing Sub-Committee of audit, and passed by the Committee at a special meeting held on the 26th instant in accordance with the provisions of section 179 of the Cess Act. A copy of the resolution of the special meeting by which the accounts were passed is also hereto annexed.

2. *Cess on lands.*—During the year under report the cess was levied at the usual maximum rate of 6 pies on each rupee of the annual value of lands. The collection of cess cannot be said to have been quite satisfactory, it having fallen short of the estimate by Rs. 2,363, against Rs. 2,099, the short collection of the previous year. The demand of the year was Rs. 58,231, which, with an arrear of Rs. 24,200 outstanding at the close of the previous year, gave the large sum of Rs. 82,431 as realizable. The estimate of Rs. 56,037 was therefore a very moderate one. The bad results are due to the somewhat dilatory proceedings of the certificate department, and I have taken measures to expedite them. In many estates there is want of agreement amongst the sharers as to their respective portions of road cess, and nothing will enforce payment but a threat of immediate sale.

3. The receipts on account of fees, fines, and forfeitures amounted to Rs. 2,587-14-3, as against Rs. 4,725-7-1 in the previous year, and Rs 6,150 in the estimate. Thus, the total revenue of the year as actually credited to the fund fell short of the sum estimated in the budget by Rs. 5,693-9-9.

4. *Committee.*— * * * The percentage of average attendance was in excess of that of the previous year. Almost all the members of the District Committee took an active interest in the administration of the fund. In auditing the monthly accounts, the Sub-Committee generally followed the suggestions of the Examiner of Local Accounts with a view to ensure greater efficiency in their work.

5. *Branch Committees.*—The Branch Committee of Madaripore is reported by the Chairman to have "worked well on the whole." But it would appear that though this Committee was first in securing the largest amount of private contributions in the previous year, no attempts appear to have been made in the year under report to increase its resources through the same source. It is proposed to change the head-quarters of the sub-overseer for this sub-division from Palong to Madaripore for the better assistance of the Branch Committee.

The Branch Committee of Goalundo seems to have administered its funds with much greater efficiency this year than in the preceding year. The attention of the Branch Committee was drawn last year to the total absence of private contribution to grants made by the Committee, and it is satisfactory to observe that with the assistance of the Chairman of the District Committee, Rs. 700 were realized this year as contribution in cash from parties applying for the Committees, grants. Besides, a sum of about Rs. 1,100 is reported to have been spent by the villagers themselves to supplement the grants sanctioned by the Committee. There were some very handsome donations to the Branch Committee for excavation of tanks which deserve special notice. Fuli Fakirni (ফুলি ফকিরনী) professing to be a mendicant woman of Kanukhali gave Rs. 800 for a public tank in her village; and Baboo Jadub Chandra Ghosh, a talukdar, is also said to have spent a similar sum for a similar purpose.

6. The village Road Sub-Committee for the Sudder sub-division did their duty, and the works carried out under their superintendence were for the most part examined and reported on by the District Engineer and his staff. The applicants for tanks and roads were compelled to make contributory payments, and this method of distributing the funds was found satisfactory

7. *Examination of Accounts.*—The accounts of the Committee were checked by an Auditor of Local Accounts in July 1885 There was also the monthly and annual audit by the standing Sub-Committee appointed under section 174 of the Cess Act. The books and accounts of the District Engineer were also audited by the Sub-Committee, and inspected by the Examiner and Divisional Superintendent. The results of all these examinations of both the offices were satisfactory.

8. *Original Works.*—The following works were either executed or completed during the year under report:—

(1) The Gharishar road.
(2) Chur Teprakandi road.
(3) Widening of the Fooltala road
(4) Godarbazar road metalling.
(5) Khangunge road metalling.
(6) Kristopore road bridge.
(7) Madhukhali road pipe drains.
(8) Rajbari road culvert.
(9) Bhojeswar road bridging.

But I am sorry to say that Nos. 1 and 9 have been most seriously damaged by the floods of the rains, and No. 2, so much so as to render it doubtful if it should ever have been undertaken. All the works in progress at the close of the last year were also completed during the year.

9. *Repairs.*—Most of the roads are reported by the District Engineer to have been maintained in trafficable order all the year round. Considerable damages were done to some

of them by the late extraordinary floods. The expenditure in repairs of the district roads aggregated to about Rs. 9,400, giving a rate of Rs. 71 per mile.

10. *Village Roads.*—It will be seen from the sub-joined statement that the expenditure on village roads during the year under report was not as large as that of the previous year. The total number of village roads constructed was 32, aggregating in extent to about 20 miles as shown in the margin.

11. *Tanks.*—Eleven tanks were excavated during the year; four in the Sudder, three in Madaripore and four in Goalundo sub-divisions. The Committee's allotments on this head were largely supplemented by private contributions, particularly in Goalundo. I am glad to observe that the total amount of private contributions to roads and tanks was largely above the sum similarly realized in the preceding year, it having amounted to Rs. 1,100.

12. *Arboriculture.*—The Committee having ceased to lay out any money on this head, attempts were made to encourage private individuals to grow plants on the Committee's road-sides under prescribed rules and conditions. Only one person, however, has agreed to do so during this year.

13. *Tramway.*—There could not be a more important subject for the attention of the Committee than the question of a proposed line of tramway from Rajbaree to Furreedpore. The question had been mooted so far back as 1882, when it was submitted for the consideration of the Lieutenant-Governor by the Furreedpore People's Association. From that time the Committee has been earnestly endeavouring to secure this desired end. Statistics of passengers and traffic were taken in 1883, and the opinion of the Divisional Superintendent of Works obtained in the following year. Definite negotiations with promoters were, however, opened this year, but as they do not legitimately fall within the scope of the year's operations, their details need not be mentioned in this report. It must, however, be stated that, owing to the recession of the river Pudma from Furreedpore to the north, and the utter want of communication with the great marts of the district in the south, the construction of a line of tramway from Rajbaree to Furreedpore with the ultimate view of carrying it up to Bhanga on the river Kumar, offers the only opportunity of opening up the district, and of connecting the head-quarters with the north and south.

14. *Establishments.*—The Committee's establishment worked satisfactorily, and so did also the establishment of the Cess Deputy Collector. Among the District Engineer's staff the Sub-Overseer of Madaripore appears to have worked diligently, examining the works entrusted to him very closely, and making timely suggestions for the proper maintenance of all existing works in his sub-division. The Overseer has also evinced a proper regard for the interest of the Committee by making searching and careful examination into all village works in the Sudder sub-division, and his travelling bills show that he has made use of his time.

From what I have seen of the work of the District Engineer, I am inclined to believe that he has not a good control over his staff, and has not got method enough in his own work. I hope the Divisional Engineer will manage soon to inspect the two metalled railway feeders at Rajbaree and Belgachi stations on which over Rs. 10,000 have just been spent, and also, if possible, the Bhojeswar and Gharishar roads in thanna Palong, where a similar amount has been spent on earthwork alone. I believe none of the above works have yet been inspected by him. I would also suggest that before the end of the current road cess year, he should visit, if possible, the commencement of the road to Bhanga, where we are in the course of spending Rs. 16,000.

15. The thanks of the Committee are due to Baboo Amvika Charan Majumdar, the Vice-Chairman, who, with a large practice as a pleader, has given much time and attention to its affairs, and has displayed both tact and ability in the conduct of his honorary duties.

Copy of paragraph 2 of the Proceedings of a Special Meeting of the District Road Committee of Furreedpore, held on the 26th January 1886.

PARA. 2. Annual accounts of receipts and expenditure, and the report on the administration of the District Road Fund of this district for the cess year 1884-85, were laid before the meeting.

Resolved unanimously—That the accounts be passed, and the Chairman be requested to submit the same to the Commissioner with the usual administration report on the same.

AMBIKA CHURAN MUZUMDAR,

Vice-Chairman.

Notes to accompany the annual accounts for the cess year 1884-85.

(*a*). The fine was remitted and refunded under authority of Commissioner's No. 1056R, dated 14th March 1883, No 141R, dated 6th January 1885, No. 10N, dated 1st April 1885, and No. 63N, dated 15th April 1885.

(*b*) & (*c*). The allotments for the Jessore road bridges and for the bridge over the Morapadma khal could not be spent, as their projects were not sanctioned within the year.

(*d*). The estimate for Rajbari road land compensation was sanctioned by Government No. 296F, dated the 3rd July 1880, received with the Commissioner's endorsement No. 991R, dated 20th July 1880.

(*e*). The estimate for the metalling of the Godarbazar road was sanctioned by Commissioner's No. 525R, dated 30th March 1881.

(*f*). The estimate for the metalling of the Khangunge road was sanctioned by Government No. 3034L.C, dated the 6th October 1882, forwarded by Commissioner's No. 28R, dated the 12th idem.

(*g*). The project for the Haturia road earthwork (incomplete portion) having not been ready and sanctioned within the year, the allotments both for earthwork and land compensation could not be spent.

(*h*) & (*i*). The estimates for earthwork and land compensation of the Belgachi Railway station road were sanctioned by the Commissioner's Nos. 715T, and 389R, dated respectively, the 15th January and 4th June 1885. The allotment for the earthwork could not be spent owing to the delay made in completing the Land Acquisition proceedings. The amount allotted for earthwork, was however, utilized by payment of full amount of the compensation estimate.

(*j*). The work of the Matipara road bridge was taken up in time, but the contractor failed to complete it owing to rains. He is reported to have made repeated attempts though late: hence the expenditure is so small in comparison with the budget allotment and estimate.

(*k*). The estimate for the Baniabohoo road land compensation was sanctioned by Commissioner's No. 888R, dated 10th March 1879.

(*l*). The estimate for the Madaripore road earthwork was sanctioned by Government, Public Works Department letter No 291L.C, dated the 7th February 1885, forwarded with the Commissioner's No. 201R, dated the 2nd March 1885. The allotments for this road could not be spent, as the land was not acquired within the year.

(*m*). The bamboo bridges on the Korukdi road having been constructed from the allotment for repairs, the allotment made for the purpose under the head of original works was not spent.

(*n*). The allotment made for the extension of the Bandarkhola road was found to be too small for the work intended to be executed: hence the work was not taken up.

(*o*). The estimate for the construction of the Gharishar road was sanctioned by the Commissioner's No. 612T, dated the 9th February 1885.

(*p*). The allotment for land compensation of the above road was not required to be spent, as the proprietors gave the land free of cost.

(*q*). The amount allotted for compensation for land required for widening the Fooltala road was not spent, as no claimant came forward within the year to receive payment.

(*r*). The allotments made in the budget for the earthwork and land compensation of the Bhedargunge road were not spent, as it was subsequently determined not to take up any petty and isolated works till the heavy and important works like the Madaripore road already projected have been completed.

(*s*). The estimate for the Road Cess Office building was sanctioned by Government, Public Works Department's No. 1879B. dated the 8th December 1885.

(*t*). The expenditure incurred for survey of the proposed road from Madhukhali to Hamdampore was proposed to be met from the savings of the allotment for village roads in the Sudder sub division.

(*u*). Of Rs. 1,279-9-6, Rs. 700 was met from the contribution realized in cash from the parties concerned, and the balance was paid out of the allotment placed at the disposal of the Chairman of the District Road Committee, for expenditure on village communications when in the interior.

(*v*). This amount was not spent as the verandah in question was not required to be maintained, a separate bungalow having been raised for the accommodation of the re-valuation establishment.

AMBIKA CHURAN MUZUMDAR,
Vice-Chairman.

Dated Burrisal, the 18th January 1886.

From—L. P. SHIRRES, Esq., Vice-Chairman, District Road Cess Committee, Backergunge,

To—The Chairman, District Road Cess Committee, Backergunge.

I HAVE the honour to submit the detailed account of the receipt and expenditure of the District Road Fund for the cess year 1884-85, and to report as follows on the work done and in progress durng the year.

2. The office of Vice-Chairman was held by me throughout the year.

3. The budget estimate of receipt and expenditure for the year under report was approved by the Commissioner by his No. 14T, dated 2nd September 1884, and reviewed by Government in its Resolution No. 4272RC, dated 12th December 1884, received with the Commissioner's No. 129R, dated 22nd idem. Subsequent adjustments were made with sanction.

4. The annual account has been examined and certified to by the Sub-Committee of Audit under section 179 of the Cess Act.

5. The road cess was levied as before at half rates. An attempt was made as in former years to pass the assessment at full rates, but was defeated by a majority of the Committee, which is largely representative of the district landholders

6. The year opened with a net arrear demand of Rs. 28,775, while the net current demand was Rs. 96,434 making a total of Rs. 1,25,209. Of the arrears, Rs. 23,137 net, and of the current demand Rs. 68,338 net, were realised, making a total of Rs. 91,475, and leaving a net unrealised balance of Rs. 33,734. The percentage of collection to demand was 94·6, as compared with 100·9 in the previous year.

7. The actual amount at the disposal of the Committee during the year under report was Rs. 1,29,456, or Rs. 27,177 less than in the preceding year. Of this difference the greater part is due to the previous year having opened with a larger balance. Rupees 22,834, or the geater part of the surplus amount at the disposal of the Committee last year, was expended under the head of original works in giving compensation for lands acquired. Excluding this, the actual amount spent this year on original works was Rs. 36,964 as against Rs. 33,088 last year. The whole amount spent in actual work (original and repairs) this year was Rs. 57,776, as against Rs. 69,495 last year. The difference, Rs. 11,719, represents a difference in work done. This is due partly to the fact that the amount at the disposal of the Committee last year (after paying compensation as above noted) was greater, and partly to increased expenditure under the heads "Provincial rates—establishment and contingencies of office of collection" and "Ferry toll establishment and contingencies."

The increase under the former head is due to an increase in the number of re-valuation processes served, and the increase under the latter head is due to the subsidy given to the Flotilla Steamer Company. To sum up, the Committee spent less money on actual work this year than last, because they had less to spend, and because they spent more on re-valuation work and in subsidising the Flotilla Steamer Company.

8. The money spent on original works was as noted Rs. 36,964, of which about one-third was spent on village works. The remainder was spent in constructing wholly, or in part, 21¼ miles of road and four bridges as follows :—

(1) Gazipore road diversion, ¾ miles completely made.

(2) Second and third sections of Harinafulia road, earthwork and dressing, 7 miles.

(3) Kaligunge road, dressing 11 miles.

(4) Masonry bridge on Dhaniamonia road, completely built.

(5) Morakhola bridge on Gaurnadi road, masonry up to road level.

(6 & 7) Wooden bridges on the Shibpore and Golachipa roads.

9. Of these works, the most important is the Harinafulia road, which, when complete, will open out a part of the district, otherwise difficult of approach from Burrisal, and will connect Burrisal with the Perozepore system of village roads.

10 The most striking point, however, about the expenditure on original works (including village works) is that in the district of Backergunge only the small sum of Rs. 961 is shown as spent on constructing and improving khals. It may, however, be noted that, although no provision was made for a khal when estimating for the Harinafulia road, still of necessity a side cutting was made, which, with an expenditure of a few hundred rupees, will form a bad khal. It has not, I think, been constructed in the best possible manner. It has a depth of 6 feet, a width at bottom of 10 feet, and a side slope of 1 to 1 ; and it is at present impassable in six or seven places, and therefore utterly useless as a khal, while possibly objectionable on sanitary grounds.

11. This unsatisfactory result has an historical explanation. The Committee appear long to have been of opinion that their money was most usefully spent in keeping open the existing natural net work of khals, and when new communication was found necessary, in making khals two feet deep at low water with towing-paths. Such khals usually silt up in one place only, where the tides meet, or at the mouth, and there soft mud, which gradually hardens, is deposited. By removing this silt every four or five years, the Committee believe that khals of this nature could be kept open for a very long time. Of course when an opening exists at the meeting of the tides, such deposit would not take place. Formerly the Committee used to construct khals with roads alongside. That method was, however, found objectionable. Since then the Committee has practically had before it the choice of constructing a road with no provision for a khal, or of constructing a khal five feet deep at low water. This sort of khal is, however, costly. Even when khals have already been made, and the Committee desired to remove the deposits of silt referred to, it has been held that the repairs ought not to be undertaken unless the Committee were prepared to deepen the khal to a depth of five feet at low water. It certainly appears to me that if the Committee be furnished by their professional adviser with the initial cost, the subsequent average annual outlay, and the probable duration of the work as done in each way, it is for the Committee and not for him to decide in which of the two ways they will spend their money. If that were done, the Committee might consider Circular No. 5C, dated 23rd January 1879, paragraph 8, and other remarks on the subject, and if they considered these less applicable to a district where communication is by khal, and not by road, they might candidly give their reasons for thinking so, and those reasons might be examined.

12. Rupees 22,229 allotted for repairs was cut down to Rs. 10,796. All the roads and khals budgeted for are, however, reported to have been kept in repair.

13. The following explanations are necessary to explain the discrepancies between the budget and the actual expenditure :—

Hizla Bridge.—Some materials were supplied, but the foundation could not be laid as it was impossible to take the work in hand before the rains.

Gazipore Road.—Less was spent than estimated, because much land was given without compensation.

Amboula Road, first section.—The project having been returned unapproved, the allotment was withdrawn.

Madhabpasa road extension to Banaripara No. 15, *Suarupkati road No.* 42, *Nowabgunge road No.* 79, *Bhagiratpore road No* 87. *and Sonakhali road No.* 88.—These roads were not surveyed, as village works superseded the necessity for them.

Dadhibhanga khal, No. 113.—The survey of this khal was deferred, as it was being improved by the Branch Road Cess Committee of Perozepore.

Jhabkhali khal, No. 114.—This khal was not surveyed as it has been found to be gradually widening itself.

Barimaghi and Kaligunge Roads.—The Divisional Superintendent of Works considered repairs to these roads, unnecessary ; so no expenditure was incurred.

14. *Village works.*—Rupees 34,275 was set aside for village works throughout the district, and distributed and expended as follows: —

	Original works.		Repairs.	
	Distributed.	Expended	Distributed.	Expended.
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Sudder sub-division... ...	9,500 0 0	8,891 8 0	2,775 0 0	2,563 14 0
Bhola ,, ...	2,000 0 0	1,997 2 6	2,000 0 0	1,523 5 6
Patuakhali ,, ...	4,000 0 0	2,988 12 0	4,000 0 0	3,452 4 0
Perozepore ,, ...	6,890 0 0	6,680 0 0	3,110 0 0	3,035 0 0
Total ...	22,390 0 0	20,557 6 6	11,885 0 0	10,574 7 6

The balances in hand of the Bhola and Perozepore Committees were small in comparison with the expenditures. The balance in hand of the Patuakhali Branch Committee was much greater in proportion. The Chairman of the Branch Committee explains that the great scarcity of labour in his sub-division operates against the timely and regular execution of work, and that hence some of the works undertaken could not be fully executed within the year. The same explanation was given last year. Had the money been made over to zemindars as recommended by the Lieutenant-Governor in his circular No. 32, dated 27th September 1873, there is no doubt that it would have been supplemented, and that it would have been most usefully expended. Nothing has been spent for the Patuakhali tank for the repair of which Rs. 300 was allotted by the Patuakhali Branch Committee. The Chairman explains that the amount was not sufficient to meet the purpose for which the outlay was wanted.

15. The allotments made for the village works in the Sudder sub-division have been nearly all spent. Only two of the original works have not been completed owing to some dispute about land. It is hoped that they will be finished this year.

16. The village works were, as usual, much appreciated by the public. Ninety-one miles of road, and 1⅞ miles of khal were constructed; and repairs were executed to 28 roads and fifteen khals. The large grant to Perozepore was due to the fact that the Committee believed they would get more value for their money through the Branch Committee of that sub-division than by any other agency. This belief has been fully borne out. The most important village work, certainly one of the most important executed in the district during the year, was the improvement of the Dadhibhanga khal, by which Motbaria thana can now be approached from the east, and which shortens the route by which many wood-cutters pass to and from the Sunderbuns. The former approach to the thana from the east was very round about, and has silted up. This work had long been contemplated by the Committee, but when men went to survey it in the latter part of the year, it was found that the work had been undertaken by the Perozepore Branch Committee. The work, such as it was, was completed within the year, and has been of great benefit. The khal will now be deepened to a depth of five feet.

17. The District Committee took an increased interest in their work throughout the year. This result was partly due to friction, but was nevertheless beneficial.

18. The Branch Committees met regularly, except the Bhola Branch Committee, which met only twice, the reason assigned being no work. The Chairman of that Committee has been directed to act strictly according to law in future.

19. The Audit Sub-Committee appointed under section 174 of the Cess Act met regularly throughout the year. The accounts up to 31st March 1885 were also examined by the Examiner of Local Accounts. Only a few discrepancies, since reconciled, were found in the District Engineer's Register of works. All his suggestions were carried out.

20. *Arboriculture.*—As in the previous year, no new trees were planted, though those previously planted were looked after.

21. Communication by steamer between Burrisal and Khulna was kept up throughout the year. The subsidy was discontinued, as it was thought the Company ought now to be able to manage without assistance. It may, however, be found necessary to renew the subsidy. Spirited, but not very successful, attempts were made by native gentlemen to open steamer communication between Burrisal and other parts of the district. One of these, that between Burrisal and Patuakhali, the Committee have proposed to subsidise.

22. A new chur, some miles in length, has formed in the middle of the Ilsha river. This detracts greatly from the utility of the Tengibari and Fenna khals, by which the Committee had formed a direct route to Bhola. These khals would, however, still be useful if kept passable.

23. There appears every probability of the Damoodar river, near Perozepore, being silted up; and if that happen the present route to Khulna will become impassable. The river is maintained by the Circular and Eastern Canals Division, who have been strongly urged to take steps for the proper maintenance of the route. I regret to say that there is an impression amongst members of the Committee that the work will not be undertaken

less traffic should be diverted from the canal route. It is difficult to see why traffic should be so diverted, and it is to be hoped that the impression is groundless.

24. *Establishment.*—The amount spent on establishment was Rs. 39,175, as against Rs. 38,138 last year, which is 34·41 per cent. on the total income, as against 31 per cent. last year. The difference in percentage is due less to difference in actual expenditure, than to the fact that last year there was a larger income. Twenty-five per cent. is the amount allowed by law; but under section 135 of the Cess Act, the Lieutenant-Governor sanctioned 34·94 per cent. for the year under report. This percentage would have been exceeded, but for a technical alteration in the method of keeping accounts (at the suggestion of the Examiner of Local Accounts) by which cost of service of process is shown under suspense account instead of under contingencies. By this means the cost of the collection department has decreased, but the increased expenditure of the re-valuation establishment more than makes up for this. At every inspection it has been said that the revaluation would be completed in two years. The horizon recedes as we advance, and the Committee may reasonably doubt whether this temporary establishment is not a permanent incubus. The Collector has, however, been asked to take steps to reduce the expenditure, and possibly something may be done.

25. *Collection establishment.*—This establishment keeps up two systems of registers, one for use and one prescribed. A mistaken impression prevails in the department that they have to collect statistics and not money; as an example of which may be instanced the fact that the submission of arrear reports of cess is delayed till the quarterly and annual returns have been submitted.

26. *Certificate Department.*—Cess due is realised through this department. Subsequent delay takes place here and in the Nazarat. The first step against the debtor is that the estate is put up for sale eight or nine months after default, and then, in nine cases out of ten the money is paid. The statement in last year's report that the interval was three months is wrong, and I apologize for having made it. Were it not that two of the heaviest debtors pay regularly, and a third nearly so, the result would be much worse. These three pay between them about one-fourth of the whole amount. Steps have been taken by the late Collector which, it is to be hoped, will remedy this state of affairs.

27. *Re-valuation Department.*—The object of this department is to ascertain how much money is due to the Committee, and from whom. The outcome of their labour is the valuation statement. This is, however, compiled directly from the record without the help of the intermediate registers, filling some hundreds of volumes, which are kept nominally for that purpose, and for supervision. These registers are filled up too late to be useful for supervision. The work of this department has been much increased by the method of summary valuation having been given up. It would appear that there are about 750,000 tenures in the district, so the amount of work involved in re-valuation may be vaguely imagined.

28. The Accountant's establishment worked smoothly as in former years.

Copy of Resolution 1 *of the Meeting of the Members of the Backergunge Road Cess Committee, held on the 5th February* 1886.

1. READ the Annual Report and accounts for the cess year 1884-85 submitted by the Vice-Chairman.

The Committee adopt, with one or two modifications, the very clear and able report submitted by the recently transferred Vice-Chairman, Mr. L. P. Shirres, and adopt the accounts as submitted, and direct that the report and accounts be submitted to the Commissioner as provided by law.

H. FASSON,

For Chairman.

Explanatory Memorandum to accompany the Annual Account for the cess year 1884-85.

(*a*). The difference between this and the figures shown in the monthly statement is owing to the fact that Rs. 4-4 on account of refund of talabanah or process fees was shown in the monthly statement through an oversight against head "Refund of cess" instead of against head "Refund of other receipts." The amount has now been shown in the Annual Account under its proper head.

(*b*). For the increase of Rs. 4-4, *see* explanation (*a*).

(*c*). The difference between this and the figures shown in the monthly statement is due to the fact that Rs. 147 incurred by the Branch Road Cess Committee of Perozepore on "Original works" was shown in the monthly account under head "Repairs." The amount has now been transferred in the annual account to its proper head.

(*d*). For the decrease of Rs. 147, *see* explanation (*c*).

L. P. SHIRRES,

Vice-Chairman.

No. 110, dated Mymensingh, the 2nd January 1886.

From—The Chairman, Road Cess Committee, Mymensingh,

To—The Commissioner of the Dacca Division.

UNDER the provisions of section 179 of the Cess Act IX of 1880 (B. C.), and the instructions contained in Bengal Government's Circular No. 973A, dated the 14th September 1880, I have the honour to submit the annual accounts of receipts and expenditure of the Mymensingh District Road Fund for the last cess year 1884-85 in duplicate, duly audited by the Sub-Committee, and passed by the District Committee at their meeting of the 31st December 1885.

2. The Road Cess Act has been in force in this district since October 1875, and this is the tenth report of its working.

* * * * * * * *

3. New members have been appointed during this year in places of some of those whose places were vacated by the expiry of their terms of office. Of the new members appointed, some are from the sub-divisions of Jamalpore and Tangail and other parts which were not represented in the former Committees.

4. The road cess on lands, under section 6 of the Act, has been levied at the maximum rate of one-half anna on each rupee of the annual value ever since the operations of the Cess Act came into force in this district. The receipts during the cess year under report amounted to Rs. 1,55,060 against the estimated demand of Rs. 1,53,433. The arrear at the close of the year was Rs. 10,653 as shown in the annual return of the Road Cess Collection office, submitted in No. 30, dated 13th November last. The closing balance of the cess year amounted to Rs. 67,414-3, which is owing to the savings effected under the different heads of expenditure as indicated in the detailed accounts.

5 The expenditure under "original works" during the cess year amounted to Rs. 73,360-2-9 against the provision of Rs. 99,748. The works done were earthwork, construction of roads, brick bridges, and glazed pipe culverts, building ferry boat and one inspection bungalow. Two feeder roads to the Dacca and Mymensingh State Railway have been constructed, and the water channel of the Bramaputra river passing the town has been much improved this year. It is worthy of notice that the amount of expenditure under original works during the year was nearly double of what was spent during the preceding year. The original works mentioned in the annexed account have been completed with the exception of the following, and these have also been very nearly completed :—

I.—Construction of 10 bridges on the Mymensingh to Suburnocally road.

II.—Extension and improvement of the culverts on the above road.

III.—Planting trees 10 miles of the Mymensingh to Ramgopalpore road.

IV.—Construction of the Jharia to Durgapore road.

V.—Planting trees 10 miles of the Shambhuganj to Durgapore road.

VI.—Improving and widening portions of the above road.

VII.—Constructing four masonry culverts on the Madhupur to Tangail road.

VIII.—Constructing three pucca bridges and pipe culverts on the Mymensingh to Phulbaria road.

6. The amount of expenditure under the head "repairs" during the cess year under report amounted to Rs. 28,680-7 against the sum of Rs. 42,481 provided. I may mention here that though the expenditure under the head during the year has been much curtailed, yet every possible step was taken to put all the existing district roads into a fair and passable order by the necessary repairs and maintenance of the road surface, bridges, jungle cutting, providing ferry boats, inspection bungalows and metalled portion of roads, and by replacing the old rotten timber bridges with glazed pipe culverts.

7. The statement below exhibits the provision made and expenditure incurred by the District and Branch Committees on account of construction and maintenance of the village communications under the category of original and repair works during the year under report, as per detail in the enclosed account—

		Amount allotted.	Amount expended.
		Rs. A. P.	Rs. A. P.
Sudder	sub-division	7,000 0 0	5,700 2 6
Atia	ditto	7,000 0 0	6,702 2 3
Jamalpore	ditto	7,000 0 0	6,036 5 0
Kishoregunj	ditto	7,000 0 0	3,329 9 9
Netrokona	ditto	7,000 0 0	6,040 10 3
	Total ...	35,000 0 0	27,808 13 9

A sum of Rs. 38,000 has been appropriated for expenditure on the village communications of the five sub-divisions during the current cess year, allowing a grant of Rs. 3,000 more than the year under review, for the Atia sub-division, which is the most extensive one in the district.

8. The sum Rs. 2,356-13-6 has been spent for planting fruit-bearing trees (nearly 5,000) on 17 miles of road and maintaining the old trees planted in previous years. Many of the jack-trees planted have borne fruit during the last two seasons. A sufficient grant has also been made for tree-planting in the current cess year's budget.

9. This report is supplementory to the brief narrative of the district road cess operations for the half-year up to March 1885, which was submitted with this office No. 244, dated 22nd April 1885, and it is needless to give a detailed statement of the work to be executed during the current cess year, as the information is given in the revised budget estimate submitted with this office No. 53, dated 4th December 1885.

10. The subjoined table shows the percentage cost of the different establishments (exclusive of contribution towards pay of the Divisional Superintendent of Works and his office establishment) entertained by the District Road Cess Committee during the year under review—

Total income exclusive of previous year's balance.	Total cost of establishment, exclusive of contribution for Divisional Superintendent of Works	Percentage.	Cost of establishment of collection office.	Percentage	Cost of administration establishment.	Percentage.	Cost of works establishment.	Percentage.
Rs.	Rs.		Rs.		Rs.		Rs.	
1,55,060	31,455	20·28	9,746	6·28	4,176	2·69	17,533	11·30

The aggregate expenditure for the establishment was below the limit of one-fourth of the income of the Committee, exclusive of the balance of the previous year, as provided for in the law; and it would have been more so, in case there was no expenditure incurred for the re-valuation work and serving processes of the collection office under the Board's Circular No. 8 of August 1882, for which a sum of Rs. 2,036 and Rs. 2,841 respectively was spent during the year. The different establishments under the Committee have worked satisfactorily.

11. In conclusion, I have to state that the accounts of the District Road Fund for every month of the year have been submitted to the Accountant-General, Bengal, after being audited by the Sub-Committee. The accounts of the Committee for the last two-and-a-half years (from April 1883 to September 1885) have lately been thoroughly examined and audited by Baboo Asutosh Singha, who was deputed by the Examiner of Local Accounts, Bengal.

MOHUMMUD,
For Vice-Chairman, Road Cess Committee.

H. SAVAGE,
For Chairman, Road Cess Committee.

No. 264R., dated Dacca, the 27th February 1886.

From—W. R. LARMINIE, Esq., C.S., Offg Commissioner of the Dacca Division,
To—The Secretary to the Government of Bengal, Public Works Department.

As required by the provisions of section 179 of the Road Cess Act, I have the honour to submit herewith copies of the annual accounts for the cess year 1884-85, together with the reports of the Chairmen of the various Road Cess Committees in the Dacca Division on the administration of the road cess funds in their respective districts.

2. The cess has been levied at the full rates in the Dacca, Furreedpore, and Mymensingh districts, but in the district of Backergunge at only half rates. The collection of the full cess in the last-mentioned district was proposed by the Chairman, who was supported by all the official members of the Committee, but the influence of the zemindars in the Committee was too strong to admit of the Chairman's proposal being carried. There is, I think, no district in Bengal which is more wealthy, or in which a larger expenditure on the improvement of both land and water communications could be better incurred, and it is therefore much to be regretted that the opposition to the Chairman's proposal should have proved successful. When the budget estimate for the current cess year was framed, Mr. Fasson, who had in the meantime succeeded Mr. Dutt as Chairman of the Committee, made a strenuous effort to induce the Committee to levy the full cess; but whilst every reasonable argument was in favour of his motion, the votes of the members representing zemindary interests again proved too strong, and the motion was defeated in favour of an amendment again providing for the levy of the cess at half rates.

3. In the Dacca and Mymensingh districts the amount of cess collected during the year under review was in excess of the estimates, but in the districts of Backergunge and Furreedpore it fell short of them. This result, as regards Furreedpore, was very far from satisfactory. In the Administration Report for the previous year the arrears of cess, which then amounted to Rs. 22,000, were the subject of comment. The arrears now amount to Rs. 28,757, and it is evident from the remarks of the Chairman that the measures adopted have proved inadequate to the collection of the accumulating arrears.

4. The offices of the several Committees appear to have been inspected by the Examiner of Local Accounts, and those of the District Engineers by the Divisional Superintendent of Works.

An inspection of the office of the District Engineer of Backergunge in November last, made by the Divisional Superintendent of Works, brought to light a very extraordinary correspondence between the estimates for the majority of the works, whether original or repairs, which had been executed during the year under review, and the register of works, which represents the payment made. The explanations given were not satisfactory, and the Divisional Superintendent was compelled to conclude that the measurements recorded were not *bonâ fide*; that a proper check over his subordinates had not been kept by the District Engineer; and that there were consequently very good ground for believing that the greater number of the bills, certifying to work, coinciding as they did exactly with the estimates, had been drawn up without actual measurements. This may possibly have been the result of pure laziness on the part of the subordinates unchecked by the District Engineer, but whatever the origin of the system may have been, there is unfortunately little room for doubting that in very many instances a malversation of the road cess fund has been the result. An instance of a somewhat similar kind in which

the bills for a work, with the solitary exception of the final bill, were mere copies of the estimate, had come under the Divisional Superintendent's notice during the previous year, fortunately before the final payment had been made. Further subsequent investigation, which embraced the measurement of the work by the Divisional Superintendent in person, has shown that the bills included charges largely in excess of the work actually executed, and that, excluding the final bill, the payments which had been made included a considerable overcharge for earthwork. The conduct of the District Engineer in respect to these transactions has been under the consideration of the Road Cess Committee.

5. Under the head of Original Works the expenditure in the district of Dacca and Mymensingh was of a very satisfactory character. In the former district the principal outlay was on the road, which has been for some years under construction between Dacca and Goalundo. The Committee have been very properly concentrating their efforts on the completion of this road before attempting the commencement of other new works. In the Mymensingh district the grant was mainly expended on the bridging of the existing roads. The old practice of commencing new roads, either leaving their bridging to be carried out at some future time or at the best erecting wooden bridges, which were very often of a purely temporary character, had been abandoned during the previous year. The Divisional Superintendent had pointed out the great advantages that would result if the Committee were to make an effort to complete the existing lines of road before proceeding with the construction of other new and costly works, and the result of the adoption of his proposal has greatly exceeded his expectations. It is now estimated that, assuming the same policy to be followed up during the cess year 1886-87, all the existing main roads, aggregating 260 miles in length, will be provided with bridges, mostly of a permanent, and all of a safe, description. These, too, will involve a comparatively small annual outlay on repairs. The large increase in cart traffic that has already followed on these roads being made safe for the use of heavy carts is sufficient evidence in itself of the appreciation by the public of the benefits conferred by the bridging of these roads.

6. In the districts of Backergunge and Furreedpore the progress made in original works is not however satisfactory. The total expenditure in the former district under this head amounted only to Rs. 36,964, of which one-third was expended on village works, and it may be reasonably doubted whether the Committee have obtained the full value of their money laid out on these latter, since it would appear that it has expended to a large extent through the agency of the same subordinates whose methods of dealing with contractor's bills have already formed the subject of adverse comment. In the Furreedpore district there was practically a complete failure to carry out the principal works for which provision had been made in the budget estimate. Upwards of Rs. 44,000 were provided for six works, on which the small sum of Rs. 1,380 only was expended. In one case the failure was due to delay in the acquisition of the land, the estimate for which was not submitted until after the close of the working season. In two other instances the estimates had not been prepared and were never submitted. In two other cases the estimates were so inefficiently prepared as to render their return for revision necessary, and these also were not submitted till the working season was past. In the only remaining instance the estimate was also received when it was practically impossible to make any real progress with the work, and this estimate did not receive the immediate sanction of Government. The result, which is very unfortunate, as very much the same thing occurred during the previous cess year, is clearly the consequence of a want of system and foresight. In April last the Divisional Superintendent of Works visited Furreedpore and had a conference with the Chairman (Mr. Samuells), the Vice-Chairman, and the District Engineer, the object of which was to place matters on a more satisfactory footing and to initiate a better policy during the current year. I also visited Furreedpore myself in company with Mr. Johnson in September last, and discussed the matter with Mr. Barrow, who had in the meantime succeeded Mr. Samuells as Chairman of the Committee. Mr. Barrow was most anxious to secure a better administration of the funds at the disposal of the Committee, and it is to be hoped that the present year will be characterized by a marked improvement in the extent of expenditure under this head.

7. In the districts of Dacca, Mymensingh and Furreedpore, roads rather than new waterways, are likely to prove of the greatest use to the public, but the district of Backergunge is very differently situated, and deserves some remark, not only in respect to the character of the country, but also as to the nature of the works already carried out, their practical utility, and the measures which it seems most desirable to adopt for the further improvement of the communications in the district generally.

8. The head-quarters, Perojepore and Patoakhali sub-divisions comprise a tract of country in which all traffic is carried on by boats. Carts are practically unknown, and the broad roads which have been constructed, as well as the Harinafulia road now under construction, have never been, nor are ever likely to be, used for wheeled traffic. A very large saving might consequently have been effected by a reduction in their width and the character of the bridges built, since narrow embanked roads, raised a foot above flood level and provided with wooden foot bridges of a cheap description, would have served all the purposes to which these broad roads have been actually put. Roads of this description, or in short an improved description of village road, are all that are required in that portion of the district which lies to the west of the Megna and Ilsha rivers.

9. On the other hand, the natural water communications are capable of very great improvement. This remark is not intended to apply to the main rivers, but to the khalls

which connect these rivers, and which are consequently subject, as a rule, to the influence of opposing tides advancing from either end of the channels, for which reason the maintenance of these channels is a difficult and expensive matter, and consequently the exercise of considerable judgment and discrimination is required when selecting works of this kind for the purposes of improvement. There has thus arisen a difference of opinion between the Committee and the professional advisers of the Commissioner from time to time, the last-named officers on the one hand frequently condemning schemes submitted to them on the ground that the temporary advantages to be gained did not warrant the expenditure proposed, whilst the Committee on the other hand do not appear to have been satisfied that the disapproval of their proposals was justifiable. An illustration of this divergence of opinion occurred in 1883-84, when the present Divisional Superintendent condemned certain proposals on the ground that the expenditure would prove to be a shear waste of money, the Committee nevertheless resolving to proceed with their execution.

10. In connection with this point it should be also noted that the inability of the Committee to proceed with works of this class on a more extended scale during the year under review was the result of the inaction of the Committee and of their Chairman at the time in not availing themselves of the concessions which the Government of Bengal made in its No. 1391LC, dated 8th August 1884, in reply to a reference made by my predecessor Mr. Alexander, when this difference of opinion between Mr. Johnson and the Committee was brought to his notice. Mr. Johnson met the Chairman shortly after the receipt of the letter quoted and discussed the matter with him, the result of the interview being that, these officers practically concurred as to the procedure that should be followed. It is to be greatly regretted that no further steps were practically taken in the matter for several months, and in the meantime effect could not be given to the orders of Government owing to the absence of any definite proposals or expression of their wishes by the Committee.

11. I cannot leave this subject without the remark that the Divisional Superintendent of Works has for the last two years been persistently urging on the Committee the thorough improvement of certain channels, which would give greatly improved communication between the central portions of the district and the east and west of it respectively. No action was taken by the Committee until in November last. I then visited some of the localities, accompanied by Mr. Johnson, Mr. Fasson, and the District Superintendent of Police, who, as a matter of couse, is well acquainted with the district. The result of this tour was our entire concurrence with Mr Johnson's several proposals, as likely to prove of very great benefit to the district generally, and surveys are now in hand with the view to the preparation of the requisite estimates. A partial improvement of one of the channels embraced in Mr. Johnson's proposals, viz the Dadhibanga khall, appears to have been carried out as a village work by the Perojepore Branch Committee, and incomplete as such work must be, the resulting advantages are highly spoken of in the Vice-Chairman's report.

12. Throughout the island of Dakhin Shabazpore, which forms the main portion of the Bhola sub-division, bridged roads are in great request, surrounded as the island is by rivers not only difficult, but most dangerous to navigate during fully seven months of the year, and with the exception of the khall, which crosses the island between Bhola and Dowlat Khan being possessed of practically no internal lines of water communication, the want of good roads is greatly felt. Thus this part of the district differs entirely from the tracts already noticed. With the view to meeting this demand a fairly complete system of roads has been constructed from time to time, which are however provided at the best with wooden bridges of a very inferior class, or left altogether unbridged. The bridges have decayed and have been for some time past practically useless, whilst the money expended on their construction and annual repair would have gone far towards the permanent bridging of these roads. The Committee having laid out so large an amount on the construction of these roads, have latterly been expressing their unwillingness to incur further expenditure on them on the ground that a continued heavy outlay on one locality is an injustice to the rest of the district. Whilst admitting that there is some force in this view of the matter, it is obviously desirable that these roads should be completed, as in the absence of bridges they remain practically useless for the purpose for which they were constructed, and I am glad to be able to report that a commencement was made last year, and that during the current year the representation made to the Committee have resulted in their allotting grants which will suffice to complete the bridging of about 35 miles of these hitherto incomplete roads. I trust that the Committee will take the earliest available opportunity of completing them altogether, more especially as the extent of bridging required is not great, and as no very large annual grants will again be requisite.

13. On the expenditure under the head of repairs little comment is needed. The budget grants have not in all cases been fully worked up to, but on the other hand the saving effected on the estimates appears to have been the consequence of more effective supervision over the expenditure, resulting in an outlay limited by actual requirements. In the district of Backergunge the large reduction in the estimates was mainly effected at the instance of the Divisional Superintendent of Works.

14. Two short feeder roads were constructed in the district of Mymensingh connecting the railway stations of Kalibazar and Balipara on the Naraingunge-Dacca Mymensingh State Railway with the banks of Brahmapootra. In the district of Dacca an estimate was framed and sanctioned during the year under review, providing for a feeder road to connect the station of Sreepore with Gosingha Hât, which is situated on the banks of the Lukhya

river. No progress was however made with this work, as the Committee declined to expend upon it the larger sum involved in its construction, intimating at the same time their willingness to contribute towards it Rs. 10,000, or half the estimated cost, and to carry it out, provided that the Government of Bengal were willing to contribute the balance. There appears to be considerable doubt whether this road, if constructed, would serve the purpose which it is intended to effect. The station of Sreepore is already connected with the much more important hât of Barmee, about six miles distant by river from Gosinga hât by a portion of the old road between Dacca and TokeChandpore, and the construction of a second and costly feeder road connecting this railway station with the Lukhya river would appear to be questionable in the absence of any material traffic over the existing road. In the district of Furreedpore it was intended to construct a railway feeder to connect the station of Balgachee on the Eastern Bengal State Railway with the important market of Ramdia, which is located on the banks of the Chanda river, but in consequence of difficulties arising in respect to the acquisition of the land it was found impracticable to proceed with the work during the year under review.

15. In the district of Backergunge the steamer of the Central Bengal Flotilla Company continued to ply between Barisal and Khulna throughout the year, but the subsidy which the Road Cess Committee of the district had granted during the previous year was withdrawn, the Committee considering it to be unnecessary to continue it. Several attempts were made by private individuals to open out steam communication between Barisal and other parts of the district, but it is very doubtful whether the enterprising projectors of these schemes and proprietors of the steamers employed will meet with the success which alone would warrant the continued maintenance of the services.

16. Under the head of River Improvements during the year under review a very important, though inexpensive, work was carried out at Mymensingh, which consisted in the training of the river Brahmaputra under its right or southern bank opposite the station, very materially contributing to the convenience and probably to the health of the inhabitants of the town by providing them with fresh running, in place of stagnant, water. At Dacca an attempt was made to improve the channel lying between town and the large chur that has formed in the middle of the river Booriganga, but it is open to very grave doubt whether the spurs which were erected without the advice of the Divisional Superintendent of Works have not failed to effect their object, and whether they have not been the cause of the great changes that have taken place in the condition of the river below the town. The tail of the old chur has been cut away opposite to the cantonments, and for some miles below the cantonments an extensive series of new churs have been thrown up, converting what twelve months since was a comparatively deep channel into shallow water. Surveys are now being made and sections taken which may throw some light on the subject.

17. During the year under review the system of thoroughly renewing metalled roads, mile by mile, as occasion required, which was introduced into the district of Dacca during the previous year, was also brought into force in Mymensingh and continued in operation in Dacca. The previous practice consisted in occasional repairs here and there, the consequence being that the roads were bad throughout. The new system has effected a marked improvement in all the metalled roads in both districts.

18. Under the head of Village Communications the expenditure in every district was considerable. In the districts of Mymensingh and Backergunge the grants were high, and in the former much was done to open out new lines of communication by the demarcation of well aligned tracks, which in course of time will be probably converted into bridged and embanked roads. These tracks were adapted to traffic of every description, and are actually very superior in point of utility to unbridged embanked roads. In the lowlying parts of the district they are of course submerged during the rains, but embanked road devoid of bridges could only be used for foot traffic at the same season, and that only to a limited extent.

19. Complaint is made of the full grant not being expended in parts of Backergunge. The practice here appears to be that village works, to a very large extent, are carried out through the agency of the Committee's establishment, which, as already remarked, does not appear to be altogether trustworthy. There can be little doubt that if the execution of this class of works were entrusted to the zemindars who are principally interested in their construction, the work would be honestly done, and that the grants would frequently be supplemented by contributions from the zemindars themselves. Throughout the division the very limited amount of such contributions is very marked. In the sub-division of Madaripore the decrease is commented on by the Chairman of the Furreedpore Committee, and this falling off is probably the consequence of Mr. Badshah's transfer to Tangail. A great deal undoubtedly rests with the Chairmen of the Branch Committees, and were they to exercise their influence wisely, the applicants for village works would probably contribute much more largely than they now do towards their construction. Such contributions might very frequently be made a condition of the Committees entertaining applications for village works. This practice appears to be in force in the sudder sub-division of Furreedpore, and to work satisfactorily. The liberality of Nawab Ahsanullah in contributing the entire cost of two roads connecting the new Goalundo road in the district of Dacca with Sally Shah's tomb deserves special recognition.

20. The proposal made for the construction of a steam tramway or light railway over the Rajbaree road in the district of Furreedpore, connecting the head-quarters of the district with Rajbaree station of the Eastern Bengal State Railway, has not made

great progress, but negociations have lately been opened which appear likely to result in the construction of the line by a private company under a guarantee by the Committee.

21. The progress made under the head of Arboriculture in the districts of Dacca and Mymensingh was satisfactory. In the districts of Furreedpore and Backergunge, on the other hand, no new trees were planted, but, as noticed in previous reports, the roads in these districts are not adapted for arboriculture.

22. The establishments employed by the Committees appear, with a few exceptions, to have worked well. The District Engineer, Baboo Herembo Nath Das, of Mymensingh, exhibited great zeal and intelligence in carrying out the heavy original works executed during the year, and the District Engineer of Dacca, Baboo Shoshi Bhusan Mitter, is also highly spoken of by the Chairman. I regret to find that complaint is again made of the want of system and control over his subordinates displayed by Mr. Williams, the District Engineer of Furreedpore, more particularly as the failure of the Committee to carry out their budget proposals appears to be largely traceable to these causes. From what I have seen of this officer and his work, I am not inclined to recommend the retention of his services when the Local Self-Government Act is put in force.

23. It is not necessary to make any addition to my previous remarks on the methods that have characterized the conduct of business in the office of Baboo Jagadish Chundra Roy, District Engineer of Backergunge. The Committee will probably be wise if they dispense with this officer's services.

24. The various Chairmen have taken great interest in the administration of the funds at the disposal of these Committees. Mr. Fasson and Mr. Barrow, who took office when the year was well advanced, deserve considerable credit for the efforts made by them to secure better administration in the districts of Backergunge and Furreedpore.

I have to acknowledge the valuable services rendered during the year by the Divisional Superintendent, Mr. J. W. Johnson, who is, I regret to say, about to go on furlough. The care with which he has supervised the work of the Committees, and the tact which he has shown in securing the co-operation both of the Committees and the District Engineers, have greatly conduced to the successful results of the year's operations.

Burdwan Collectorate, the May 1886.

D. N. ADDY, Deputy Collector in charge.

NOTICE is hereby given that the proprietary right of Government to the undermentioned lands, known as Government Lottery Committee lands, situated in the Town of Calcutta, will be put up to sale by public auction at the Calcutta Collectorate at 12 A.M on the 12th July 1886, corresponding with 29th of Assar 1293 B.S.

The purchase will be subject to the following conditions of sale :—

Conditions of Sale.

1st.—The lands to be sold to the highest bidder above the upset price. The purchaser of the lands will be considered as the proprietor of the lands, and the entire proprietary right of Government in such lands will be transferred to him subject to the payment of Government revenue of 3 annas per kottah.

2nd.—The sale to be subject to existing leases.

3rd.—If the amount of purchase-money do not exceed Rs 100 (rupees one hundred), the whole amount to be paid at once

4th.—If the amount of purchase-money exceeds Rs. 100 (rupees one hundred), one-fourth the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or if that be a close holiday, then by the noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the land to be again put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

The following revised advertisement is published in substitution of that which appeared at page 1084, Part II, of the *Calcutta Gazette* of the 9th July 1884 :—

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1885, the terms of subscription and sale will be as follows :—

PART III.

Act of the Bengal Council.

GOVERNMENT OF BENGAL.

LEGISLATIVE DEPARTMENT.

[Second Publication.]

THE following Act, passed by the Lieutenant-Governor of Bengal in Council, received the assent of His Honor on the 14th April 1886, and having received the assent of His Excellency the Governor-General on the 24th May 1886, is hereby published for general information :—

ACT No. I OF 1886.

An Act to further amend the Village Chaukidari Act, 1870.

Preamble.

WHEREAS it is expedient to further amend the Village Chaukidari Act, 1870: It is enacted as follows :—

PRELIMINARY.

Extent.

1. This Act shall be read with, and taken as part of, Bengal Act VI of 1870 as amended by Bengal Act I of 1871.

Commencement.

And it shall come into force in all districts to which Bengal Act VI of 1870 as amended by Bengal Act I of 1871 has been extended from the date on which it may be published in the *Calcutta Gazette* with the assent of the Governor-General.

New section substituted for section 3

2. For section 3 the following shall be substituted :—

Power to appoint panchayàt in villages.

"3. It shall be lawful for the Magistrate of the district, by a writing under his hand, to appoint not less than three nor more than five persons to be a panchayàt in any village containing more than sixty houses, within the district of which he has charge :

"Provided that no such panchayàt shall be appointed in any place to which the Bengal Municipal Act, 1884, has been, or may hereafter be, extended :

"Provided also that no panchayàt shall be appointed in any village until some officer exercising magisterial powers shall, in personal communication with the villagers, have explained to them the duties of a panchayàt, and shall have ascertained on the spot, by any means he thinks best to employ, the persons who, by reason of their local influence, in the opinion of the villagers, or for special reasons to be recorded by such magisterial officer, are most proper to be appointed members of the panchayàt :

"Provided also that in every village to which this Act has already been extended the Magistrate shall, as soon as may be, ascertain, in the manner hereinbefore provided, the persons most proper to be appointed as members of the panchayàt, and shall appoint them accordingly."

New section substituted for section 6.

3. For section 6 the following shall be substituted :—

Succession of member of panchayàt.

"6. Whenever any member of a panchayàt shall die or cease to be a member of such panchayàt, the Magistrate shall, by a writing under his hand, call on the remaining members of the panchayàt to nominate within thirty days a fit and proper person to be appointed as member of the panchayàt in the room of such member so dying or ceasing to be a member and the Magistrate

shall, unless he considers such nomination improper, appoint the person so nominated to be a member of the panchayàt:

"Provided that if no person shall have been so nominated, or if in the opinion of the Magistrate the person nominated is, for reasons to be recorded by him in writing, unfit to be appointed a member of the panchayàt, the Magistrate shall appoint a fit and proper person to be a member of the panchayàt."

Amendment of section 8.

4. In section 8 for the words "fifteen days" shall be substituted the words "thirty days," and for the words "two years," shall be substituted the words "three years."

New section substituted for section 9.

5. For section 9 the following shall be substituted:—

SYSTEM OF THEFTS CARRIED ON IN BENGAL AND ASSAM BY A GANG OF UP-COUNTRY BOATMEN.

No. 4147, dated Fort William, the 22nd April 1886.

From—J. C. VEASEY, Esq., Offg Inspector-General of Police, L.P.,
To—The Chief Secretary to the Government of Bengal.

WITH reference to your No. 752J of 12th February last, and connected correspondence, I have the honour to submit a note on the system of thefts carried on in Bengal and Assam by a gang of boatmen from the North-Western Provinces, and on the steps taken to track out and disperse them.

2. In February 1885, in consequence of a complaint that several maunds of rice and about Rs. 400 in cash had been stolen from boats moored at a place on the Ganges called Choroktola, fifteen miles from Rampore Beaulcah, an up-country boat lying near was searched, when a quantity of property, chiefly jewellery, was found cleverly hidden away in a manner which at once excited suspicion; and information given by members of the crew led to the recovery of other articles secreted on boats which had already started to return up-stream.

3. Further enquiry elicited facts which led to my putting the case in charge of specially selected officers, and it then transpired that the men arrested were members of a gang who had for years past been in the habit

of coming down from Mirzapore, their head-quarters, with cargoes of curry stones, and that, under pretence of selling these, they committed thefts and robberies both by land and water. The gang, who were 60 or 70 strong, and owned at least ten boats, were well organized, having correspondents at Dacca, Mirzapore, and Serajgunge, who disposed of the property stolen, remitted the proceeds, and provided legal assistance and witnesses to respectability for any one unlucky enough to be arrested. The men too changed from boat to boat as occasion required, thus rendering identification extremely difficult. They of course gave false names and addresses, whilst their field of operation was an extensive one, ranging from Bhagulpore to Dacca, and from Dhubri to Serajgunge. Several of them too were old offenders and ex-convicts who, as residents of another province, had escaped surveillance and been lost to sight.

4. I do not propose to go into the details of the different cases which have been established, and it will be sufficient to say here that an investigation lasting over many weeks, and carried on in several districts, resulted in the arrest of 48 men charged in fifteen cases, in which property was taken to the value of Rs 6,000, over half of which has been recovered. Of the men sent up, most of them in more than one case, 38 were convicted and sentenced to various terms of imprisonment.

5. Of these fifteen cases, twelve ended in a conviction, but it is to be regretted that the principal one, in which sixteen men were committed to the Sessions as members of a gang of thieves, broke down, the Judge dissenting from the assessors, who were for a conviction.

6. As evidencing the boldness of the gang, it may be mentioned that, whilst the cases were pending, one of their chief supporters—a man in whose name parcels were registered and money-orders taken out—arrived in Rajshahye from Mirzapore bent on undertaking the defence of his clients, and evidently believing he could not be touched. He was arrested and sentenced to two years' rigorous imprisonment under section 414, Penal Code, for assisting in the disposal of stolen property, and the conviction should have an excellent effect.

7. The publicity attending these proceedings, and the general success which has characterised them, will, it is hoped, have the effect of putting the riverside population and boatmen generally on their guard, and of impressing on the Mirzapore police the necessity for keeping a closer supervision on the movements of the bad characters who have made that district their head-quarters; for it is estimated that in one way and another not less than a hundred and fifty persons, residents of a belt of villages near the town of Mirzapore, were interested in the movements of the gang which has now been, I hope, effectually exposed and broken up.

The 4th June 1886.—The following papers are published for general information.

P. NOLAN,
Offg. Secy. to the Govt. of Bengal.

ESTABLISHMENT OF A VETERINARY SCHOOL IN BENGAL.

No. 391T.—R., dated Darjeeling, the 25th May 1886.

From—P. NOLAN, Esq., Offg. Secy. to the Govt. of Bengal, Revenue Department,
To—The Director of the Agricultural Department, Bengal.

I AM directed to acknowledge the receipt of your letter No. 415, dated 3rd April 1886, submitting a scheme for the establishment and working of a veterinary school in these provinces, at a cost of Rs. 25,000 a year, the sum entered in the current budget. You propose to open the school at Bhagulpore, with an establishment as to the cost of which you give complete details; to add instruction in agriculture and surveying to the veterinary course; to grant stipends of five rupees a month each to 30 students; and to guarantee employment to those who may complete the college course.

2. The Lieutenant-Governor proposes to visit Bhagulpore during the ensuing rainy season, when a final decision can be arrived at as to the suitability of that station as the site of a veterinary school. You state that the barracks and cantonment grounds there, which are no longer required for troops, can be obtained free of cost from the Military and Public Works Departments, and this is immediate advantage of great importance, with reference to the narrow limits of the resources immediately available for building purposes. Bhagulpore is as favourably situated for the purpose as any station in the mofussil, being intermediate between Bengal and Behar, and connected by rail with both. It is, however, understood that it may yet be possible to open the school in the neighbourhood of Calcutta, and any alternative proposals which may be made for adopting that course will be considered with care.

3. The proposals which you make as to the establishment and other expenses of the school have the general approval of the Lieutenant-Governor, and a representation will be made to the Government of India with a view to procuring the necessary sanction to the appointment of the Superintendent.

4. The course of study which you suggest is approved, with the exception of the provision made for teaching agriculture and surveying. From an educational point of view, these subjects are not connected with the veterinary art, the study of which will by itself fully occupy the time of the students. Questions connected with the cure of cattle and the improvement of breeds are natural adjuncts to such an institution as that which it is proposed to found. The Lieutenant-Governor entirely approves of the proposal to give an appointment in connection with the school to a Cirencester scholar, who has undergone a course of veterinary instruction. These gentlemen have been given special inducements to qualify themselves for such posts as it is now proposed to create, and it is a source of disappointment that Government has not been able to do more for them in the way of finding suitable employment.

5. A certain number of scholarships may be given to encourage diligence, but it is hoped that it will not be necessary to attract pupils by offering to give them stipends. On the contrary, it is expected that the scholars will pay moderate fees as a return for the tuition received. The great demand for employment in Bengal fully justifies the charging of fees for any education which leads to remunerative occupation, and there is a better chance of securing a high class of students where instruction is not eleemosynary. This rule would, however, admit of exceptions, and some few stipendiary students might be admitted, as at Seebpore, from among those who had been best at primary and middle schools.

6. The proposal to guarantee employment to a definite number of passed students is accepted by the Lieutenant-Governor. It is expected that the larger zemindars and municipalities will render valuable assistance in this respect, but Government, in opening a new profession, must be prepared to undertake a certain, though limited, responsibility for the future of its pioneers.

No. 415, dated Calcutta, the 3rd April 1886.

From—M. FINUCANE, Esq., Director of the Agricultural Department in Bengal,
To—The Secretary to the Government of Bengal, Revenue Department.

I HAVE the honour to acknowledge the receipt of your letter No. 778—136 Agri., dated 2nd March 1886, directing me to submit proposals for the establishment and future working of a veterinary school in the Lower Provinces, for which you state that a provision of Rs 25,000 has been made in the budget estimate of 1886-87.

2. In reply, I beg to submit in this letter the proposals called for by Government. In order, however, that it may be understood why they have assumed a shape which, it will be observed, is somewhat different from what was originally contemplated, it may, in order to obviate the necessity for reference to previous correspondence, be desirable that I should briefly recapitulate the history of the question.

3. Reports of severe outbreaks of cattle-disease from various parts of these Provinces have for many years back reached the Government of Bengal, and the question of preventing or mitigating these visitations has from time to time received attention. The question was brought into special prominence in 1868-69, when a Commission was appointed by the Supreme Government to enquire generally into Indian cattle plagues and to report on the measures which might be adopted to check their ravages. The Commissioners, in their report submitted in 1871, suggested various precautions to prevent the spread of disease on the appearance of epidemics, but laid particular stress on the need of a skilled agency for the special object of imparting instruction in veterinary science, and training a class of natives for service among the people, whether as Government officers or private practitioners.

4. Arising out of discussions connected with a virulent outbreak of cattle disease in Chota Nagpore in 1873, a proposal was made by the local officers for the establishment of a veterinary class in connection with the Medical College in Calcutta for the purpose of training Sub-Assistant Surgeons and Native Doctors in veterinary practice. The Medical College authorities, having been consulted on the subject, expressed themselves strongly impressed with the necessity for the establishment of a veterinary college, but were opposed to the proposal to mix up medical with veterinary training. Enquiry was made at that time of the Government of India whether there was any prospect of the establishment of a separate veterinary college in Calcutta, and it was ascertained that there was no immediate prospect of any such college being established. Sir George Campbell accordingly allowed the matter to drop.

5. In 1882 Her Majesty's Secretary of State, in his despatch No. 21RW, dated 20th April 1882, called the attention of the Government of India to the subject of the great prevalence of cattle-disease in India and the great loss which it caused, and pointed out that "there is none which deserves the earlier or more careful consideration of the Agricultural Departments then being organised in accordance with the recommendation of the Famine Commission." Lord Hartington desired to be informed, after such reference to Local Governments as might be deemed requisite, what steps had been taken, and what steps it was proposed to take, to give effect to the recommendation of the Commission of 1869.

6. In 1883 His Honor the Lieutenant-Governor, before the receipt from the Government of India of the Secretary of State's despatch, in a resolution dated 22nd January, recorded his opinion that the time had arrived when the question of opening a veterinary school in Calcutta should be taken up and definitely settled. He referred it for enquiry to a Committee of gentlemen named in the margin, to whom the despatch of Her Majesty's Secretary of State was subsequently referred for consideration.

T. Greenhill, M.R.C.V.S.

The report of the Committee was submitted to the Government of India with Mr. Macaulay's letter No. 750, dated 7th April 1883, but the Lieutenant-Governor withheld the expression of his views upon it at that time because, as remarked in Mr. Macaulay's letter, it was his intention to submit proposals for the organisation of a veterinary establishment in connection with the scheme of a Central Board in a somewhat different form to that recommended by the Committee. The scheme for the formation of a Central Board was not, however, adopted and the establishment of a veterinary establishment in connection with it accordingly fell through. But Sir Rivers Thompson desired, at the same time, that the subject should be again taken up in connection with the formation of an Agricultural Department for these Provinces, and the papers were accordingly transferred to me.

7. The Committee appointed in 1883 suggested three plans of different degrees of expensiveness, namely—

(*a*) Where the grounds are bought and all buildings erected,
(*b*) Where grounds are bought and some additional buildings only are raised.
(*c*) Where house and grounds are rented and some additional buildings raised.

In case (*a*) the initial outlay on buildings and land would be Rs. 44,000; in case (*b*) it would be Rs. 41,000; while in case (*c*) the rental would be Rs. 150 to Rs. 200 a month, and the additional buildings and fittings and furnishings would cost Rs. 16,000. In all three cases alike the cost of establishment, keep of cattle, and stipends of 60 students is estimated at Rs. 29,224 per annum.

The estimated cost of the school, as proposed by the Committee, would therefore be—

		Initial outlay for land and buildings.	Establishment.	Total.
		Rs.	Rs.	Rs.
In case (*a*)	... ...	44,000	29,224	73,224
Do. (*b*)	... ...	41,000	29,224	70,224
Do. (*c*)	... ...	16,000	29,224	47,624
	Rent	2,400		

The Committee's proposals were made, it is to be observed, on the assumption that the school was to be established in Calcutta or its neighbourhood.

The least expensive of them would involve an immediate initial outlay of Rs. 18,400 and an annual expenditure of Rs. 29,224. But it was found to be impossible to set aside more than Rs. 25,000 from Provincial funds for the purpose of establishing a veterinary college during the financial year which has just expired, and Sir Rivers Thompson did not deem it right in the present state of the finances to ask the Government of India for a grant-in-aid Nothing could therefore be done last year, nor can any of the three schemes recommended by the Committee be adopted within the coming year, with the sum of Rs. 25,000 which is alone available, if the school is to be opened in Calcutta or its neighbourhood, where the rent of suitable house accommodation and of ground is so high as to be prohibitive.

8. It has, however, been ascertained that the barracks and cantonment grounds at Bhagulpore, which are no longer required for troops, can be obtained free of cost from the Military and Public Works Departments for the purpose of opening a school there. These barracks, for the dismantlement of which orders were about to issue, seem to be admirably suited for the purposes of a veterinary school. The soldiers' lines can be utilised to provide quarters for the students. There is suitable house accommodation for the Superintendent, and there will be no difficulty in providing sheds for the cattle. Thus the initial outlay for land and buildings contemplated by the Committee can be saved. Moreover, Bhagulpore has other advantages over Calcutta as the home of a veterinary school. It is more healthy and it is more central, being situated between Behar and Chota Nagpore on the one side and Bengal on the other, and a school at Bhagulpore is therefore more likely to attract students from all parts of the Province, and they will be exposed to fewer temptations there than in Calcutta or its neighbourhood. For these reasons I would propose that the school be opened at Bhagulpore and not in Calcutta.

9. Assuming that this proposal is accepted, the annual cost of the requisite establishment, feed of cattle, stipends of students, and contingent expenses on the scale (*c*) proposed by the Committee would, as shown in the margin be Rs. 29,224. To this must be added the sum necessary to provide fittings and furnishings, estimated by the Committee at Rs 4,000, thus making in all Rs. 33,224. The amount provided in the sanctioned budget is, however, only Rs. 25,000, thus leaving a deficit of Rs. 8,224. In order to get over this difficulty, I have, in consultation with Dr. MacLeod, the President of the Committee, revised the scale of establishment and of working expenses so as to bring the total cost down to Rs. 25,000. Thus curtailed, Dr. MacLeod and myself would recommend some such scale as the following, the details of which might be modified in consultation with the Superintendent when he is appointed, it being understood that the total cost of the institution to Government shall in no case exceed the sum of Rs. 25,000 per annum :—

10. As to the course of instruction, the subjects to be taught, the number and qualification of students, I would follow generally the recommendations of the Committee with certain modifications, some of which are rendered necessary by the curtailment in the proposed expenditure, and others, it is hoped, will add to the efficiency and usefulness of the school. Among these modifications, one is that I would combine elementary instruction in agriculture, theoretical and practical, and in surveying, with veterinary education. This instruction I would have imparted through the agency of the Assistant Superintendent of the School, who should be a Cirencester graduate. I would also utilise the services of the Superintendent and Assistant Superintendent in making tours in the interior, especially during the recess, wherever severe epidemic may break out, and also in ascertaining what can be done towards introducing new and better breeds of cattle in Government estates, or what existing breeds might be crossed with advantage.

11. Private landowners have often been blamed for having hitherto failed to make any attempt to improve the breed of cattle in Bengal, or to stay the deterioration of existing breeds. But it would seem that it is hardly open to Government or its officers to reproach others for *laches* of this kind, when Government has itself done so little in the vast areas under its own immediate control and management. There prevails, I have been assured in the course of my tours, a strong and general feeling among zemindars, European planters, and other classes, that it is necessary to do something towards the improvement of the breed of cattle in Bengal and Behar. Nobody who has observed the rapid appropriation of village pastures for cultivation, in Behar especially, in recent years, the destruction of old mango groves without plantation of young trees; the miserable condition of the emaciated cattle seen languidly nibbling stunted tufts of grass in the parched lands of that part of the country, during certain months of the year, will be disposed to deny that it is very desirable to do something, if we only knew what to do. The question is, however, one of extreme difficulty. In districts like Durbhunga, Mozufferpore, Saran and Patna, with a population almost entirely agricultural, of nearly 900 to the square mile, hard pressed for the means of subsistence, and with great consequent competition for land, it is almost impossible to check the appropriation of village pastures for cultivation, or the destruction of groves for the provision of timber and fuel. The result is that there is not at present sufficient supply of food for cattle, and the supply of fodder is yearly becoming less and less. The question of adding to the supply of food, which is closely connected with the question of preventing mortality, and is a necessary antecedent to the question of improving the quality of existing stocks, is, however, one of so much difficulty that it cannot be dealt with here, and can scarcely be regarded at best without a feeling of despair. This much may however be said that if anything is to be done in the direction of improving the cattle of these provinces, the first thing necessary is to acquire information as to what breeds can be usefully introduced or crossed with existing breeds. This information is not at present available in Bengal, nor, as far as I know, is there any person in these provinces who is competent to give such advice on the question as might be safely acted upon. An expert, such as the Superintendent of the proposed veterinary school should be, would soon be able to give valuable and trustworthy advice to Government on these questions, and there would not, I conceive, be very great difficulty in acting on such advice, in khas mehals at least, if Government could only feel assured of its soundness. One very obvious way of improving the breed of cattle without any large outlay would be by the distribution of good and suitable bulls on Government estates. When Government as landlord has set an example of improved management of this kind on its own estates, private landlords may be induced to follow its example, and in time it may be that local unions may be persuaded to co-operate in putting a stop to the present practice of allowing weak and diseased sires to roam at large about the country, spreading disease wherever they go, and propagating the puny animals now seen in Bengal. Before, however, anything is done in the way of discouraging the existing practices, it is first necessary that we should be in a position to recommend something better by wayof substitute, and be prepared

to supply suitable bulls, which might be kept in public pounds as public property at the expense of local bodies.

12. With this end in view, it is therefore essential, *firstly*, to know exactly what breeds to recommend; *secondly*, to set a practical example by distributing animals of these breeds on our own estates; and *thirdly*, to be prepared to help private landowners or local bodies with information as to where they can purchase better animals should they desire to do so. If any such action in this direction, as is referred to by the Government of India in their circular No. 122C, dated 5th October 1885, is to be taken, a convenient depôt where bulls might be temporarily kept for distribution could, without difficulty be procured near Bhagulpore, and the aid and advice of an expert like the Superintendent of the Veterinary School, with some knowledge of the cattle breeds of India, would be indispensable.

13. *Subjects of Instruction.*—The second modification which I would suggest in the scheme proposed by the Committee is in the subjects which are to form the course of instruction. To the subjects mentioned in the course prescribed by the Committee in paragraph 11 of their report, abstracted in the margin, I would add agriculture and surveying. The Committee, it will be observed, recommend that the school should be conducted under the management of a Superintendent, who is to be a qualified veterinary surgeon of some standing with a knowledge of the country and language. An army veterinary surgeon was, in their opinion, preferable for many reasons to a man specially brought out from England. The Superintendent should further, in my opinion, have some practical knowledge of the various breeds of cattle in India, and be able to advise and assist Government in the manner described in the preceding paragraph, in any attempts which it may find possible to make for the improvement of the breeds of cattle in Bengal. An officer who is apparently possessed of these attainments can be had in Lieutenant Steel of the Madras Veterinary Department, who has applied for the appointment, and has been strongly recommended by Mr. Hallen.

A—1st Session—	(*a*)	Anatomy and dissection.
	(*b*)	Materia Medica and compounding.
	(*c*)	Hospital attendance.
B—2nd Session -	(*a*)	Anatomy and dissection
	(*b*)	Materia Medica and compounding.
	(*c*)	Pathology.
	(*d*)	Hospital attendance.
C—3rd Session—	(*a*)	Surgical anatomy and operations.
	(*b*)	Compounding.
	(*c*)	Pathology
	(*d*)	Hospital attendance (shoeing and drenching, &c.)

14. The Committee also recommended that the Superintendent should be aided by an Assistant Superintendent of the class of Assistant Surgeon or Assistant Apothecary. It appears to me that one of the Cirencester graduates, who have returned from England, would, for many reasons, be preferable to a medical officer as Assistant Superintendent. The Cirencester graduates have already undergone a course of veterinary instruction at Cirencester, and it is very desirable that they should acquire practical experience in the actual treatment of the cattle-diseases of India so that, they may be able later on to superintend veterinary institutions themselves, if necessary: and also that they may be able to turn their theoretical knowledge to use in Government or other estates in the districts to which they may from time to time be attached. Moreover, by appointing one of the Cirencester graduates to the post of Assistant Superintendent of the veterinary school, we should be in a position, without any extra expenditure, to combine lessons in agriculture and surveying with veterinary instruction, and thus to fit the students when they leave the college, for employment not alone in the capacity of cow doctors, but also as overseers in Government and Wards' estates, for the efficient management of which some such agency is required.

15. The grounds attached to the Bhagulpore barracks are very well suited for the purpose of combining veterinary with agricultural instruction. They consist of a plateau about one hundred and fifty acres in extent, which at present is entirely under grass. A small portion of this area might be converted into an experimental farm, another portion might be utilised for the growth of fodder crops, and the remainder might be kept for pasture. One of the Cirencester graduates being appointed as Assistant Superintendent might, in addition to the duties described in paragraph 11B of the Committee's report, instruct the students in agriculture, and also superintend the working of the experimental farm.

All this will, it is to be remembered, involve no additional outlay, as the land belongs to Government, and the Assistant Superintendent will have to be employed whether he teach agriculture or not.

16. An incidental advantage of this arrangement would be that the students might be trained up to become useful overseers and tehsildars of rent, as well as being cow doctors in Government and Wards' estates, and might at first be guaranteed employment as such, in case they failed to obtain work as private practitioners, or to get employment under zemindars. When the extent of Government and Wards' estates, covering as it does in these provinces an area three times that of all Wales, is borne in mind, it will be seen that there need be no difficulty in providing employment in this way for a large number of passed students on the moderate salaries, ranging from Rs. 15 to Rs. 40 which the Committee proposed in paragraph 20 of their report.

17. *Qualification of students.*—As to the examination and qualifications of students, the Committee (paragraph 14 of their report) expressed the opinion that ability to read and write Bengali should be an indispensable condition of entrance to the school. I would substitute Hindustani for Bengali partly with a view to throwing the institution open to natives of Chota Nagpore and Behar, where the need of veterinary aid is even greater than in Bengal, and partly because it would be impossible, I fear, to secure as Superintendent a Veterinary Surgeon with ability to lecture in Bengali. Moreover, it is much easier for Bengalis to acquire (if indeed they are not ordinarily possessed of) a knowledge of Hindustani sufficient to enable them to understand lectures delivered in that language than it would be for Beharis to learn and understand Bengali.

18. *Number of students.*—The Committee proposed to provide stipends of Rs. 5 a month for 60 students. In view, however, of the difficulty in providing the necessary funds for 60 stipends, it will be sufficient, at first at all events, to provide 30 stipends of that amount. Other students will probably come at their own expense, and some may, I hope, be sent at the expense of zemindars or local bodies.

The reports of Commissioners of Divisions show that private individuals and local bodies have already promised to provide employment for some 15 passed students on their leaving the college; and even were this not so, there ought, as already remarked, to be no difficulty in providing them employment for many years to come in Wards' and Government estates.

19. To summarise, my proposals in modification of those made by the Committee are—

(1) That the school be opened at Bhagulpore.

(2) That the scale of establishment, stipends, and expenditure generally be that given in paragraph 9, subject to modification in details, and to a maximum limit of expenditure of Rs. 25,000 per annum.

(3) That instruction on agriculture and surveying be added to the course of instruction suggested by the Committee, and that attention be also given to the question of breeding and improvement of cattle.

(4) That the number of stipends be reduced from 60, as recommended by the Committee, to 30.

(5) That the holders of these stipends be at first guaranteed employment on completion of their college course, primarily under such private landholder and local bodies as may be willing to employ them, and failing that under Government on estates under its management.

To all these proposals Dr. MacLeod assents.

20. In conclusion, I may be permitted to say that whether we look to the admitted necessity for taking measures for the prevention and cure of cattle-disease, to the equally urgent need for doing something towards the improvement of existing breeds, or to the necessity for training up some kind of intelligent agency for the collection of rents and carrying on the details of management in Government and Wards' estates, the

conclusion suggested is the same, namely, that it is essential that an institution like that now proposed should be opened in these Provinces. Looking to the duty of Government as landlord on the estates under its own management alone, apart from its duty as sovereign, and bearing in mind that these estates extend over an area of more than twelve million acres, it seems to be a reproach to the administration that there is absolutely no sort of trained agency in these Provinces capable of giving intelligent advice or taking intelligent action for the prevention or cure of cattle-disease, for the improvement of the existing wretched breed of cattle, or for executing efficiently any other works of improvement which an intelligent and prudent landlord charged with the management of so vast an estate would certainly undertake in his own interest.

CALCUTTA, *the 8th June* 1886.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 4TH OF JUNE 1886.

At the close of the week ending May 28th a feeble moist wind current was blowing over Bengal, which was giving rather general and in many cases heavy rain. It was stated in the report for that week that this current could not be considered to represent the commencement of the rains in Bengal, and that such was the case has proved to be true. Rain continued to fall over the greater part of the Province for the first two days of the week, but the rainfall was generally of more or less local character, and it was very irregular in its distribution, though in many cases it was heavy. During this period winds decreased in velocity in Bengal and became very light, though strong winds continued to blow in the centre and south of the Bay, showing that another advance of monsoon winds was taking place up the Bay. On Monday, the 31st of May, it became evident that a slight barometric depression had formed in front of the advancing monsoon winds, and on this day the depression was probably off the Akyab coast, and it was giving heavy rain to that station. On Tuesday, the 1st of June, the feeble depression was reaching South Bengal, the centre being between Saugor Island and Chittagong, but the fall of the barometer accompanying it was small, only amounting to about a tenth of an inch. The depression was still giving heavy rain to the stations on the east coast, and Akyab this day reported the excessive amount of 5·69 inches. The depression was accompanied by the usual cyclonic circulation of winds, but at all stations the wind force was small. On Wednesday, the 2nd instant, the feeble depression was still over the head of the Bay, though it had advanced slowly in a northerly direction, and its centre was not far from Burrisal. On Thursday, the 4th, it had again advanced slowly, and it began rapidly to fill up, though it still seemed to exist in a feeble form in Central Bengal, but with its advance an extraordinarily heavy rainfall occurred over parts of South-East Bengal. The rainfall appears to have been heaviest at Chittagong, and at this station from 4 P.M. of the 3rd to 10 A.M. of the 4th, or during only 18 hours, no less than 14·69 inches of rain were recorded. Other stations also received rather heavy rain, but up to the present this is the largest fall recorded. On the following day, Friday, the 5th, the depression had quite filled up and disappeared, though the rather strong monsoon winds which followed in the rear of the depression continued to give heavy rainfall, and thus on the morning of this day at Chittagong a further fall of 5·04 inches of rain was recorded. The winds which accompanied this feeble storm were particularly light, though as stated before in its rear a rather strong monsoon followed, but this did not advance very far inland, and in fact it died away to a great extent shortly after the disappearance of the depression. It is always difficult to say the exact date when the rains break in any part of Bengal on account usually of their gradual incidence, but this burst of rain may probably be taken to represent the first advance of the monsoon over the southern part of South-East Bengal.

Pressure.—During the week has been decidedly below the normal, and the variations from day to day have, to a great extent in the latter half of the week, been dependent on the movement of the depression just described. Compared with the normal, the pressure for the week over the whole province has been 0·048″ in defect. For the previous week pressure was 0·062″ in excess, so there has therefore been a general and rather rapid diminution of pressure during the week under review.

Temperature—Has, for the greater part of the week, and at the majority of stations, been below the normal, and the mean temperature for the whole week for the whole province shows a defect of 1·6°. In the previous week the defect equalled 1·7°, so there has been no practical change in this respect. Again, as in the previous week, the defects are largest in Chutia Nagpur and Orissa, where they are 3·5° and 2·6° respectively.

Rain—Has fallen in all districts during the week, and though in many parts rather local, the general fall has been fully equal to the normal, while at some of the stations in South-East Bengal, as mentioned previously, the rainfall has been exceptionally heavy. The rainfall has been largest in East Bengal, where it averages 3·40 inches, the normal fall for the period being 2·84 inches. This district has therefore received a fall considerably in excess. North Bengal has recorded an average fall of 2·90 inches against the normal 2·51 inches, and has therefore also received an excess fall. North Behar reports 1·31 inches against the normal 0·63 inch, and in this district therefore the fall has been more than twice as large as usual. South-West Bengal has received 1·09 inches, which is only about two-thirds the normal fall of 1·43 inches. Orissa has received 1·30 inches, the normal fall being 1·13 inches, and has thus received practically a normal fall. Finally in South Behar the actual fall has been 0·68 inch, the normal being 0·52 inch, and Chutia Nagpur has received 0·59 inch against 0·75 inch, and both of these districts have therefore received falls about equal to the normal.

As stated previously, some particularly heavy falls of rain have occurred during the week, the heaviest falls generally being reported on the 3rd and 4th. Thus, in addition to those previously recorded on the 3rd instant, Rungamati (Chittagong Hills) reported 6·02 inches, Harishpur (Noakhally district) 6·1 inches, Joydebpur (Dacca district) 4·68 inches, and Cox's Bazar 4·13 inches, and on the 4th instant Noakhally reported 4·44 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 4th of June 1886 :—

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of former years (at the Park-street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0°·5 higher; and, finally, the thermometer, which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards, is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

MEMORANDUM.

THE returns of the principal Municipalities in Bengal for the week ending 22nd May 1886 disclose the following results :—

1. That births and deaths were recorded in these Municipalities at the rates respectively of 15·2 and 20·3 per 1,000 of population as opposed to 16·4 and 22·3 per 1,000 in the preceding week ending 15th May, indicating a reduction in the registration of both events.

2. That these events were returned in the highest proportions from the following Municipalities :—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille.*
Beauleah	42·0	Beauleah	57·8
Serampore	31·4	Comillah	38 6
Bhagulpore	29·0	Puri	33·6
		Gya	32 9
		Bhagulpore	32·6
		Serampore	31·4

3. That in comparison with the results of the preceding week there was a diminution of mortality from bowel-complaints, but no noticeable differences in the casualty rates from the rest of the diseases : *vide* figures given below :—

	Ratio per *mille* during the weeks ending—

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "Age," the ratios under which have been omitted, inasmuch as the census of the Europeans, above alluded to, cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

NARRAKEL ROADSTEAD.

Position of Sunken Wreck.

MR. G. MACKERNESS, Commanding the British India Steam Navigation Company's steamship *Kilwa*, whilst on his voyage from Calcutta to Bombay, *vid* Coast ports, discovered the British barque *Sir Henry Havelock*, which had been burnt on the 1st June 1886, sunk, in a position dangerous to shipping, in the Narrakel roadstead.

The wreck lies in about 5 fathoms, portions of the spars showing just above water sufficient to mark the spot, and he gives the following bearings:—

Narrakel flag-staff	E. by N. ½ N.
Cochin light-house	S. E ½ S.
The Cruz Milagre gap	S. E. by E.

The bearings are magnetic

A buoy painted green has been placed two cables to westward of the wreck.

The Master-Attendant, Narrakel, directs vessels approaching the anchorage at night to bring the light to bear about E. ½ N. in 6 to 7 fathoms, and run in on that bearing and anchor in 4½ to 5 fathoms of water.

COAST OF TENASSERIM.

MERGUI ARCHIPELAGO.

(1) *Shoals in Fells' Passage.*

THE Officer in charge of the Marine Survey of India has reported that a *rock*, with a depth of only 6 feet at low-water, spring tides, lies 1½ miles N. E. by E. ½ E. of the South point of Cantor's Island.

The *rock* or *islet* marked on the latest corrected charts, two miles E. by N. of Bound island, does not exist.

The *Medina Patches* with a depth of 1½ fathoms, lie one mile E. by S. of Bound island, and join the 2½ and 3 fathoms marked to the South Eastward.

Directions.—By keeping the whole of Passage Island open West of Fell's Island, a vessel will pass over the tail of the bank in 3 fathoms at low-water, smooth bottom. The least water in Fell's Passage is 9 feet at low-water between Payee Kyun and the Small islet. The rise of tide at neaps is 12 feet above this.

(2) *Reef South-Eastward of Tavoy Island.*

Also, that information has been received of the existence of a *rocky patch* lying to the South-East of Tavoy Island:—

This reef (*Bowers Reef*) is half a cable in extent, and dries at low-water; it lies 9½ miles S. S. E. ½ E. of Canister Bank (Eastward of Tavoy Island), and 5½ miles N. ¾ E. of Long Island.

The bearings are magnetic—Variation 3° Easterly in 1886.

ARABIA—EAST COAST.

PERSIAN GULF.

(1) *Non-existence of Oribe Shoal.*

THE British Admiralty have given notice, with reference to the reported existence by the master of the British barque *Oribe* in 1878, of a sunken danger lying in latitude 27° 27′ N., longitude 50° 39′E—about midway between Rás-al-Mutaf and Rennie shoal—in the fairway of the Persian Gulf, that, consequent on the unsuccessful search made by H.M.S. *Arab* in 1879 and H.M.S *Reindeer* in January 1886 the *Oribe* shoal has been expunged from the Admiralty Charts.

(2) *Non-existence of reported shoal North-West of Lárak Island.*

Also, that, consequent on an unsuccessful search having been made by H.M.S. *Reindeer* in January 1886 for the shoal on which the British India Steam Navigation Company's steam-ship *Oriental* was stated to have grounded in 1881, and reported as lying on the North-West side of Lárak Island, at the distance of about one mile from the shore, this shoal has been expunged from the Admiralty Charts.

GULF OF CAMBAY.

Particulars of Khúnbandar (Chilkari) Light.

THE following information has been received from the Hydrographer to the British Admiralty concerning the Khúnbandar (now named Chilkari) light, Western side of the head of Gulf of Cambay:—

The light, *fixed white*, is visible between the bearings of about E.¼N., through *West*, and about S. by E. ¾ E.; it is elevated 45 feet above the level of high-water, and should be seen in clear weather from a distance of 12 miles.

The light-house situated about one mile Southward of Chilkari Creek, and half a mile inland from the shore, is a *wooden* structure, *conical* in shape, with *two* small sheds at its base; the whole painted *black*.

Approximate present position on Admiralty Charts—latitude 22° 10′ 15″ N.; longitude 72° 20′ 35″ E.

Note.—From the falling away of the foreshore, the position of this light has of late years been several times altered.

The bearings are magnetic and from seaward.

G. BELLETT,

Inspector of Schools, Rajshahye Circle.

The 4th June 1886.

NOTICE.

ANNADA CHARAN GUPTA, of the Dacca College, has passed in the Honours Division the Matriculation Examination of the London University held in 1886.

CHARLES H. TAWNEY,

Offg. Director of Public Instruction.

DARJEELING, *the 3rd June* 1886.

Educational Prospectus.

THE Calcutta Medical College Session, 1886-87, will commence on the 23rd June next Students who may be desirous of commencing their studies are requested to apply to the Principal between the hours of 11 A.M. and 4 P.M. on or before that date.

2. Ten (10) free presentations will then be awarded. These are given to students according to their relative position in the University, B.A., B L. and F.A. Examinations, preference being given to those who have passed the highest examination.

3. No person shall be enrolled as a matriculated student of the College who has not previously passed the First Arts Examination of the Calcutta University, or some one of the preliminary Arts Examination of the United Kingdom recognised by the British General Medical Council.

4. All matriculated students of the College are required to pay Rs 15 on entrance, Rs. 30 for the summer session on the 23rd June, and Rs 30 for the winter session on 1st November of each year.

5. Students who have failed to pass their final examination, and who, under the regulations of the University, are required to attend a further course of lectures and of hospital practice before being allowed to present themselves again for examination, will pay for such further course an annual fee of Rs. 45 in two instalments of Rs. 30 and Rs. 15, payable at the beginning of the summer and winter sessions respectively.

6. Any matriculated student of the College may, with the permission of the Principal and the Professors of the subject, attend courses of lectures or departments of hospital practice in addition to the full curriculum for the year, and shall be entitled to certificates of attendance at such extra lectures, if the Professor is satisfied that he or she has really studied the subject. The fees payable in advance for such additional courses are the following :—

	Rs.
For a single course of lectures on each subject	40
For six months' attendance in each department of hospital practice	60

7. Any matriculated student who leaves the College before completing his University course, with the object of continuing his studies at a Medical School in Europe, may receive certificates of attendance at lectures on payment of fees at the rate fixed in the foregoing rule. But in calculating the sum to be so paid, the amount of the fees already paid by him as a regular student, or in the case of a free student, the amount which would have been paid by him had he been a paying student shall be deducted.

8. Any person not being a matriculated student of the College, who may be desirous of attending any course of lectures, or any department of hospital practice, may do so with the permission of the Principal and Professor of the subject, on payment, in advance, of fees at the rates fixed in rule 6.

If such student has passed the Entrance Examination of the University, he may receive certificates of attendance at lectures, provided the Professors are satisfied that he has attended the full course of lectures, and has mastered the subjects taught.

A student who has not passed the Entrance Examination will be entitled to no certificates of any kind.

9. College scholarships, prizes, and certificates of honour are open for competition only to matriculated students of the College, Hospital Apprentice and Female Certificate class.

A gold medal and certificates of honour are awarded to the best students in each subject.

Goodeve and Macnamara silver medals are given to 1st-year student in Anatomy and Chemistry.

10. College scholars, who receive less than Rs. 20 per mensem, are not required to pay Rs. 30 per session.

The holders of the Doorga Charan Laha and all other scholarships will be required to pay fees as a matriculated student. These scholars may pay their fees in advance, or have their scholarship money deducted till the full amount is received.

11. Any student holding a Medical College scholarship will be permitted to draw the stipend of the said scholarship at any recognized Medical School in the United Kingdom provided he furnishes from the head of such school a certificate of good conduct and diligent prosecution of his studies.

12. The class assistants of Pathology, Physiology and Comparative Anatomy can be held only by matriculated students of the College.

NOTICE.

STOCK CERTIFICATES.

As it does not appear to be generally known that Government Promissory Notes can be readily converted into Stock Certificates and re-converted into Promissory Notes at the option of the holders, and that Stock Certificate-holders enjoy certain special advantages, the attention of holders of Government Securities is drawn to the following particulars:—

1. Government Promissory Notes can be converted into Stock Certificates and re-converted into Promissory Notes at any time at the option of the holder.

2. The holders of Stock Certificates are not required to present them in person or by agent when the interest becomes due. On application made, interest will be paid to Stock Certificate-holders by warrants on any Government Treasury, which warrants will be sent by post, on the day the interest falls due, to the Stock Certificate-holders direct, or through the Treasury Officer, as they may desire.

3. Stock Certificates are not negotiable by endorsement, and are consequently of no value in the hands of a wrongful holder, and the risks arising from the possession of, or repeated transmission of, negotiable Securities, are thereby avoided.

4. In the event of the loss of a Stock Certificate by theft, fire, &c., a fresh Certificate will issue on satisfactory evidence of loss.

NOTE.—Further particulars can be obtained on reference to the Public Debt Offices, Calcutta, Madras, and Bombay.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

MUNICIPAL AND LOCAL.

NOTIFICATION.

The 3rd June 1886.—It is hereby notified for general information that the Lieutenant-Governor intends, in the exercise of the powers vested in the Local Government by section 351 of Act III (B.C.) of 1884, and on the recommendation of the Commissioners of the Kotechandpore Municipality, made at a meeting, to confirm the following bye-laws which have been framed by the said Commissioners under section 350 of the said Act, unless good reasons be shown to the contrary within one month from the date of the publication of this notification.

Bye-laws.

FOR REGULATING BURNING-GHATS AND BURIAL-GROUNDS.

1. No person when burning or causing to be burnt any corpse, or part of a corpse, in any burning-ground, shall permit the same, or any part thereof, or the clothes and other articles appertaining thereto, to remain at the ghât without being completely reduced to ashes.

The penalty for infringement shall be a fine not exceeding Rs. 20.

2. No person shall remove or sell any clothes or other articles appertaining to a corpse which may have been left at any burial-ground or burning-ghât.

The penalty for infringement shall be a fine not exceeding Rs 50.

3. No person shall carry a corpse, or part of a corpse, through any highway unless it be covered and concealed from view.

The penalty for infringement shall be a fine not exceeding Rs. 10.

4. No person, while conveying any corpse, or part of a corpse, shall, except for the purpose of ordinary relief, deposit it on or near any public highway.

The penalty for infringement shall be a fine not exceeding Rs. 10.

GENERAL-BYE-LAWS.

5. No person shall construct or place over or by the side of any public drain any bridge, platform, building, or structure of any kind, except by and with the written permission of the Commissioners, and in such manner as they shall direct.

The penalty for infringement shall be a fine not exceeding Rs. 50, and the penalty for continued infringement shall be a fine not exceeding Rs. 3 daily.

6. No person shall make a shop over any public drain, or in any way occupy any culvert, bridge, or platform which may have been placed over any public drain without the permission of the Commissioners at a meeting.

The penalty for infringement shall be a fine not exceeding Rs. 50.

7. No person shall perform any office of nature in any public road or place other than such places as may have been appointed by the Commissioners.

The penalty for infringement shall be a fine not exceeding Rs. 10.

DISTRICT ROAD FUND.

NOTIFICATION No. 229.

The 10th June 1886.

THE following accounts and reports of the Road Committees of the districts of Monghyr, Bhagulpore, Purneah, Maldah, and Santhal Pergunnahs for the cess year 1884-85, together with the remarks thereon of the Commissioner of the Bhagulpore Division, are published for general information.

D. B. HORN,
Under-Secretary to the Govt. of Bengal in the P. W. Dept.

No. 105, dated Monghyr, the 25th January 1886.

From—J. E. B. JEFFERY, ESQ., Chairman, District Road Committee, Monghyr,
To—The Commissioner of the Bhagulpore Division.

I HAVE the honour to submit the following report on the administration of Road Cess Act in this district during the past year 1884-85.

* * * * * * * *

Business was transacted in all the meetings held during the year, except one in which there was not a quorum. Mofussil members, as heretofore, were not regular in their attendance. Some of them did not attend any meeting held during the year.

The attendance of the members of the Branch Committees has not been favourably reported on by the Chairman of the Branch Committees. In Jamui only those members who reside at or near the station have attended the meetings. Whereas in the Begusarai sub-division none of the European members have attended any meeting, but as usual they rendered assistance by undertaking the repairs of numerous village roads. Several new members have since been added in the list of members.

The result of collection of the cess was very successful. The actual collections exceeded the receipts anticipated. Nearly whole of the year's demand and a most portion of the previous year's arrears have been realised. Speedy disposal of the certificate cases has rendered the progress of collection satisfactory. The collection amounted to 106 per cent., and the year closed with a small outstanding balance.

All necessary repairs to the existing roads and bridges have been carried out, and the roads maintained in good order.

The following important new works were in progress during the year :—

(1) Bridging Malhepore-Gungta road.
(2) Constructing Munsee-Bucktiarpore road.
(3) Bridging Bucktiarpore-Bulhee road.
(4) Constructing Shekhpura-Burbigha road.
(5) Ditto Khagria-Gogri road.
(6) Ditto causeway on Anjun river, Jamui-Malhepore road.
(7) Ditto ditto, Gungta-Malhepore road.
(8) Ditto Jamui-Batya road.
(9) Ditto Moraghat road.
(10) Metalling a portion of Sultangunge-Belhar road.

Among these works Nos. 1, 6, 7, 9, and 10 have been completed, and others partly finished, and the rest are in progress.

Among the new works which were completed during the year under report, Moraghat road is an useful work. This was undertaken as a relief work, but has now been taken on the regular list of roads.

The next important work which calls for special comment is the completion of the Munsee to Bucktiarpore (Nepal road). This road is now near completion. This is the heaviest (contract work) which the Committee have ever undertaken : it will benefit a vast tract of country hitherto deficient in communications, and which was covered with water in the rains

The other works executed do not require any particular mention, but generally speaking all of them are useful and beneficial works. The construction of the Shekhpura to Burbigha road, which was taken in hand last year, had to be abandoned owing to the zemindars having objected to give up their hand. The road will be maintained as a fair weather road as before. The construction of the two causeways on Anjun river are also noticeable features of the year.

Tree planting has been satisfactorily carried out on the undermentioned roads, which are looked after by the contractors.

Tirhoot road	8,034
Tarapore road	1,810
Patna road	797
Total ...	10,641

The trees are in fair order. The planting on the Ramgarh road, which was also let out in contract, has been a failure. Another contractor has recently been engaged to take up this work. Departmental planting is also going on on several roads. The following is the number of the trees so maintained :—

Jamui	3,404
Shekhpura	950
Sudder	6,638
Beguserai	300
Total ...	11,292

The accounts are monthly examined and audited by a standing Sub-Committee. The office and the accounts was also examined by the Examiner of Local Accounts, Bengal, and his assistant, and his report was favourable.

General remarks.—The state of communication is generally good. All the roads have been thoroughly maintained and kept passable. Liberal grants were made to the Branch Committees, and considerable improvement has been made in village communications. The following grants were made to the Branch Committees :—

	Rs.
Beguserai	9,880
Jamui	6,440

The heavy floods last year caused considerable damages in places, and additional estimates have been framed for repairs both to roads and bridges.

Establishment.—The District Engineer and his subordinates have worked well. The working of the Committee's establishments in other departments has also been satisfactory. The annual accounts accompany.

Passed at a meeting of the Road Cess Committee held on the 29th January 1886.

C. R. MARINDIN, *For Chairman, District Road Committee.*

C. MURRAY, *Major-General, Vice-Chairman, District Road Committee.*

G. THOMAS, T. MISSER, } *Members of the Committee.*

No. 133, dated Bhagulpore, the 23rd January 1886.

From—A. A. WACE, ESQ., C.S., Chairman of the District Road Cess Committee,
To—The Commissioner of the Bhagulpore Division.

I have the honour to submit the District Road Fund Report for the cess year 1884-85.

2. *Original works.*—All that have been provided for in the Budget Estimate under this head were spent except the following, viz:—

	Rs.
Allotment for drain bridges on the 28th mile of road No. 8, Dhaka to Simaltola	1,117
Allotment for inspection bungalow at Assi on road No. 13 ...	450
Ditto for restoring Sapurda and Kissengunge, portion of road No. 20, Lalpur to Mudehpura	7,000

The first work could not be undertaken as the Committee had to meet the whole cost of maintaining the metalling of road No. 1, Bhagulpur to Sonthal Pergunnahs, the

Government grant of Rs. 10,000 which had been allowed in other years having been refused. The second was not done because the land had not been acquired before the rains set in. The third was not sanctioned by Government. This amount was allotted to open Famine relief works which were considered necessary.

3. *Famine relief.*—There was some distress in the district owing to failure of crops and relief works were opened on several roads in the Banka, Soopole and Sudder subdivisions on which a sum of Rs. 5,269, was spent.

4. *Arboriculture.*—This is the sixth year of operations under this head. Up to date from the beginning of the operation, trees planted out and maintained by the District Engineer number 9,060, distributed over four roads. Besides these the Branch Road Committees have maintained trees planted on the sides of five roads in their care. The trees generally are thriving well.

5. *Repairs.*—Repairs have been carried out very satisfactorily. The full allotment for the year under this head has been spent, and the roads have been properly maintained and improved where necessary. The bulk of the roads are now drivable.

6. *To be done next year.*—The project that have been in progress this year will be completed. A portion of bridging of the second section of road No 13 remains incomplete for want of funds. Some petty original works will also be done this year.

7. *Road Cess Act.*—The Road Cess Act has worked satisfactorily. Estimated receipts of Provincial rates "Cess on land" is Rs. 1,31,270, and actual collection under that head for the year including arrears is Rs. 1,32,872-14-6: percentage of collection is 101· per cent.

* * * * * * *

9. A Sub-Committee of the District Road Committee is charged with preparing budget estimates, auditing accounts, accepting tenders for works, &c. It meets once every month.

10. *Village roads and Branch Road Committees.*—The Branch Road Committees have worked well. The aggregate length of roads in their charge is 1,006 miles. Most of them are fourth class or village roads, excepting the Banka, Soopole, and Modehpura Station roads, 13 miles in length. The Branch Committees seem to have made the most of the allotments made to them for the improvement of village communications as will appear from the figures below, viz.:—

	Allotment.	Expenditure.
Banka	3,678	3,659
Mudehpura	4,500	4,497
Soopole	5,500	5,449
Head-quarters	5,554	5,401
Total ...	19,232	19,006

The Banka Branch Road Committee have expended a further sum of Rs. 1,886-10-4 on original works.

11. *Contribution made by private gentlemen.*—Moulvi Abdool Kadir Khan, a member of the District Road Committee, contributed road metal to the amount of Rs. 500 for metalling road No. 65. The zemindar of Shapore gave a quantity of sâl and other timber and bamboos for constructing temporary bridges on the Pipra village roads, and liberality has been shown everywhere in either giving land required for roads without charge, or allowing occupation of it pending settlement of its value.

12. *Establishment.*—There were no changes in the Engineering establishment during the year. The Committee have every reason to be satisfied with the way its officers have worked.

13. *Accounts.*—The post of the Accountant of the District Road Committee and District Engineer's office have been amalgamated, and an Assistant Accountant has been appointed for the District Engineer's office, and thereby some saving has been made in the office establishment. The books and accounts have been kept in excellent order neat and up to date. The office was inspected by the Examiner of Local Fund Accounts twice during the year.

14. Annual accounts for the year under report, is submitted.

From—RAJANI KUMAR DUTTA, Vice-Chairman of the District Road Cess Committee,
To—The Chairman of the District Road Cess Committee.

IN accordance with the directions conveyed in section 179 of Act IX of 1880, I have the honour to submit a copy of the account prepared by me under section 178 for the past cess year 1884-85, examined and audited by a sub-committee consisting of the Vice-Chairman with two members, with the usual report for same.

* * * * * * *

2. The number of members in the Sudder, Kissengunge and Arrareah has become less by one, three and two respectively than was shown last year. The District Superintendent of Police refuses to be a member of the District Road Cess Committee, and never attended at any meeting during the year.

Of the five members in the Kissengunge and Arrareah sub-divisions, one died and four resigned owing to their inability to attend on account of old age. The Chairmen of the Branch Committees have been written to nominate other gentlemen in their places.

3. *Committee office.*—The following additions were made to the road cess building. A pucca godown with corrugated iron roofing has been constructed, and the western verandah of the main building has been paved with Chunar stones.

4. *Special and ordinary meetings.*—There was no special meeting held, but six ordinary meetings held during the year.

5. *Quorum.*—There was no quorum at one of the meetings held at Arrareah and at three in the Kissengunge sub-division.

6. *Interest taken by members in the transaction of the Committee's business.*—Most of the members took great interest in the road cess matters. Many of them gave valuable assistance in carrying out repairs to district and village roads, and five of them in examining and passing monthly accounts.

7. *Sub-Committee.*—There was a Sub-Committee throughout the year, consisting of the following gentlemen:—

Vice-Chairman, Dr. Bicachy, Baboo Gobind Chunder Banerjee, Baboo Bissen Chand, and Mr. E. G. Williams. The last named officer was appointed on 17th July 1885, in place of Mr. W. U. Eddis, the late assistant manager, Raj Durbhunga, who had retired, and the Committee nominated Mr. Williams to be a member of the Sub-Committee for auditing accounts. The accounts were duly scrutinized and passed by them, and the vouchers were cancelled regularly.

8. *Attendance of the members of the Committee.*—The average attendance of members was fair during the year. The Executive Engineer, Bhagulpore Division, failed to attend at any meeting.

9. *The working of the Road Cess Act and the feelings of the people.*—The Road Cess Act has certainly much improved communications in the district. I see great improvement during the 4½ years I have been here in every road.

It was difficult to get about in 1881, and now one can ride or drive everywhere almost.

I think the people appreciate the improvements, and are beginning to recognize the duty the Committee owe them as rate-payers.

10. *Working of the Committee.*—The working of the District Committee was satisfactory during 1884-85. Copies of Branch Committees' reports are herewith enclosed.

11. *State of communications.*—The District Engineer, Mr. Roberts, has very much improved the state of all the district roads during his incumbency. I enclose herewith a copy of the statement showing works done during the year under report, from which it will be seen that all the roads received due attention, and they are most of them in good order. Bridges on many roads are still wanting to complete them, but this cannot be done owing to the limited income of the district, which is barely sufficient to keep up 900 miles of roads in fair order. Rents, and consequently the incidence of road cess, are very low.

12. *Village roads.*—The Deputy Magistrate of Kissengunge spent Rs 553 for purchasing drain pipes for the village roads in the Kissengunge sub-division, and Rs. 300 for the construction of a bridge on the village road at Kaloo Ghât. The existing village roads in both the sub-divisions were repaired. The Arrareah sub-divisional officer could not spend Rs. 45-14-1 out of Rs. 2,000 allotted for Arrareah.

With regard to the sudder sub-division village roads, the important ones were repaired. Many works had to be deferred for want of a village road overseer during 1884-85, and this has been remedied by the appointment of one this year; to be paid from works. Rupees 2,279 remained unspent out of Rs. 5,000 allotted for the sudder sub-division at the end of the cess year. I was unable to get some new village roads constructed in the Dharumpore estate in thana Dhamdaha. This is being now attended to. The total expenditure on village roads was Rs. 8,675, or 11·09 per cent. of the whole cess.

13. *Planting trees.*—From the enclosed statement it will be seen that 4,865 trees were maintained with thin fences repaired, and replacing of those damaged by cattle and cartmen. The trees on village roads in the Arrareah and Kissengunge sub-divisions received due attention, and many new trees were planted and fenced by Mr. Walker on the village road, Surbussa to road No. 24, in the sudder sub-division.

The nursery gardens attached to inspection bungalows and one in the Purneah station were kept up.

14. *Inspection of district works by the Superintending Engineer and Executive Engineer.*—The district works were inspected by T. E. Owen, Esq., Divisional Superintendent, in May 1885.

15. *Inspection of accounts by the Examiner of Local Accounts, Bengal.*—The offices of the District Engineer and Committee were inspected by the Auditor of Local Accounts under Bengal Government's orders, No. 13 of 17th March 1882, in February and August 1885. The result of inspections were satisfactory.

16. *Working of different establishments.*—The working establishment has done well. An overseer, Mr. Francis, had to be discharged for incompetency.

Mr. Roberts, District Engineer, has continued to give satisfaction. He thoroughly understands the nature of the district and its requirements, and has much improved all roads. I think more bridges are required, and especially a bridge over the Little Kosee, which runs two miles west of Purneah, and being unbridged causes great inconvenience to the traffic from west, north-west, and south-west. Now that the railway will be completed, I think Government should grant the Committee some of the unused girders and piles that have been lying on the sides of the Caragolah road to make a bridge over this river, on one of the main railway feeders.

No. 127R., dated Arrareah, the 15th November 1885.

From—BABOO KOMUL NAUTH GHOSH, Chairman, Branch Road Cess Committee, Arrareah,

To—The Chairman, District Road Cess Committee, Purneah.

I HAVE the honour to submit herewith the report on the working of the Branch Road Cess Committee, Arrareah, for the year ending 30th September 1885.

* * * * * * * *

During the year under report Rs. 2,000 was allotted for the repairs of the village roads, maintenance of establishment and contingencies, &c. Out of that sum Rs. 1,954-1-11 was spent, and Rs. 45-14-1 remained unexpended at the end of the cess year.

* * * * * Virtually no new road was constructed during the year. Repairs were done to the existing roads, and in extending and strengthening some of them: parts thereof were newly constructed. The road from Arrareah to Jowkihaut has been much improved by making straight a curved portion of it. The Committee originally proposed to make a road from Kuari to Matiari, but sub-

sequently it was found impracticable to make straight road there on account of low lands, swamps, and rivulets which intervene between the two places. Then the road was carried somewhat in a round-about way from Kuari up to Siktia, and it now remains to be extended from Siktia to Matiary. The road from Purwaha to Saifgunge is an extension of an old road. The fact that the soil in this sub-division is sandy makes it extremely difficult to keep the roads in good order. The cart wheels cut the sandy roads, and the loose sand is blown away by the wind, leaving hollows on the roads.

The roadwork was done under the supervision of the members of the Committee and a respectable mookhtear of this sub-division and the work thus executed was measured by the road sircar.

As the annexed statement will show the operations of the Branch Road Cess Committee, it is needless to recount them here again.

No. 332Ct., dated Camp Chapra, the 15th November 1885.

From—BABOO GOSSAIN DOSS DUTT, Chairman, Branch Road Cess Committee, Kissengunge,

To—The Chairman, District Road Cess Committee, Purneah.

I HAVE the honour to submit herewith the annual return showing the works done by the Branch Committee at Kissengunge during the cess year 1884-85

2. The funds placed at the disposal of the Committee was Rs 4,000, out of which Rs. 853 was spent in original works; Rs. 2,855-9-8 were spent in repairs of the existing village roads; Rs. 280-15-4 were spent for keeping up the working establishment; a sum of Rs. 8-12 was spent in purchasing tools &c.; and Re. 1-11 was paid to Mr. Mackenzie on account of his pension.

3. The Committee has made the best use of Rs. 4,000 placed at their disposal during the year under report in constructing a bridge at Kalu Ghat and repairs to several village roads under their charge, and tried their best to satisfy the people of the whole of the sub-division.

R. G. S. ROBERTS,

District Engineer.

No. 104A., dated Camp Diagun, the 10th February 1886.

From—H. G SHARP, ESQ., Chairman, District Road Committee, Maldah,
To—The Commissioner of the Bhagulpore Division.

I HAVE the honour to submit the Annual Accounts and Administration Report of the Maldah District Road Committee during the cess year 1884-85. The accounts were passed under section 179, Act IX (B.C.) of 1880, at a special meeting of the Committee held on the 2nd instant.

2. Eleven meetings were held during the year. The Chairman presided at ten of these, and Baboo Mahesh Chundra Sen, Vice-Chairman, at one. He was the senior Deputy Magistrate and Deputy Collector. The Vice-Chairman was present at all the meetings except the one which was held on the 7th August 1885. The usual notice was given on every occasion, and no business was transacted except when a quorum was present.

3. The following members of the Committee, of whom Nos. 1, 2, 3, 5, and 6 resided in the town, have taken much interest in the work :—

1. Baboo Mahesh Chundra Sen, Vice Chairman,
2. „ Purna Chundra Singh, Civil Medical Officer,
3. „ Kali Das Chatterjee, Government Pleader,
4. Mr. Herbert Reily, Manager, Chanchal Zemindari,
5. Baboo Kishna Lal Choudhry, private gentleman, and
6. Gosain Mohendro Gir, private gentleman.

The others have done little or nothing at meeting; but 7. Mr. G. Hennessy, 8. Mr. W. R. Rice, 9. Mr. C. B. Walton did some repairs in their respective neighbourhoods. The Committee has sustained a loss in the transfer from the district of Baboo Mahesh Chundra Sen, a careful and experienced officer.

4. The Committee's proceedings were duly recorded in a minute book, and the orders passed have been carried out. * * * * *

5. The monthly accounts of the Road Fund Office were duly examined and audited by a standing Sub-Committee of Finance, consisting of five members, one of whom was the Vice-Chairman.

6. The gross demand of road cess was Rs. 32,747. Of this Rs. 27,443 (inclusive of the amount collected in advance during previous years, but exclusive of the amount collected in advance during the year 1884-85) was collected within the year, leaving an outstanding balance of Rs. 5,335, or 16·2 per cent. on the gross demand This heavy balance was owing partly to Baboo Mahesh Chundra Sen's delay in the disposal of certain certificate cases, but principally to the inability of some of the zemindars to pay the cesses due on the 28th September last, on account of heavy losses caused by the flood, and of the scarcity actually prevalent in the district.

7. *Establishment.*—The working establishment consisted of—

Engineer Establishment.

1 District Engineer.

Subordinate Establishment.

8 Sub-overseers.
1 Clerk.
1 Store-keeper.

The subordinate establishment is reported by the District Engineer to have generally worked well except one of the sub-overseers and the store-keeper.

8. *Relief works in the Barendra, or the half of the district east of the river Mahanundah.*—The relief works in the Barendra, taken up during the year 1883-84, were continued during the year under report to provide employment for such local labourers as needed it, at subsistence rates. The special relief roads—

(1) from Bamungola to Nityanundapur *via* Pakuahaut,
(2) from Gomastapur to Nachole, and
(3) from Pakuahaut to Lalla up to the 7th mile

were completed during the year under these arrangements, except two miles of the road (2) which could not be put in hand because no land had been previouslyacquired for the purpose. Besides these, the jungle on the first six miles of the Bulbulchandi to Nitpur road was cleared as a relief work. The total units relieved during the year by the above-mentioned work numbered 47,142, at a total cost of Rs. 5,893.

9. *Relief works in Dearah tracts.*—Very soon after the stoppage in July of these relief works in the Barendra, where the excellent prospects of the crops induced the labourers to leave the road work, the Ganges suddenly rose abnormally high, and submerged and destroyed the standing *bhadoi* crops on the adjacent dearahs or alluvial tracts in the south-west of the district. A large number of persons was thus unprovided, and to alleviate their distress Government grants, supplemented by donations from the public, aggregating Rs. 7,570, were allotted for giving gratuitous relief, and providing light work in those tracts for people incapable of working on roads. This Committee allotted Rs. 5,000, out of their

poor resources, for opening special relief road works on suitable sites, at rates sanctioned in the Provisional Famine Code. The work was continued during the current cess year, and the units relieved during the year under report numbered 12,747, at a cost of Rs. 2,078.

10. *Flood damages of September* 1885.—Very serious damages were caused by this flood to the district roads. The roads from English Bazar to Nawabgunge, from Inaitpur to Mathurapur, from English Bazar to Manikchuck, from Kansat to Gomastapur, and the first 4 miles of the road from Nawabgunge to Jheelim, were almost wrecked. Though the height of this flood during the year under report was about a foot below the flood of 1879, yet three bridges (one masonry and two of tâl wood) on the Nawabgunge road, and one tâl bridge on the Rajmehal road, were wholly washed away, and the embankments were breached in several places. Large portions of the approaches to several of the bridges were also swept away at both ends. The cost of their restoration will be about Rs 10,000, and as the Committee's resources have been exhausted by the relief work done during the year under report and the preceding year, the restoration of these damages will take some years, unless their income be supplemented by a Government grant.

11. *Length of communications.*—Owing to the yearly addition of new roads, completed under relief operations, to the addition of river communications under Government order No. 2270R.C., and No. 2905R.C., dated 10th July 1883, and 29th August 1883, respectively, and to the completion of new village roads, the aggregate length of the district communications has increased from 572 miles in 1881-82 to 951 miles in the year under report. In consequence of the increase, the number of the working sub-divisions has been raised from three to four, as detailed below—

1. North Maldah.	3. Pakuahât.
2. South Maldah.	4. Chanchal.

In my opinion the aggregate length for a district with this poor income is preposterous *Atticus eximie si cœnat lautus habetur: Si Rutilus, demens.*

We shall always have miles on miles of undriveable and almost useless roads until this state of things can be changed. The officers and the funds are alike unequal to the present charge.

12. There are 92 land and 13 river communications comprised in the total length of 951 miles, and, except 37 miles placed under Messrs. Hennessy, Rice, and Walton, all are under the District Engineer. With the increase of work, the increase of establishment has not been proportionately increased, nor is it possible to get such an increase. The work in the first three sub-divisions is generally done now-a-days by local labour, but in the Chanchal sub-division (lately transferred to the District Engineer) nothing could be done except by imported labour, and by contractors sent from the head-quarters.

ORIGINAL WORKS.

13. *Inspection bungalow at Nawabgunge.*—The original allotment for this work was Rs. 500, which, however, was latterly reduced to Rs. 300 by the Committee at a meeting held on the 15th June. The estimates were submitted to Government, and sanctioned in their letter No. 483T.—C., dated 21st September 1885.

14. *Bamungola to Nityanundapur viâ Pakuahât.*—The construction of this road, about 18 miles in length, through a tract hitherto almost impassable, was sanctioned, at an estimated cost of Rs. 6,887, in your office No. 126P.—W., dated 31st July 1884. About 7 miles of this road had been completed during 1883-84, and the remaining 11 miles were finished during the year under report. The total cost of completing this road has been Rs. 4,810, with a saving of Rs. 2,077 out of the sanctioned estimate.

15. *Gomastapur to Nachole.*—The construction of this road, about 12 miles in length, through a portion of the Barendra hitherto almost impassable, was sanctioned in your office No. 218P.—W., dated 18th September 1885, at an estimated cost of Rs. 7,602. The road was completed during the year, except a portion in the middle of about two miles, for which land has not yet been acquired. The declaration has since been published in the *Calcutta Gazette*, Part I, page 930, dated 7th October 1885, and the remainder will be finished during the current year. Kumar Shoshi Shekhaneshwar Roy, Zemindar of Tahirpur, has contributed Rs. 2,350 in aid of this work.

16. *Arboriculture.*—Three nurseries for young fruit-trees have been laid out in the compounds of the Amirti, Rohonpur, and Parbutipur inspection bungalows. These contained about 1,100 plants, of which about 400 were destroyed by the flood of September last at Rohonpur, but the rest have thrived well during the year.

17. Besides the above, about 500 mangoe seedlings were planted on the 5th and 6th miles of the English Bazar and Nawabgunge road; and the places of trees previously planted on the other miles which had since died were filled up during the year.

REPAIR WORKS.

18. *Mukdompur Street to Ghorapir.*—The total length of this road was 1 mile 25 chains, of which 31 chains were transferred during the year to the English Bazar Municipality, under Government order No. 1636T.—M., dated 8th October 1884. The remaining portion

received a layer of 3″ metal on the injured parts, and remained in fair order up to August last, when the unusual flood did some damage to it, which have since been restored.

19. These roads, situated within the English Bazar Municipality, were transferred to it during the year under Government order No. 1636T.—M. quoted above.

2. Monaskamonah road to Mukdumpur Street.
3. Right embankment of river Mohanunda near the sudder ferry ghat to same embankment near Kulkuli.
4. Rajmehal road to Gour road.
14. Hat Khola to Monaskamonah.
22. Mukdumpur Street to Gour road.

5. Mukdumpur Street to outermost north rampart of Gour.
15. Neimaserai road to English Bazar.

20. About 5 chains of the former and 23 chains of the latter situated within the English Bazar Municipality were transferred to it during the year under the Government order quoted above. The remaining portion of the road under this Department were duly repaired, and the damages caused to the former by the late flood, have since been restored.

21. *Dinagepur to Rajmehal Road.*—The three-spanned timber topped bridge on the 41st mile, and the one-spanned bridge of the same class on the 40th mile, were renewed during the year. The road was also provided with proper side drains from the 51st to the 55th mile near Pandua, and other necessary repairs were executed throughout its entire length.

22. (7) *English Bazar to Amirti Road.*—The road received general repairs throughout its entire length, and was kept in moderate order up to September last, when the flood did damages to it here and there, most of which have since been restored.

23. (8) *English Bazar to Nawabgunge Road.*—The entire road was kept in moderate order up to August last, when the sudden rise of the flood washed away some of the temporary bridges and submerged and cut away its embanked portions here and there. The whole road has since been restored, and the bridges nearly completed.

(The following paragraphs are taken from the District Engineer's report.)

24. (9.) *English Bazar and Makrampur Ghât Road.*—This road was kept in fair order up to August last, when the unusual flood rising suddenly submerged its entire length.

25. (10.) *Godagari to Dinagepur.*—This road received heavy repairs on the portions within this district and the inspection-bungalow at Nachole, with its out-houses, were restored. The intermediate portions belonging to Rajshahye, aggreating about five miles, have got only a timber topped bridge of three spans, but the roadway having not been properly repaired and other broken bridges not having been restored as yet by the said district, this important road is impracticable for through traffic.

26. *Roads Nos.* 11, 12, 13, 16, 23, 24, *and* 25.—These are intermediate local communications near the head-quarters, and have been kept in a driveable order throughout the year.

27. (*No.* 17.) *Nawabgunge and Kasimpur Road.*—This road was duly provided with side drains where wanted to prevent quagmires being formed on the road surface. Besides this, general repairs were done and two spans 12 feet each were added to the tal bridge on the third mile to admit sufficient passages for the spill-water of the Mohanunda.

28. (18.) *Kansat to Gomastapur.*—This road being of the fair-weather class along the greater portion of it was kept driveable up to August last, when having been entirely overtopped by the late flood, it suffered much throughout its entire length. The worst portions of these damages have since been repaired and the road has been made passable.

29. (19) *Sustanitola to Kalia Chuck.*—This road was kept driveable up to August last when the flood of the Ganges overtopping it for miles together caused several breaches, which have since been repaired.

30. *Roads Nos.* 20 *and* 21.—These are fair-weather roads, and were kept driveable from October to July.

31. *Nos.* 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, *and* 36.—All these fair-weather lines of communications were duly repaired, and kept driveable during the entire fair-weather portions of the year.

32. (37.) *Gazole to Ramungola.*—This road was duly alligned and provided with side drains for the first five miles. This has not only improved its appearance and usefulness, but has shortened the distance between Gazole and Kristopore.

33. (39.) *Nawabgunge and Jheelim.*—This road, measuring about ten miles in the Barendra tracts was kept driveable up to August last by general repairs, when the unusual flood submerged its first three-and-half miles. Much damage was done, which has since been thoroughly repaired.

34. (42.) *Mukrampur to Parbutipur Road.*—About six miles of this road was properly alligned and drained off, and the approaches to the tâl bridges raised in previous years completed. The inspection bungalow at Rohonpur, standing on the road, was also kept in very good order throughout the year.

35. (54.) *Inaitpur to Mathurapur Road.*—This road, measuring about four miles in length, has an embanked portion along the first two miles at the extremity of which there is a tâl bridge of 4 spans aggregating waterway 50 feet. The approaches to the bridge were completed in June last, as soon as the District Road Committee sanctioned the allotment necessary for the purpose, and the whole line was kept driveable up to September last, when the flood of the Ganges, rising suddenly, almost entirely washed away the embanked portion.

36. Besides the above, all other district roads being generally of the fair-weather class, were kept driveable during the whole fair weather portion of the year.

37. *New Village Roads.*—The new village roads put in order during the year from "other village road fund" of the budget were three in number, *first*, Ramnagar to Debaloy at Maheshpur, running along the right bank of the Mahanunda, for a distant of about one mile, was duly bunded and turfed during the year; *second*, road from Ramnagar to south of jail, measuring about half a mile, was also put in order during the year; *third*, road from Pakuahât to Lalla taken in hand as a relief measure in the Barendra as detailed in paragraph 41 of this report was completed during the year.

38. *River Communications.*—A big boat of 1,000 maunds tonnage sank several years ago at a most frequented part of the river near the head-quarters. This boat, with several other snags of minor importance, was removed from the riverbed during the year under report, and by this means the river was rendered safe for navigation.

River Mahanunda.

39. Several sunken trees, about 20 in number, which greatly endangered the navigation of the river, were similarly removed.

River Kalindry.

RELIEF WORKS IN BARENDRA.

40. *Original Works.*—These roads, originally taken in hand as relief measures of 1883-84, were also continued as relief works of 1884-85 in Barendra. The details of works on them have been fully dealt with in paragraphs 14 and 15 of this report under the head of original works, and need no recapitulation here. The units relieved on the former were 17,787 in number, at a total cost of Rs. 2,486, and those in the latter number 23,535, at an aggregate cost of Rs. 2,345.

1 Bamongola to Nitayanundopur *via* Pakuahât.
2 Road from Gomastapur to Nacholo.

41. *Repair Works.*—The restoration of this road was another Barendra relief measure of 1883-84, and the works on it, at subsistence rate, were also continued as a relief operation of 1884-85. Five additional miles of the road with proper alignments and side drains were completed during the year under the above process, and the units relieved thereby came up to 4,935 in number at a total cost of Rs. 861 only.

Pakuaha to Lalla.

42. This work, originally proposed as a relief measure of 1883-84, was actually taken in hand during the year 1884-85, when its first six miles were duly aligned and the jungles cleared throughout the length. The earthwork has since been commenced and is in fair progress at present. The units relieved during 1884-85 came to 885 only at a cost of Rs. 201 in total including establishment.

Bulbul Chundi to Nitpur.

RELIEF WORKS IN DEARAH TRACTS.

43. The relief work on this road was taken in hand in August last, when the Gangetic flood rising abnormally high submerged all the Dearah villages, and reduced the people to the verge of starvation by the loss of their then standing *bhadoi* crops. Of the entire length of 34 miles, the only workable portion of the road at the time was the part lying between Gour and Turtipur, a distance of about twelve miles, of which some could not be taken in hand, as the spoil banks were since then full of water. In spite of this difficulty, and the stoppage of communication along this road between the work site and the head-quarters of the district, the work was vigorously carried on, and about ten miles of the old road restored to its former condition. A new diversion for the cutaway portion of the road near Turtipur, measuring a mile in length, was duly completed during the year under report. The total units relieved on this road during the year was 10,983 in number, and the cost incurred thereby, together with that on establishment employed on this work, was Rs. 1,714.

English Bazar and Nawabgunge Road.

44. The workable portion of Nawabgunge road detailed above being found inadequate to provide sufficient work to the sufferers in Dearah, and a portion of Jheelim road between the 4th and 10th miles being much above the reach of flood, was taken in hand in September last as a special relief measure at subsistence rates. The units relieved by this work during the year were 1,764 in number, at a cost of Rs. 364, including cost of the establishment kept on this work. The length of road aligned, side-drained, and completed within that one month was about two miles.

Nawabgunge and Jheelim Road.

Kaliachuck to Sustanitolah.
Ditto to Ghooghoomari Ghât.
Ditto to Mahadipur.
Ditto to Madya.

45. These four roads, though also selected as relief works in thannah Kaliachuck, could not be worked on during the year, as they were almost entirely under the spill water of the Pagla during August and September last.

P. C. SINGH,
Vice-Chairman.

No. 46P.W., dated Dumka, the 14th January 1886.

From—The Officiating Deputy Commissioner, Sonthal Pergunnahs,
To—The Commissioner of the Bhagulpore Division and Sonthal Pergunnahs.

I HAVE the honour to submit my annual report on the operation of the district road works in the Sonthal Pergunnahs for the year ending 30th September last.

2. The Cess Act is not in force in the district. There is no Committee. The Deputy Commissioner exercises all powers vested in it.

3. *Original Works.*—Dismantling three old ricketty timber bridges on the Nunihat and Dumka section of the road No. 1 (Bhagulpore and Suri road), and these replaced by arched bridges wholly built of rubble masonry. Constructing masonry bridges on and metalling the road No. 3 (Dumka to Deoghur). Only about half of this large and important work is done during the year, the rest having been completed before. Improving gradient, 25th mile, road No. 2 (Dumka to Rampur Hât), and metalling bad clayey bits of the road No. 21 (Dumka and Godda). All the above works, except what is noted, were begun and completed in the year.

4. *Repair Works.*—The following roads were repaired during the year, viz.:—

No. 1.—Bhagulpore and Suri road.
No. 2.—Dumka and Rampur Hât road.
No. 3.—Dumka and Deoghur road.
No. 4.—Dumka and Murarui road.
No. 5.—Dumka Station roads.
No. 6.—Pakaur and Hiranpur road.
No. 7.—Deoghur to Railway Station road.
No. 8.—Rajmehal to Taljhari road.
No. 9.—Rajmehal Station road.
No. 10.—Jamtara Station road.
No. 10*a*.—Horindanga to Dhulian road.
No. 11.—Bahawa to Burhait road.
No. 12.—Deoghur to Saruth road.
No. 13.—Deoghur village roads.
No. 14.—Madhupur to Pathrol road.
No. 15.—Godda to Punjwara road.
No. 16.—Godda to Pirpointi road.
No. 17.—Rajmehal to Protabpur road (section between Teenpahar and Boarijar.)
No. 18.—Sahibgunj to Burhait road.
No. 20.—Dumka to Jamtara road.
No. 21.—Dumka to Godda road.
No. 22.—Benagoria village roads.
No. 23.—Hansdiha to Godda road.
No. 25.—Bahawa to Udhuanala road.
No. 26.—Jamtara to Shahana road.
No. 27.—Karon to Karmatar road.
No. 28.—Village chord Rampur Hat road.
No. 29.—Hiranpur to Bejaypur road.
No. 30.—Simra to Boarjar road.
No. 31.—Rajmehal to Udhuanala road.

The village roads in the district are included in the list above. They are Nos. 13, 22, and 28. Road No. 19 (76th mile, Bhagulpore and Suri road to Kumirabad) is maintained by the zemindar.

5. Staging and inspection bungalows were all repaired during the year, and are in fair habitable order.

6. Arboriculture received as usual adequate attention. Nearly 3,000 young mangoe plants have been put down on the roadsides during last rains—these at 200 per mile = 15 miles of tree-planting during the season. Special care was taken to provide strong and durable fences. The large number of trees planted previously were carefully tended during the year and are doing well. Most of the nurseries are well stocked with seedlings and young plants.

7. The work establishment consisted of a District Engineer, one overseer, and one sub-overseer, and the office staff of one Accountant and one clerk. The District Engineer performed his work with the same intelligence and care he has always displayed, and the general condition of the district roads reflects the greatest credit on him. The overseer is one of the best I have ever seen, an intelligent worker, and very trustworthy, which is more than I can say for the sub-overseer, whose division is a disgrace to him. The office establishment worked well and gave satisfaction.

No. 114PW—T, dated Bhagulpore, the 11th March 1886.

From—N. S. ALEXANDER, ESQ., Commissioner of the Bhagulpore Division,
To—The Secretary to the Government of Bengal, Public Works Department.

I HAVE the honour to submit the annual accounts and reports of road cess operations of the five districts of this division for the cess year ending 30th September 1885.

The following were not received until—

Bhagulpore	...	...	27th January 1886.
Monghyr	...	...	1st February „
Maldah	...	...	15th „ „

much later than they should have been.

Collection.—The collections were satisfactory in the Monghyr, Bhagulpore, and Purneah districts. In the Maldah district there are considerable arrears. The Chairman explains the reason of this. Below I give an abstract of percentage of collection—

Monghyr	...	106	Purneah	...	99·5
Bhagulpore	...	101	Maldah	...	83·8

Committees.—The attendance of members of Committees was fairly good, excluding the districts of Monghyr and Maldah, where some members did not attend at all. In those districts also the number of meetings held was small. The names of those who have not attended any meetings should be struck off.

The working of the Committee generally is reported as satisfactory.

Communications.—Much has been done to open out new raised and bridged roads in the Monghyr district. In Bhagulpore and Purneah original works have been chiefly confined to bridging or raising existing roads. In the Monghyr and Bhagulpore districts most of the roads are traversible all the year round; this used not to be the case formerly; in Purneah also the roads are much improved, though, in the case of some, the sandy nature of the soil causes the surface to be much broken up when there is heavy traffic during the dry season. For this there is no remedy but metalling, which is so expensive in this district that the ordinary income will not permit of its use. Some fair weather roads have been opened out in the Barind, in the east of the Maldah district. The roads in the west of the district have not this year been properly attended to. It is not understood why these roads have been taken out of the charge of Mr. Reilly, the Manager of the Chanchal Estate, who had for years past kept them in good order.

I am not personally in a position to give any great information on the subject under report, but this is amply supplied by the various district reports.

I append an abstract showing the expenditure under different heads.

Burdwan Collectorate, the May 1886.

D. N. ADDY, Deputy Collector in charge.

NOTICE is hereby given that the proprietary right of Government to the undermentioned lands, known as Government Lottery Committee lands, situated in the Town of Calcutta, will be put up to sale by public auction at the Calcutta Collectorate at 12 A.M. on the 12th July 1886, corresponding with 29th of Assar 1293 B.S.

The purchase will be subject to the following conditions of sale :—

Conditions of Sale.

1*st*.—The lands to be sold to the highest bidder above the upset price. The purchaser of the lands will be considered as the proprietor of the lands, and the entire proprietary right of Government in such lands will be transferred to him subject to the payment of Government revenue of 3 annas per kottah.

2*nd*.—The sale to be subject to existing leases.

3*rd*.—If the amount of purchase-money do not exceed Rs. 100 (rupees one hundred), the whole amount to be paid at once.

4*th*.—If the amount of purchase-money exceeds Rs. 100 (rupees one hundred), one-fourth the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or if that be a close holiday, then by the noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the land to be again put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

PART III.

Act of the Bengal Council.

GOVERNMENT OF BENGAL.

LEGISLATIVE DEPARTMENT.

[Third Publication.]

THE following Act, passed by the Lieutenant-Governor of Bengal in Council, received the assent of His Honor on the 14th April 1886, and having received the assent of His Excellency the Governor-General on the 24th May 1886, is hereby published for general information :—

ACT No. I OF 1886.

An Act to further amend the Village Chaukidari Act, 1870.

Preamble.

WHEREAS it is expedient to further amend the Village Chaukidari Act, 1870: It is enacted as follows :—

PRELIMINARY.

Extent.

1. This Act shall be read with, and taken as part of, Bengal Act VI of 1870 as amended by Bengal Act I of 1871.

Commencement.

And it shall come into force in all districts to which Bengal Act VI of 1870 as amended by Bengal Act I of 1871 has been extended from the date on which it may be published in the *Calcutta Gazette* with the assent of the Governor-General.

New section substituted for section 3.

2. For section 3 the following shall be substituted :—

Power to appoint panchayàt in villages.

"3. It shall be lawful for the Magistrate of the district, by a writing under his hand, to appoint not less than three nor more than five persons to be a panchayàt in any village containing more than sixty houses, within the district of which he has charge:

"Provided that no such panchayàt shall be appointed in any place to which the Bengal Municipal Act, 1884, has been, or may hereafter be, extended:

"Provided also that no panchayàt shall be appointed in any village until some officer exercising magisterial powers shall, in personal communication with the villagers, have explained to them the duties of a panchayàt, and shall have ascertained on the spot, by any means he thinks best to employ, the persons who, by reason of their local influence, in the opinion of the villagers, or for special reasons to be recorded by such magisterial officer, are most proper to be appointed members of the panchayàt:

"Provided also that in every village to which this Act has already been extended the Magistrate shall, as soon as may be, ascertain, in the manner hereinbefore provided, the persons most proper to be appointed as members of the panchayàt, and shall appoint them accordingly."

New section substituted for section 6.

3. For section 6 the following shall be substituted :—

Succession of member of panchayàt.

"6. Whenever any member of a panchayàt shall die or cease to be a member of such panchayàt, the Magistrate shall, by a writing under his hand, call on the remaining members of the panchayàt to nominate within thirty days a fit and proper person to be appointed as member of the panchayàt in the room of such member so dying or ceasing to be a member and the Magistrate

shall, unless he considers such nomination improper, appoint the person so nominated to be a member of the panchayàt:

"Provided that if no person shall have been so nominated, or if in the opinion of the Magistrate the person nominated is, for reasons to be recorded by him in writing, unfit to be appointed a member of the panchayàt, the Magistrate shall appoint a fit and proper person to be a member of the panchayàt."

Amendment of section 8.

4. In section 8 for the words "fifteen days" shall be substituted the words "thirty days," and for the words "two years," shall be substituted the words "three years."

New section substituted for section 9.

5. For section 9 the following shall be substituted:—

"9. Every member of a panchayàt appointed under section three shall be appointed for the term of three years. Every member of a panchayàt appointed under section six shall be appointed only for a term equal to the unexpired portion of the term for which the member whom he succeeds was appointed."

Period for which panchayàt to be appointed.

New sections to follow section 9.

6. After section 9 the following shall be inserted:—

"9A. No member of a panchayàt, after the expiry of his term of office, shall be again appointed a member of a panchayàt, without his consent, till after the lapse of three years.

Exemption from serving on panchayàt.

"9B. On the expiry of the term for which the members of a panchayàt were appointed, the Magistrate shall appoint a new panchayàt in the manner prescribed in section three, the outgoing panchayàt continuing to exercise all the functions of a panchayàt until such new panchayàt has been appointed."

Appointment of fresh panchayàt.

Amendment of section 22.

7. In section 22, for the words "six per cent." shall be substituted the words "ten per cent."

Amendment of section 39.

8. To section 39 the following shall be added:—

"8*th*—He shall assist the collecting member of the panchayàt in collecting the chaukidari assessment."

Amendment of section 41.

9. In section 41 after the words "such member shall himself report the same" and before the words "to such officer" shall be inserted the following:—

"or cause the same to be reported."

New section substituted for section 43.

10. For section 43 the following shall be substituted:—

"43. Every chaukidar shall receive, quarter by quarter, the full amount of his salary from such officer or person as the Magistrate shall appoint."

Mode of paying chaukidars.

New section substituted for section 44.

11. For section 44 the following shall be substituted:—

"44. Within thirty days after the end of each quarter, every panchayat shall pay or remit to such officer or person as the Magistrate may appoint under the last foregoing section a sum equal to the pay of the chaukidar for the quarter, or any smaller amount which may stand to the credit of the Chaukidari Fund of the village."

Panchayàt to pay or remit quarterly amounts for payment of chaukidars, &c.

Amendment of section 45.

12. In section 45 for the words "shall issue his warrant" shall be substituted the words "may issue his warrant," and at the end of the section the following shall be added:—

"An application for the appointment of a tehsildar under section 46A shall not of itself be deemed a sufficient step to realize from defaulters the arrears due from them."

New sections to follow section 46.

13. After section 46 the following shall be inserted:—

"46A. The Magistrate may at any time, on the application of the panchayàt of any village, appoint a tehsildar in such village to assist the collecting member of such panchayàt, and such tehsildar shall exercise all the powers vested in the panchayàt for the collection of the chaukidari assessment, and the Magistrate shall, on a like application, revoke such appointment.

Appointment of tehsildar at request of panchayàt.

"46B. Every tehsildar appointed under the last foregoing section shall be remunerated at such rate and in such manner as the Magistrate may, from time to time, with the sanction of the Commissioner of the Division prescribe; and such remuneration shall be levied from those who have failed to pay their chaukidari assessments in the same manner and in the same proportion as the chaukidari assessment:

Remuneration of tehsildar.

"Provided that one tehsildar may, in the discretion of the Magistrate, be appointed for more than one village."

GORDON LEITH,

Offg. Asst. Secy. to the Govt. of Bengal,
Legislative Department.

[Second Publication.]

THE following Act, passed by the Lieutenant-Governor of Bengal in Council, received the assent of His Honour on the 29th March 1886, and having received the assent of His Excellency the Governor-General on the 28th May 1886, is hereby published for general information :—

ACT No. II OF 1886.

An Act to amend Act II (B.C.) of 1866, and the Calcutta Police Act, 1866.

Preamble.

WHEREAS it is expedient to amend Bengal Act II of 1866 and the Calcutta Police Act, 1866: It is enacted as follows :—

Commencement of Act.

1. This Act shall come into force from the date on which it may be published in the *Calcutta Gazette* with the assent of the Governor-General.

New section substituted for section 41, Act II (B.C.) of 1866, and section 68, Act IV (B.C.) of 1866.

2. For section 41 of Bengal Act II of 1866, and for section 68 of the Calcutta Police Act, 1866, the following shall be substituted :—

Penalty for drunkenness, or riotous or indecent behaviour, in public.

"Whoever is found drunk and is incapable of taking care of himself, or is guilty of any riotous or indecent behaviour, in any public street or thoroughfare, or in any place of public amusement or resort, shall be liable, on summary conviction before a Magistrate, to a fine not exceeding twenty rupees, or to imprisonment, with or without hard labour, for a term not exceeding eight days."

New section to follow section 68 of Act IV (B.C.) of 1866.

3. After section 68 of the said Calcutta Police Act the following shall be added :—

Penalty for committing a nuisance in streets.

"68A. Whoever wilfully and indecently exposes his person, or commits a nuisance, by easing himself in, or by the side of, or near to, any public street or thoroughfare or place, shall be liable, on summary conviction before a Magistrate, to a fine not exceeding ten rupees, or in default thereof, to imprisonment, with or without hard labour, for a term not exceeding three days."

Amendment of section 72 of Act IV (B.C.) of 1866.

4. After section 72 of the said Calcutta Police Act the following words shall be added :—

"if the name and address of such person be unknown to such police officer, and cannot be ascertained by him then and there."

EXHIBITION OF SILK COCOONS AT RAMPORE BEAULEAH.

No. 41Mct., dated Darjeeling, the 26th April 1886.

From—LORD H. ULICK BROWNE, Commissioner of the Rajshahye Division,
To—The Secretary to the Government of Bengal, Revenue Department.

REFERRING to Government letter No. 621—110, Agriculture, dated the 18th February 1886, and the previous correspondence, I have the honour to enclose a copy of a letter No. 2155J, dated 26th February 1886, from the Magistrate of Rajshahye, reporting on the exhibition of silk cocoons held at Rampore Beauleah in January last.

2. Every effort was made to secure the ends in view, and I trust that the exhibition has done good.

No. 2155J., dated Beauleah, the 20—22nd February 1886.

From—E. H. RUDDOCK, ESQ., Magistrate of Rajshahye,
To—The Commissioner of the Rajshahye Division.

I HAVE the honour to submit a report on the exhibition of silk cocoons held at Rampore Beauleah in compliance with the Bengal Government No. 464T.F. (Agriculture), dated the 28th April 1885, to your address, a copy of which was received with your No. 104Mct., dated the 13th May 1885.

On receipt of the letter cited above, a Committee was formed consisting of the following gentlemen :—

E. H. Ruddock, Esq., C.S.	*Chairman.*
H J. Abbot, Esq.	*Members.*
E. Gallois, Esq.	
Dr. L. Cameron	
W. G. Morey, Esq.	
Kumar Sashi Shikhareshwar Roy	
Baboo Mohendra Nath Bhattacharjea ...	
„ Raj Kumar Sarkar	
Moulvi Khan Ali Khan	
Baboo Rajendra Nath Ghose	*Member and Secretary.*

The Committee held several meetings and decided to hold the exhibition in one of the godowns in the Borokootee compound on Monday, the 11th January 1886, and the five following days. One thousand copies of the prospectus of the exhibition, setting forth the principal rules and the number and value of the prizes to be awarded, were printed and extensively circulated in this and the neighbouring silk-producing districts. A subscription list was opened, and the Collectors of Moorshedabad, Beerbhoom, Maldah and Nuddea were requested to form sub-committees in their districts, to collect subscriptions, to circulate the prospectus, and to help generally in inducing exhibitors to come forward.

The following subscriptions were realised :—

	Rs.
Messrs. R Watson and Company	250
Maharani Surnomoyi	200
Kumar Shashi Shikhareshwar Roy	200
Messrs. L. Payeen and Company	100
Maharani Sarat Sundari	100
Kumar Jogendra Nath Roy	100
Raja Hara Nath Roy	100
Smaller subscriptions	498
Total ...	1,548
Government grant (already received) ...	1,295
Grand Total ...	2,843

Government engaged to give a grant equal to the amounts raised by subscriptions up to Rs. 2,000, and the amount over Rs. 1,295 was collected subsequently.

The Committee offered the following prizes to the exhibitors :—

		Rs.
2	Prizes at Rs. 75 each	150
4	„ „ 50 „	200
8	„ „ 30 „	240
16	„ „ 20 „	320
20	„ „ 16 „	320

It was also decided to award a prize of Rs. 50 for the best Bengali essay on the method of rearing silk cocoons, and advertisements were inserted in the *Hindu Ranjika*, the *Hindu Patriot*, and the *Bangabasi* announcing this prize. Later on hand bills were printed and stuck up in the market-places and other conspicuous parts of silk-producing villages, to remind the people of the forthcoming exhibition, and Messrs. Morey and Gallois and other influential gentlemen were requested to explain the object of the exhibition to their ryots through mandals and headmen of villages. The Committee also invited Mr. A. C. Sen, Assistant to the Director of Agriculture, to attend the exhibition; but unfortunately he could not come owing to pressure of business. *Machans* in three tiers were provided for the reception of exhibits.

The exhibition was opened on the 11th January 1886, at noon, by Lord H. Ulick Browne, Commissioner of the Division, in the presence of several gentlemen, European and native, a few European ladies, and a large number of the exhibitors. In the course of the week the prize essay was read and explained to the exhibitors, and they were addressed in Bengali by two gentlemen—one of whom was Baboo Roma Nath Sen, the author of the prize essay, and a gentleman of 20 years' experience in silk business. The exhibitors had also an opportunity of seeing how silk was reeled off by machinery in the filature of Messrs. Watson and Company.

The number of exhibits was as under—

	No of exhibits.

Messrs. Morey and Gallois, assisted by Baboo Roma Nath Sen, decided who were the prize-winners. I regret to observe that, as in Moorshedabad last year, some dishonest persons attempted to palm off as theirs cocoons reared by others; but the judges took care to see that such unscrupulous exhibitors got no prizes. The exhibition was closed on the 16th January 1886, when I distributed the prizes and addressed a few words of encouragement to the exhibitors present. A few copies of "Reshum Tutwa," presented by Kumar Shashi Shikhareshwar Roy, were then distributed among the cocoon-rearers. It is also intended to print the prize essay and distribute copies among the exhibitors.

The following statement shows the prizes obtained by the exhibitors of the different districts :—

Districts.	First class prize Rs. 75.	Second class prize Rs. 50.	Third class prize Rs. 30.	Fourth class prize Rs. 20.	Fifth class prize Rs. 16.	Sixth class prize Rs. 10.	Seventh class prize Re. 5.	Total amount in rupees.

The Judges were of opinion that the cocoons exhibited were as good as ever they have seen in Bengal, and above the average obtainable.

The receipts and disbursements were as under—

This is the first time that an exhibition of this kind has been held in this district, and though the people here are not very easily induced to move away from their homes, still it is hoped that this effort may, though on a small scale, produce some good. The exhibition has undoubtedly fostered a spirit of emulation among the cocoon-rearers by bringing together the cocoons of the various silk-producing tracts, and open astonishment was expressed by many of the exhibitors at seeing work so much superior to anything they could produce. The exhibitors appeared to appreciate, on the whole, the object of the exhibition; and there are grounds for hoping that similar exhibitions, held in the different silk-producing districts, in different years, may lead to good results.

* A further grant of Rs 248 was made by Government order No. 621—110Agri., dated 18th February 1886. The total receipts therefore amount to Rs. 3,100-13.

During the year 1885-86 the assets of the Fine Funds upon the Bengal Provincial Railways were expended as follows:—

Northern Bengal State Railway.—Schools Rs. 1,367, institutes Rs. 100, amusements Rs. 150, sick employés Rs. 69-6-3.

Tirhoot State Railway.—Schools Rs. 149, institutes Rs. 297-7, amusements Rs. 780, sick and miscellaneous Rs. 361-1, and volunteering Rs. 200.

Dacca State Railway.—Institute Rs. 300.

Nalhati State Railway.—Schools Rs. 49, institutes Rs. 90, sick employés Rs. 28-5-10.

Of the balance at credit of the Northern Bengal State Railway Fund, Rs. 500 represented the balance of last year's loan to the Railway Co-operative Stores Association, which was still outstanding at the end of 1885-86.

RESOLUTION.

In the Resolution on the Fine Fund reports last year, attention was drawn to the necessity of avoiding any undue accumulation of balances, and the Lieutenant-Governor observes in the present reports that on the Tirhoot State Railway and Nalhati State Railway the balances have been reduced. On the Northern Bengal State Railway, however, the balance still shows a tendency to increase, and the Manager should take steps to avoid this. A larger proportion of the assets of the fund on this line may with advantage be spent in providing amusements and recreation for the employés.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Secretary to the Government of India, Public Works Department, and to the Managers of the Bengal Provincial Railways, for information, and that the Resolution be published in the *Calcutta Gazette.*

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 88, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

ALEXANDER PEDLER,

Offg. Meteorological Reporter to the Govt. of Bengal.

METEOROLOGICAL AND RAINFALL SUMMARY OF THE PROVINCE OF BENGAL FOR THE MONTH OF MAY 1886.

THE normal meteorological conditions in Bengal during May are to a considerable extent similar to those of April. There is the steady and increasing difference of temperature between the land and the sea area, and in this month this difference attains almost its maximum. The area of maximum temperature during May includes the western districts of South Behar, the North-West Provinces, Rajputana and Central India. With the increasing temperature of the land surface, the southerly winds blowing from the Bay of Bengal strengthen considerably, and owing to the physical obstacles of the hill systems to the east and north of Bengal, they appear as south-easterly winds in East Bengal, and as easterly winds in North Bengal. At the same time, however, the usual hot, dry westerly winds are blowing over considerable portions of Behar and Chutia Nagpur, and thus during May, as explained in previous monthly reports, conditions are favourable to the production of the local storms called nor'westers. These, it is probable, are produced by the action of the opposing winds in elevating the moist sea breezes, and by this ascensional motion their water vapour is condensed, and sufficient energy is at the same time liberated to produce the well known effects of these storms.

The southerly breezes which blow during this month at the head of the Bay are of considerable strength, and in fact, at Saugor Island and False Point, the wind velocities measured in May are generally greater than those during the actual rainy season, but there is reason to believe that during May the current is of comparatively small depth compared to what it is during the actual monsoon period. These winds, however, carry considerable amounts of moisture into East and North Bengal, and in the neighbourhood of the hills ascensional movement takes place, followed frequently by local storms and by heavy rainfall. This action will account for the large rainfall which occurs during this month in the northern and eastern districts of the Province.

During May the distribution of the normal rainfall is simple, and the lines of equal rainfall run nearly north and south through the Province, or rather almost parallel to a line joining the Chittagong Hill Tracts, the Tipperah Hills, the Garo Hills, and the Darjeeling Hills, the largest amounts being received in the eastern and northern districts, and smallest amounts in the western districts. Thus the average rainfall of the month is less than 2 inches in the southern parts of the Sarun and Mozufferpore districts, the Gya and Shahabad districts, and the western parts of Chutia Nagpur. To the east of these districts, up to a line running nearly north from the mouth of the Hooghly, the rainfall increases from 2 up to 5 inches. To the east of this, up to a line passing through Rungpore, Jamalpore, Mymensing, Bramunberiah, Comilla, and Cox's Bazar, the average rainfall increases eastwards from 5 to 10 inches. To the east of that line it exceeds 10 inches, and increases rapidly in amount towards the Garo and Khasia Hills and towards the Dooars, and at Buxa in the Western Dooars the average rainfall in May is no less than 21·58 inches.

The meteorology of May is generally rather important for about the second or third week, the south-west monsoon makes its appearance in the south of the Bay, and gives heavy rain and fairly strong winds at the South Ceylon stations. The monsoon current gradually creeps up the east of the Bay, and rain sets in along the Arakan coast towards the close of the month, and it afterwards spreads into East and North Bengal early in June.

In the front of the advancing monsoon current frequently cyclonic storms arise, which are sometimes small and feeble, and at other times larger and of considerable intensity. When these cyclonic storms are formed quite in the south of the Bay, they usually advance towards the Madras coast; but when the storms originate rather later, that is, when the monsoon current has advanced well into the centre of the Bay, the storms which then form appear usually to advance either towards the Arakan coast or towards the South Bengal coast.

Meteorology of the month.—The principal features of interest in the meteorology of the past month have been—

1. That pressure has been decidedly above the normal for the greater part of the month;
2. That temperature was decidedly above the normal for the first third of the month, and largely below it for the remainder;
3. That there was a period of extremely disturbed atmospheric conditions of about a week in duration from the 12th to the 18th, during which rather heavy and decidedly general rain fell over the province;
4. That there was a rainfall decidedly in excess in all districts;
5. That the commencement of the monsoon in the south of the Bay, *i.e.* the first and preliminary advance of strong winds at the Ceylon stations, was noticed from about the 8th to the 11th of May, and that a second advance took place about eight or ten days later.

For the first ten days of the month the weather conditions in Bengal do not call for any particular comment; ordinary hot weather conditions obtained, accompanied by a few local storms or nor'westers, which gave a small amount of rainfall to the province, but by no means equal in amount to the normal. At this time the air was very dry over the western parts of the province, and at 10 A.M. on the 10th at Buxar the saturation was only 10 per cent. of the possible amount, at Hazaribagh it was only 11 per cent., and at Dehree and Patna

it was 17 and 18 per cent. respectively. This represents an excessive dryness of the atmosphere. From the 10th, however, winds became more easterly at the northern stations, while strong southerly winds set in at the southern stations, and brought up considerable amounts of moisture. At Darjeeling, too, on the 10th, a strong north-easterly wind, averaging 20 miles an hour, was reported, and this northerly current appears to have extended, and on the 11th it embraced the whole of North Bengal and North Behar and parts of South Behar and Chutia Nagpur. As moist southerly winds were blowing over the southern and central parts of the province, and dry northerly and north-easterly winds over the northern parts, the meeting of the opposing wind systems caused a large amount of interaction and interference with the necessary result of ascensional air motion and heavy rain. For a period of about a week these disturbed conditions continued in a more or less pronounced form, and during this time rain was general over the greater part of the province and in many cases it was heavy. A period of ordinary hot weather conditions then succeeded to this disturbed period, and showers became much less numerous.

At about the period when these disturbed conditions were setting in over Bengal, a rather feeble advance of monsoon winds was taking place in the extreme south of the Bay, as shown by the high wind velocity at Galle. The advance did not, however, seem to progress far into the Bay, and shortly afterwards it died away. A second advance was noticed from about the 18th of the month, when strong winds and heavy rain were recorded at the Ceylon stations. At Galle, in particular, on the 18th and 19th of the month, 8 inches of rain were recorded. These monsoon winds continued to below strongly, and in certain cases to increase in force up to the morning of Sunday, the 23rd instant, when it was clear that a small cyclonic storm had formed off the South Madras coast, and some little distance to the south-east of Madras. By 10 A.M. of the 24th the storm had advanced over the coast line between Negapatam and Madras, and the centre of the storm, which probably passed not very far south of Pondicherry, was almost on the coast at this time. It was a storm of considerable diameter, and it affected a considerable part of the coast, though the actual size of the central hurricane part appears to have been small, and the central calm was only a few miles in diameter, while at the centre the lowest barometric reading, as shown by the log of the S. S. *Tibre*, was about 29 inches. By the morning of the 25th the small storm had entirely passed inland, and probably had crossed the Peninsula.

The moist southerly current, in front of which the storm just described had formed, apparently continued its advance up the Bay, and more particularly along the east coast, and on the 26th and 27th there were indications that an extremely feeble cyclonic circulation had been set up by the advancing current over the centre of the Bay. At this time a moist southerly and south-easterly wind current advanced over Bengal, giving rise to general rain in almost all districts of the province. This appears to have been a kind of preliminary advance of moist southerly winds, pushed forward by the strong winds blowing in the south and centre of the Bay, and it cannot in any way be considered to have been the commencement of the monsoon in Bengal, notwithstanding that the current gave good general and rather heavy rain to almost the whole province from about the 25th to practically the end of the month.

Pressure—At the commencement of the month was only very slightly in excess of the normal, and for the first week the mean pressure was in excess by only 0·002″. At the commencement of the period of disturbance previously mentioned, a rapid increase of pressure took place, which more than neutralized a slightly defective pressure which had previously been recorded, and for the third week of the month pressure became 0·1″ above the normal, but during the fourth week the excess had fallen to 0·062″. For the whole month, and for the whole Province, the mean pressure has shown an excess of 0·03″ above the normal, and this excess is fairly evenly distributed, for the extreme variations in the districts are from an excess of 0·036″ in East Bengal to one of 0·024″ in Orissa.

Temperature—At the commencement of the month was rather considerably above the normal, the mean excess of 1·5° being recorded for the first week. Temperatures in excess of the normal continued to be recorded, the excess in some cases being as great as 5° to 7°, till the heavy rainfall brought about by the disturbed conditions above described, caused an extremely rapid fall to be registered. Thus at Calcutta from 4 P.M. of the 12th to 4 P.M. of the 13th the fall of temperature was no less than 26°. After the rainfall, temperature became largely below the normal on the 13th, and at such stations as Berhampore and Jessore the mean temperature was 15° below the normal, while at Burdwan, Dacca, Patna, and Gya the defect exceeded 9°. This comparatively large defect slowly decreased, and for the third week over the whole Province the mean temperature was 2·8° below the normal; and in the fourth week it was only 1·7° below it. For the whole month therefore temperature has been 1·1° below the normal for the period, though the largest defects, amounting to 2·7° and 1·5°, have been recorded in South Behar and Chutia Nagpur respectively.

Rainfall.—The periods of the most general rainfall during the month have already been alluded to in the previous summary, and it therefore only remains to describe its distribution over the province. For the month, rainfall has been in excess in all districts. The largest fall has been received in East Bengal, which records 10·30 inches, against the normal fall of 9·45 inches. This division has therefore received a fall equal to 109 per cent. of the

normal. North Bengal has received 9·64 inches, against the normal 8·30 inches, and has therefore received a fall equal to 116 per cent. of the normal. South-West Bengal has received the large fall of 7·83 inches, while the normal for the month is 5·11 inches. This represents a percentage fall of 153. Orissa has recorded 4·66 inches, the normal amount being 3·59 inches, and thus the division has received 129 per cent. of its usual fall. North Behar has registered 4·46 inches, while the normal is 2·74 inches, and has thus received no less than 163 per cent. of the usual fall. Chutia Nagpur averages 3·10 inches of rain, the normal being 2·41 inches, which represents a fall of 128 per cent., and finally the smallest amount of rain has been received by South Behar, which registers 2·80 inches against 1·98 inches, and this division has therefore received a fall equal to 141 per cent. of the normal Taking all the provinces as having an equal value, it may be said that the rainfall of the whole province generally has been about 34 per cent. in excess of the normal.

The rainfall has, however, been decidedly irregularly distributed in various parts of the respective divisions, and instead of the lines of equal rainfall running nearly due north and south as described under the normal rainfall for the month, the lines of actual equal fall during May are very contorted, and it can only be said in a general way that they have the direction north and south. The eastern districts of the province have generally received a fall in excess of ten inches, while the western stations, such as in Shahabad, have received less than one inch. When the actual fall, however, is compared with the normal for the period, the distribution appears rather less irregular It is then seen that there are two distinct tracts of country which have received a rainfall below the normal for the month The first is a band running almost east and west and averaging perhaps fifty miles in width, which is situated some little distance from the foot of the Himalayas, but which in the Darjeeling and Julpigoree districts runs into the hills themselves. This band of country starts in the west in the Shahabad district, where it is defined by such stations as Buxar, Arrah, and Sasseram : it then takes in part of the Patna district as shown by the stations Behar and Barh. It includes part of the Monghyr district as shown by the station Begooserai, small parts of the Durbhunga, Bhagulpore, Purneah and Maldah districts, and the whole of the Julpigoree and Cooch Behar districts, and Kalimpong in the Darjeeling Hills. The second area of diminished rainfall is to be found in the east of the province, and it includes almost the whole of the Mymensingh district, parts of the Pubna and Bogra districts (Serajgunge and Sherepore), parts of the Dacca, Furreedpore, Noakholly, and Chittagong districts, as shown by the stations of Dacca, Madaripore, Fenny, and Cox's Bazar. The defect is rather large in the Cooch Behar, and probably in parts of the Julpigoree district, where in some cases it amounts to over 4 inches. It also exceeds two inches in parts of the Mymensingh district, but with these exceptions the defective falls are not large.

Except in these districts and at a few isolated stations, the whole of the province has received an excess fall varying generally up to about two inches, but there is one centre of excessive precipitation in Central Bengal, where Chooadanga has received about eight inches in excess of the normal, and Jhenida nine inches in excess, and again Magoorah 13 43 inches in excess. Culna and Cutwa in the Burdwan districts have also received about six inches of excess rainfall during May.

The following small table will show the monthly rainfall over the whole province, from the commencement of the current year, compared with the normal fall for the same period. The numbers which are given are calculated out as percentages of the normal fall; thus 100 will represent a normal fall, a number larger than 100 an excess fall, and so on :—

Up to the present date the whole of the province has received a rainfall slightly in excess of the normal since the commencement of the year, except North Bengal, where the fall has been about 5 per cent. below the normal. Orissa has received the largest excess fall, amounting to 24 per cent, while South-West Bengal has received 17 per cent. in excess. In all other meteorological divisions the variation from the normal does not amount to 10 per cent.; over the whole province for the first five months the general rainfall has been about 8 per cent. in excess of the normal.

The following table gives the summary of the temperature and rainfall data of each of the seven Meteorological Divisions of the Province for the month of May 1886 :—

CALCUTTA, *the 14th June* 1886.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 11TH OF JUNE 1886.

In the report for the previous week, it was shown that a feeble cyclonic storm had advanced over South-East Bengal, and that an advance of monsoon winds had followed it, which had given general rain to the southern part of East Bengal, where, at certain stations, the rainfall had been particularly heavy. At the commencement of the present week rainfall suddenly ceased over the province, except for a few local showers which fell during the first three days, but during this time a small barometric depression was formed off the Pegu coast which passed inland on the 7th, probably near Akyab, and the disappearance of the depression on the 8th was followed by another slight advance of humid winds over East Bengal, and on this day again rather heavy rain was reported over the whole of this district. On the 8th Madaripore (Furreedpore district) reported 7·18 inches of rain, and Satkanya (Chittagong district) 5·20 inches, while amounts of between three and five inches were reported from Chittagong, Patuakhally, Noakhally, Raigunge, Dacca, Chandpore, and Daudkandi. Rainfall then continued fairly general in East Bengal up to the close of the week, while a few showers were reported from North and South-West Bengal and Orissa. The other districts of the province have, however, received practically little or no rain during the week.

The main feature in the meteorology of the week appears to have been the weakness of the monsoon current, which at this time is usually blowing over East and North Bengal with considerable force, but which, during this year, has given comparatively so little rain to these districts, that it would appear probable that the monsoon current is being deflected towards Burma, or that it is very much weaker than usual, or perhaps it may be that the scanty rainfall, particularly of North Bengal, is due to a combination of both causes.

Pressure—Over the greater part of the province has been decidedly above the normal during the past week, and the mean pressure for the province shows an excess of 0·025″. At the coast stations, however, the average pressure has been distinctly below the normal, and at Saugor Island there has been a defect of 0·009″, at False Point of 0·002″, and at Chittagong of 0·001″.

Temperature—Has been generally considerably above the normal except in East Bengal and Orissa, where it has been distinctly below it. In North Behar temperature has been no less than 4·1° above the normal; in South-West Bengal, South Behar, and Chutia Nagpur it has been rather more than 1° above it; while in Orissa the defect has been 1·3° and in East Bengal temperature has been 0·4° in defect. For the whole province the mean temperature has been 1° in excess of the normal for the week.

As before stated, the only district in which rainfall has been heavy has been East Bengal, and this district has received 3·43 inches against the normal 3·62 inches; the fall in this district has therefore been heavy, though in slightly smaller quantity than usual. In all other districts the falls have been small and largely in defect; thus South Behar and Orissa have received about half the normal fall; South-West Bengal, North Bengal, and North Behar have received about a quarter of the usual amount; while in Chutia Nagpur the amount received is scarcely more than a ninth of the usual fall for the period.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 11th of June 1886:—

MEMORANDUM.

THE returns of the principal Municipalities in Bengal for the week ending 29th May 1886 yielded the birth and death-rates of 17·4 and 22·1 per 1,000 of population, respectively, as opposed to 15·2 and 20·3 per 1,000, respectively, during the preceding week ending 22nd May, indicating much advance in the registration of both events.

2. The Municipalities which returned the highest proportions of births and deaths are—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille.*
Beauleah	39·4	Mozufferpore	38·9
Chittagong	37·6	Purneah	38·1
		Jessore	36·7
		Puri	33·6
		Gya	32·8
		Beauleah	31·5

3. The following table denotes that, as compared with the results of the preceding week, there was an enhancement of mortality from all diseases excepting cholera, particularly from fever and bowel-complaints:—

	Ratio per *mille* during the weeks ending—	
	29th May 1886.	22nd May 1886.
Cholera	1·1	1·6
Small-pox	·2	·03
Fever	10·3	9·4
Bowel-complaints	3·6	2·9
Injury	·5	·4
Other causes	6·4	6·0

4. Of the abovementioned diseases, while bowel-complaints proved noticeably fatal only in the Mozufferpore town, viz. at the rate of 10·9 per 1,000 of population, and the casualties from small-pox and injury were nowhere conspicuously large, cholera, fever and the maladies classed under the head of "Other causes" proved most fatal to life in the following Municipalities:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Beauleah	10·5	Jessore ...	36·7	Puri ...	14·7

Patna	2·2	Mozufferpore ...	21·9	Gya ...	12·3
				Serampore ...	11·8
				Durbhanga ...	10·2

5. The death-rates in relation to *Sex*, *Class* and *Age* stand as follows:—

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted, inasmuch as the census of the Europeans, above alluded to, cannot be employed as a basis of calculation owing to the results of the census under this head not having been registered under the authorised form of age classification.

Increase.

	Tons.
Edible grains	96
This increase is due to fair crop in this year.	
Sugar and jaggree	14
This increase is due to fair market price.	
Piece-goods	19
This increase is due to fair market price.	
Seeds of all sorts	53
This increase is due to fair market price of linseed at Calcutta.	
Coal	364
This increase is due to merchants not laying in stock during the rains as they used to do before; also to extensive brick-burning for repairs of buildings damaged by earthquake.	
Sundries	16
This increase is due to less import during the previous months.	

Decrease.

	Tons.
Silk and silk cloth	10
This decrease is due to low rate.	
Cotton	7
This decrease is due to previous stock not being exhausted.

ALLEN MEARS,
Dy. Traffic Manager.

JAMALPORE, *the 10th June* 1886.

General Remarks on the fluctuation of principal staples carried over the East Indian Railway during month ended 24th April 1886.

INCREASES.

Coal and Coke.—The increase in the upward coal was due to demands for the Oudh and Rohilkund and Tirhoot State Railways, and that in the downward coal for the Eastern Bengal State Railway and for brick-burning purposes.

Cotton.—Good crops and favourable prices in Calcutta led to increased despatches to Howrah for export.

Piece-goods (European).—The traffic in this staple at this period last year fell off considerably owing to the rumours of a war on the frontier; this year there has been a brisk demand for piece-goods, chiefly from the North-Western Provinces, Behar and Tirhoot, hence this increase.

Turmeric.—This increase was chiefly in the despatches from Patna to Punjab and the North-Western Provinces owing to good demand by the natives.

Fruits.—This includes chiefly betel-nuts and myrabolams, and the increase in the former is due to native marriage ceremonies and the generally improved condition of the country; the increase in myrabolams is attributable to demands in the Bombay and Calcutta markets.

Gram and Pulses.—A brisk demand in Calcutta accounts for this increase.

Rice (husked and unhusked).—Due to a plentiful harvest and a favourable market.

Other rain and spring crops.—Low prices and a brisk demand account for the increase under this head.

Oil.—This increase was chiefly in kerosine oil from Howrah to the mofussil, where the demand for the oil is daily spreading.

Sugar and Jaggree.—Due to large despatches from the Shahabad district to Agra and Cawnpore where the demand was brisk.

DECREASES.

Wheat.—Due to small arrivals consequent on the season having closed early and the new wheat not being in the market.

Lac.—A dull market at Calcutta accounts for this decrease at Mirzapur.

Iron.—The decrease was in 1st and 2nd class iron from Howrah owing to a want of demand and also to the river steamers taking 1st class iron at very low rates of freight.

Railway material (Foreign).—This is assignable to large despatches of material last year for the construction of the Bolan Pass railway; this year there has been no demand.

Salt.—This staple shows an increase in the weight carried attended with a decrease in freight, the increase in weight was in the despatches from Howrah and from *viâ* Agra and Delhi, and the very low competitive rates quoted by us account for the decrease in earnings

Seeds.—In this staple also there has been an increase in the weight carried and a decrease in receipts. Short leads and low rates of freight account for this result.

Tobacco.—A dull market is assigned as the cause for the decrease in this commodity.

Government Stores.—Heavy despatches were made for the North-Western frontier at this period last year, but there have been no despatches this year.

MALABAR COAST.

NARRAKEL ROADSTEAD.

Position of Sunken Wreck.

MR. G. MACKERNESS, Commanding the British India Steam Navigation Company's steamship *Kilwa*, whilst on his voyage from Calcutta to Bombay, *vid* Coast ports, discovered the British barque *Sir Henry Havelock*, which had been burnt on the 1st June 1886, sunk, in a position dangerous to shipping, in the Narrakel roadstead.

The wreck lies in about 5 fathoms, portions of the spars showing just above water sufficient to mark the spot, and he gives the following bearings:—

Narrakel flag-staff	E. by N. ½ N.
Cochin light-house	S. E ¼ S.
The Cruz Milagre gap	S. E. by E.

The bearings are magnetic.

A buoy painted green has been placed two cables to westward of the wreck.

The Master-Attendant, Narrakel, directs vessels approaching the anchorage at night to bring the light to bear about E. ½ N. in 6 to 7 fathoms, and run in on that bearing and anchor in 4½ to 5 fathoms of water.

(1) *Shoals in Fells' Passage.*

THE Officer in charge of the Marine Survey of India has reported that a *rock*, with a the of only 6 feet at low-water, spring tides, lies 1½ miles N. E. by E ½ E. of the South point of Cantor's Island.

The *rock* or *islet* marked on the latest corrected charts, two miles E. by N. of Bound island, does not exist.

The *Medina Patches* with a depth of 1½ fathoms, lie one mile E. by S. of Bound island, and join the 2½ and 3 fathoms marked to the South Eastward.

Directions.—By keeping the whole of Passage Island open West of Fell's Island, a vessel will pass over the tail of the bank in 3 fathoms at low-water, smooth bottom. The least water in Fell's Passage is 9 feet at low-water between Payee Kyun and the Small islet. The rise of tide at neaps is 12 feet above this.

(2) *Reef South-Eastward of Tavoy Island.*

Also, that information has been received of the existence of a *rocky patch* lying to the South-East of Tavoy Island :—

This reef (*Bowers Reef*) is half a cable in extent, and dries at low-water ; it lies 9½ miles S. S. E. ½ E. of Canister Bank (Eastward of Tavoy Island), and 5½ miles N. ¾ E. of Long Island.

The bearings are magnetic—Variation 3° Easterly in 1886.

NOTICE TO MARINERS—(No. 36.)

ARABIA—EAST COAST.

PERSIAN GULF.

(1) *Non-existence of Oribe Shoal.*

THE British Admiralty have given notice, with reference to the reported existence by the master of the British barque *Oribe* in 1878, of a sunken danger lying in latitude 27° 27′ N., longitude 50° 39′ E—about midway between Rás-al-Mutaf and Rennie shoal—in the fairway of the Persian Gulf, that, consequent on the unsuccessful search made by H.M.S. *Arab* in 1879 and H.M.S *Reindeer* in January 1886 the *Oribe* shoal has been expunged from the Admiralty Charts.

(2) *Non-existence of reported shoal North-West of Lárak Island.*

Also, that, consequent on an unsuccessful search having been made by H.M.S. *Reindeer* in January 1886 for the shoal on which the British India Steam Navigation Company's steam-ship *Oriental* was stated to have grounded in 1884, and reported as lying on the North-West side of Lárak Island, at the distance of about one mile from the shore, this shoal has been expunged from the Admiralty Charts.

NOTICE.

ANNADA CHARAN GUPTA, of the Dacca College, has passed in the Honours Division the Matriculation Examination of the London University held in 1886.

CHARLES H. TAWNEY,

Offg. Director of Public Instruction.

DARJEELING, *the 3rd June* 1886.

Educational Prospectus.

THE Calcutta Medical College Session, 1886-87, will commence on the 23rd June next Students who may be desirous of commencing their studies are requested to apply to the Principal between the hours of 11 A.M. and 4 P.M. on or before that date.

2. Ten (10) free presentations will then be awarded. These are given to students according to their relative position in the University, B.A., B L. and F.A. Examinations, preference being given to those who have passed the highest examination.

3. No person shall be enrolled as a matriculated student of the College who has not previously passed the First Arts Examination of the Calcutta University, or some one of the preliminary Arts Examination of the United Kingdom recognised by the British General Medical Council.

4. All matriculated students of the College are required to pay Rs. 15 on entrance, Rs. 30 for the summer session on the 23rd June, and Rs 30 for the winter session on 1st November of each year.

5. Students who have failed to pass their final examination, and who, under the regulations of the University, are required to attend a further course of lectures and of hospital practice before being allowed to present themselves again for examination, will pay for such further course an annual fee of Rs. 45 in two instalments of Rs. 30 and Rs. 15, payable at the beginning of the summer and winter sessions respectively.

6. Any matriculated student of the College may, with the permission of the Principal and the Professors of the subject, attend courses of lectures or departments of hospital practice in addition to the full curriculum for the year, and shall be entitled to certificates of attendance at such extra lectures, if the Professor is satisfied that he or she has really studied the subject. The fees payable in advance for such additional courses are the following:—

	Rs.
For a single course of lectures on each subject	40
For six months' attendance in each department of hospital practice	60

7. Any matriculated student who leaves the College before completing his University course, with the object of continuing his studies at a Medical School in Europe, may receive certificates of attendance at lectures on payment of fees at the rate fixed in the foregoing rule. But in calculating the sum to be so paid, the amount of the fees already paid by him as a regular student, or in the case of a free student, the amount which would have been paid by him had he been a paying student shall be deducted.

8. Any person not being a matriculated student of the College, who may be desirous of attending any course of lectures, or any department of hospital practice, may do so with the permission of the Principal and Professor of the subject, on payment, in advance, of fees at the rates fixed in rule 6.

If such student has passed the Entrance Examination of the University, he may receive certificates of attendance at lectures, provided the Professors are satisfied that he has attended the full course of lectures, and has mastered the subjects taught.

A student who has not passed the Entrance Examination will be entitled to no certificates of any kind.

9. College scholarships, prizes, and certificates of honour are open for competition only to matriculated students of the College, Hospital Apprentice and Female Certificate class.

A gold medal and certificates of honour are awarded to the best students in each subject.

Goodeve and Macnamara silver medals are given to 1st-year student in Anatomy and Chemistry.

10. College scholars, who receive less than Rs. 20 per mensem, are not required to pay Rs. 30 per session.

The holders of the Doorga Charan Laha and all other scholarships will be required to pay fees as a matriculated student. These scholars may pay their fees in advance, or have their scholarship money deducted till the full amount is received.

11. Any student holding a Medical College scholarship will be permitted to draw the stipend of the said scholarship at any recognized Medical School in the United Kingdom provided he furnishes from the head of such school a certificate of good conduct and diligent prosecution of his studies.

12. The class assistants of Pathology, Physiology and Comparative Anatomy can be held only by matriculated students of the College.

NOTIFICATION BY THE ACCOUNTANT-GENERAL, BENGAL.

STOCK CERTIFICATES.

As it does not appear to be generally known that Government Promissory Notes can be readily converted into Stock Certificates and re-converted into Promissory Notes at the option of the holders, and that Stock Certificate-holders enjoy certain special advantages, the attention of holders of Government Securities is drawn to the following particulars :—

1. Government Promissory Notes can be converted into Stock Certificates re-converted into Promissory Notes at any time at the option of the holder.

2. The holders of Stock Certificates are not required to present them in person or by agent when the interest becomes due. On application made, interest will be paid to Stock Certificate-holders by warrants on any Government Treasury, which warrants will be sent by post, on the day the interest falls due, to the Stock Certificate-holders direct, or through the Treasury Officer, as they may desire.

3. Stock Certificates are not negotiable by endorsement, and are consequently of no value in the hands of a wrongful holder, and the risks arising from the possession of, or repeated transmission of, negotiable Securities, are thereby avoided.

4. In the event of the loss of a Stock Certificate by theft, fire, &c., a fresh Certificate will issue on satisfactory evidence of loss.

NOTE.—Further particulars can be obtained on reference to the Public Debt Offices, Calcutta, Madras, and Bombay.

PUBLIC WORKS DEPARTMENT,—BENGAL.

DISTRICT ROAD FUND.

NOTIFICATION No. 234.

The 21st June 1886.

THE following annual accounts and reports of the Road Committees of the districts of Dinagepore, Rajshahye, Rungpore, Bogra, Pubna, Darjeeling, and Julpigoree for the cess year 1884-85, together with the remarks thereon of the Commissioner of the Rajshahye Division, are published for general information.

D. B. HORN,

Under-Secy. to the Govt. of Bengal, P. W. Dept.

No. 127R.W., dated Dinagepore, the 18th December 1885.

From—H. S. BEADON, ESQ., Chairman of the District Road Cess Committee, Dinagepore,

To—The Commissioner of the Rajshahye Division.

I HAVE the honour to submit herewith the report of the District Road Fund for the cess year 1884-85.

2. The brief report was submitted on the 26th June last.

3. *Working of the Committee.*—The Committee held 14 meetings within the year. * * * Business laid before the several meetings was disposed of after full discussion.

4. *Working of the Cess Act.*—The collection of the cess was very successful during the year, being 94·8 per cent. as regards collections on the current demand, against 85·6 of the preceding year. This subject has been separately noted in the Collector's No. 49C. dated 3rd November 1885, to your address. It is now ten years since the road cess first came into force, and never within the period have such good collections been secured in this district. This shows, we may hope, that the Act is better understood by the people, who see that the roads and bridges about their villages, and the means of communication to the different markets and other centres of trade, are attended to.

5. The tax cannot be said to be popular, as the payment of any money for the purposes of a tax is always distasteful to the people; but, unlike other direct taxes, the payers of the cesses see direct advantages immediately resulting to themselves therefrom.

6. *Inspection of offices*—The office of the Committee and that of the District Engineer were inspected twice within the year—once by Mr. Dobbie, the Examiner of Local Accounts, Bengal, and in the second instance by the local auditor. The reports on both occasions were satisfactory. Mr. Dobbie made certain suggestions which have been adopted.

7. *Original works.*—Under this head were constructed three timber bridges :—

One of	4	spans of	... ...	20 feet.
„	2	„	... ...	17 „
„	1	„	... ...	23 „

and 360 running feet of pipe culverts on the feeder road from Mohadebpore to the Sultanpore station of the Northern Bengal State Railway. In connection with this about 400,000 cubic feet of earthwork and 50,000 superficial feet of turfing were also executed. It is in contemplation to build another bridge and insert two pipe culverts during the current year, whereby the portion of this road lying within this district will be continuous from Mohadebpore to Hapina, where the road enters the Rajshahye district.

8. Surveys for two roads—one from Ruhia to Chakla in Julpigoree and the other from Thakurgaon to Joygunge—were undertaken, and the first road has been partially provided for in the present year's budget. Its construction, however, depends upon the co-operation of the people, who offered to surrender the land free of cost, but it is still a matter of doubt if the zemindars will agree to this. I hope to receive a definite answer to this question before long, as the District Engineer has been directed to place himself in communication with the parties concerned.

9. On the Gungarampore road a bridge 12 miles to the south of Dinagepore is to be renewed within this year.

10. *Repairs.*—As far as funds have permitted, attention has been directed to the maintenance of all the roads within the district, with the exception of three on which expenditure was considered to be useless. Besides ordinary surface repairs several old timber and bamboo bridges, viz. :—

2 on the Bogra road	1 on the Maldah road
2 on the Purneah road	1 on the Moorshedabad road.

have been entirely renewed. The work on them has been substantial, as old iron rails have been used in every case in the place of beams, while first class sâl and teak timber have been employed for the rest of the structure.

11. Another work of some importance has been the clearance on the Darjeeling road of the jungle at Prannuggar, so ill-famed for its tigers. The road is now being freely used without fear, and it will be the Committee's aim to keep down this jungle, as arrangements have been made for the cultivation of the land, from which all growth has been up-rooted on each side of the road.

12. Although much is being done to the roads, still the money spent on them is far from sufficient to keep them in anything like good order, except for bullock cart traffic, and riding traffic, whether local or through, is increasing every year, and with the opening of the railway now under construction the wear and tear on the western roads will be far greater than it has been, though of course the money available for expenditure on repairs will undergo no increase. The road cess is an inelastic tax, and unless substantial grants from Government can be obtained, the maintenance of the heavy mileage of district roads, such as we have in Dinagepore, will become of greater difficulty year by year.

13. *Village roads* —A great deal of useful work was done in the construction of village roads, for which 16 applications were received and 11 attended to. It is worth noticing that in some instances the villagers supplemented our grants by local contributions. Thirty-five and a half miles were made during the year, and three bridges or culverts, at a total cost of Rs. 3,568, of which Rs. 360 were borne by the villagers themselves, either in cash or in materials. This plan has not been tried here before, but a small beginning has been made, and I hope, by steadily refusing grants except where the applicants are willing to do something for themselves, to eke out the Committee's funds and to teach them the necessity of self-help. In this way we shall check applications for roads for which there is not absolute need. The Committee will make a grant of three-fourths or two-thirds of the amount required, and the remainder (first deposited by the villagers) will be the guarantee of the necessity of the road.

14. The establishment of the District Engineer was employed in the construction of these works. Owing to the comparative cessation of original works in consequence of the financial pressure, the district staff was able to look after these petty works.

15. *Removal of obstructions to drainage.*—Several petitions were received from the different parts of the district for the opening out of roads where obstructed drainage proved injurous either to health or cultivation. The petitions were enquired into and pipe culverts put in at those places where the grievances complained of appeared reasonable.

Number of petitions received 5.
Ditto complied with 4.

16. *Arboriculture.*—Besides keeping up the old system of planting and maintaining trees by paid *malees*, I have introduced a plan of getting this work done by village agency on a system of contract, by which small advances are made in the first instance, and final payment deferred till the trees have grown sufficiently high to be out of the reach of cattle.

17. I shall not be able to write confidently in praise of this system till the work of one full year has been observed. The plan has succeeded elsewhere, and I have every hope that nothing will militate against its success here too. Nothing could be less effectual than the system of paid gardeners.

18. *Establishment.*—The several establishments under the Committee—engineering, upper and lower subordinates, offices of collection and accounts, and that of the District Engineer—have worked well during the year. The District Engineer has given the Committee complete satisfaction in his own legitimate duties. He has also been utilized by me for work as Magistrate; but I find from the orders of Government forwarded with your No. 287Wct., dated 9th November 1885, that this is not approved of, and henceforth for such work I shall call upon the Executive Engineer (who unfortunately resides at Julpigoree), and shall relieve the District Engineer of the miscellaneous work which he has hitherto willingly undertaken for Government in addition to his own work. The District Engineer speaks well of his executive subordinates, and the Committee desires me to express its satisfaction with the manner in which Gopal Chundra Boral, the Accountant, and his subordinates, have executed their duties.

19. *Accounts* —The annual accounts were audited by the Standing Sub-Committee on the 15th December 1885, and laid before the special meeting of the Committee held on the 18th instant.

Explanatory Memorandum to accompany the Annual Account for the cess year 1884-85.

(1.) *Receipts.*—The last kist of the cess year 1883-84 was due in October 1884: the Doorga Poojah holidays having intervened, almost all the demand for that quarter was collected during October 1884; hence the collection was larger than the amount estimated for.

(2.) Under instructions contained in paragraph 2 of the report, dated 5th February 1885, of the Examiner of Local Accounts, forwarded with the Accountant-General's No. 1327LA, dated 16th February 1885, all payments made to the Cess Deputy Collector from 1st April 1885 for service of processes have been charged to "Advances" and credited to this head ("Advances") when any recoveries have been effected and paid into the treasury; hence the amount collected up to March 1885 was shown under the heading "Fees, Fines and Forfeitures" as before and after that period. Such receipts have been shown under the sub-head "Advances," subordinate to Suspense Accounts.

(3.) The Government contributions (Rs. 600) towards the cost of the joint establishment for the collection of Road and Public Works cesses have been transferred from this head to that of "Grant from Government"—*vide* paragraph 4 of Government Resolution No. 1469R.C., dated 24th April 1885, forwarded with Commissioner's circular No. 37P.Wct., dated 27th May 1885.

(4.) The cause of the amount realised as interest on the arrear cess being in excess of the amount budgetted for is due to the fact that a larger amount of arrears was outstanding at the close of each quarter than what had been calculated at the time of the submission of the budget estimate. The arrears were collected in full, and consequently a larger amount of interest was realised.

(5.) *Expenditure.*—During the cess year 1883-84 salary for the month of September 1884 was paid on 23rd September 1884 on account of the Doorga Poojah holidays; hence during this year 11 months' pay has been charged.

(6.) As the demand for the last quarter of cess year 1883-84 was realised in October 1884, Doorga Poojah holidays having intervened, the collection of this year was larger than the estimated amount; hence the percentage cost of establishment had to be paid in excess than the amount provided for in the budget.

(7.) Nothing was spent on this road during this year. It is shown in this statement only because the value of materials lying at the site of this road has been transferred to other works.

(8.) Surveying and taking levels of the country between Thakurgaon-Joygung and Ruhia-Chakla Boda, amounting to Rs. 150 and Rs. 1,067, entered in antique in the column "Amount as per budget estimate" against road No 24 (repairs), were not provided in the original budget estimate, but subsequently they have been sanctioned by the Commissioner—*vide* his No. 2P.W., dated 4th April 1885.

(9.) As the amounts provided for roads Nos. 10, 42 and 45 were not sufficient for their maintenance, nothing was expended on them.

(10.) This is a road within the village of Gangarampore: it has no connection with the district road No. 7, Gangarampore road.

(11.) Besides this, Rs. 300 worth of materials have been used on this road which have been supplied by the villagers.

(12.) The Sub-Overseer and Draftsman was on privilege leave: his leave allowance was drawn during this year; hence 13 months pay was drawn.

D. D. CHOWDHURY,
Vice-Chairman.

No 109, dated Beauleah, the 21st December 1885.

From—E. H. RUDDOCK, Esq., Magistrate and Chairman of the Road Cess Committee, Rajshahye,

To—The Commissioner of the Rajshahye Division.

I HAVE the honour to forward the accounts of income and expenditure of the District Road Fund for the cess year 1884-85, and to make the following remarks on the administration of the fund.

These accounts were examined by the Sub-Committee of Audit, and certified by them as correct. They were then laid before the special meeting held on the 10th December 1885, and passed by them under section 179 of the Bengal Cess Act.

The road cess was levied at the full rate of half anna in the rupee.

The cess collection during the year fell short of the estimated amount, and the reason has been explained by the Collector in his annual report of the collection branch.

	Rs.
The year commenced with an opening balance of ...	17,432
The revenue collected during the year, including contribution from Government and private parties, was ...	78,307
The receipts under the suspense heads were	34,304
These made up a total of	1,30,043
The expenditure on works, including dâk bungalow and drains, was	54,958
That on several establishments and stationery	21,176
And under suspense	26,699
Leaving a balance of	27,210

available for the current year.

Meetings held.—There were five road cess meetings held in the year, and they were fairly attended.

District roads.—The feeder road from Nowgong to Hupaniah Hât, for which an estimate for Rs. 42,575 was sanctioned by Government, is gradually approaching completion. During the year under report two more large iron and timber bridges were constructed on the road.

A timber-topped bridge on timber piles and iron girders, 84 feet in length, was constructed over the Abhoya khal on the road to Maldah.

Two bridges on the Bogra road, of masonry piers and timber top, were thoroughly repaired.

No new metalling was laid this year. The proposal to extend the metalling of the Nattore road was given up in the expectation of connecting the sudder station with Nattore by a railway.

Great improvements were made on the Maldah, Dinagepore, Bogra, Madarigunge, Tanuore, and Damkoora roads.

The other roads were repaired and maintained in as good condition as possible, considering the limited funds at the disposal of the Committee.

But the unusually high flood of the year, increased in some cases by the wilful mischief of the villagers who cut the roads, has breached the Pubna road in several places, and washed away two timber bridges on the Nattore road.

A few of these men were arrested and punished.

Village roads.—The village roads received the usual attention of the Committee, and the applications received for their improvements have invariably been considered.

Earthwork repairs were frequently undertaken by others than the official staff, and the Committee are particularly indebted to Messrs. Money, Lang, and Mr. Bamber, late District Superintendent of Police, for their labours in this respect.

The total expenditure on these roads was Rs 3,681, including cost on certain works undertaken to relieve the distress felt, though only for a short time, at Bagmara thana and about Doorgapore outpost.

Drains.—The condition of the drains in connection with the Department Public Works sluice gates at Rampore Beauleah was improved, and some culverts on the Nattore and Bya roads had in connection with the municipal drainage scheme to be renewed with increased waterway for the purpose.

The cutting mentioned in last year's report near the Nandangarhee embankment was not found to bring in quite as much water as was required, and the Puriya zemindars again subscribed, and under the superintendence of the District Engineer a second cutting was made west of the first one. This, helped by the flood of the season, carried into the country an enormous stream of water, and is said to have done great good. The health about Durgapore and Bagmara is certainly improved.

Arboriculture.—Good care was taken of trees planted in previous years on the sides of the Nattore road. Some date trees were planted in the year under report on the Nattore and Bya roads.

Cost of establishment.—The cost of establishment during the year was:—

	Rs.
Collection establishment, including cost of serving processes ...	4,031
Administration	1,167
Percentage cost of establishment for offices of account and control	1,159
Public Works establishment	11,027
Total cost ...	17,384

The revenue for the year being Rs. 78,307, the ratio of establishment to revenue is 22·2 : 100, and is therefore within the limit allowed in section 185 of the Act.

Working of the establishment.—The District Engineer, Mr. N. W. Mackenzie, continued to give satisfaction to the Committee, and the greater part of the establishment have worked well.

K. K. SEN,
Vice-Chairman.

Dated Beauleah, the 8th December 1885.

From—BABOO KASI KINKAR SEN and others,
To—The Chairman of the Road Cess Committee, Rajshahye.

WE, the undersigned, members of the Road Cess Sub-Committee appointed under sections 174 and 179 of the Act to audit the accounts of the Road Fund for the cess year 1884-85, have the honor to report that a meeting for the purpose was held on the 8th December 1885, and that the accounts were examined and passed by us as they were found correct.

Report of the works done and in progress during the cess year 1884-85, *drawn up by the Vice-Chairman of the Road Cess Committee, Rungpore, under Section* 178 *of the Bengal Cess Act, IX (B.C.) of* 1880.

I HAVE the honour to submit herewith in duplicate a detailed account of receipts and expenditure of the District Road Fund for the past cess year ending on the 30th September 1885, prepared under section 178 of the Bengal Cess Act, together with the following brief report on the works of local improvement that were undertaken during that year, and those proposed to be carried out during the current year 1885-86.

2. *Audit of accounts.*—The annual accounts were examined by the Sub-Committee of audit and certified by them as correct. They were then laid before the special meeting of the Committee held on the 30th November 1885, and passed by them under section 179 of the Bengal Cess Act, IX (B.C.) of 1880.

3. *Assessments and collections.*—The current demand on account of the cess on lands for the year was Rs. 1,26,940, and the arrear demand from last year Rs. 13,575, making a gross demand of Rs. 1,40,515 for realization. A sum of Rs. 1,30,438 was realized during the year, leaving a balance of Rs. 10,077 uncollected at end of the year.

4. *Working of the Cess Act.*—The Road Cess Act has been in force in this district since October 1876, and this is the ninth report of its working. The people in general appreciate the working of the road cess system on account of improvements that have been made in the district and village communications during the last few years. Unlike other taxes, the cess is paid without any hostile feeling towards it. As reported last year, the provisions of section 99 of the Cess Act had to be enforced in many cases for the recovery of arrears from habitual defaulters, as the Certificate Act is in practice dilatory, and does not facilitate the recovery of arrears. On the whole, the Cess Act worked efficiently during the year, as the gross collections have been 102·7 per cent. on the demand for the year. The district is under revaluation, which work has been taken in hand two years since. It is expected that the work of revaluation will be finished in the current year, and there is every probability of the cess being on the increase to a certain extent.

5. *Working of the District and Branch Committees.*—The number of meetings held by the District Committee was seven, and the members attended in sufficient number to form a quorum and evinced great interest in all matters brought before them for discussion. There are three Branch Committees, *i.e.*, one at Gaibanda, one at Kurigram, and the other at Nilphamari. The Committee at Gaibanda met seven times, that at Kurigram four times, and that at Nilphamari nine times during the year. The non-official members at Kurigram took no interest whatever in their work. Steps will be taken to make this Committee more efficient.

* * * * * * * *

6. *Working of the Audit Committee.*—The Audit Committee appointed under section 174 of the Cess Act to audit the monthly and the annual accounts did not work well during

the year, as the monthly accounts had to be examined in many cases by the Vice-Chairman and only one member, and in one case by the Vice-Chairman alone. The reason is that it was invariably found difficult in procuring the attendance of two other members to examine them. Every endeavour will, however, be made to act strictly in accordance with the provisions of the law in matter of auditing accounts in future. The difficulty is that the accounts are all in English, and only two of the non-official members are acquainted with that language.

7. *Inspection of accounts.*—The accounts of the Committee's office were examined by Baboo Jogendra Nath Banerjea, Local Auditor, in March last, and the result was satisfactory.

8. *How the different establishments worked during the year.*—The different establishments on the collection of cess, on the administration of the funds, and on the execution of works have on the whole worked satisfactorily during the year. I would particularly mention Baboo Kartic Chundra Chatterjea, Accountant, who from his intimate knowledge of the Public Works system of accounts and businesslike habits, gave me satisfaction in the discharge of his duties.

Baboo Asutosh Lahiree, B.C.E., continues to serve as District Engineer, and has given me as usual satisfaction in the performance of his duties. He has a good knowledge of his work, and works hard to get good work done and to see that those under him work properly.

9. *Original works.*—No original works could be taken in hand, as the estimates were not sanctioned by Government in time to commence them. A sum of Rs. 57,000 was originally budgetted for original works in the construction of bridges on 11 important lines of communication, the estimates for which were only sanctioned by Government in the middle of August last, when the working season had far advanced. Four projects, however, were sanctioned by the Commissioner in the middle of May last, but owing to heavy rains the bridge works could not be taken in hand, the bridge sites being under water; consequently the budget estimates had to be revised in July last, in which a sum of Rs. 5,490 was allotted for "original works," against which only Rs. 1,125-11-3 have been spent. The revised budget estimates were sanctioned by the Commissioner in his letter No. 64P.W., dated 28th September last. All the materials for the original works that were originally budgetted for have, however, been collected, and the works will be taken in hand as soon as the water subsides. Nearly 21 lakhs of bricks have departmentally been manufactured at an expense of a little over Rs. 20,000, or at an average rate of Rs. 10 per thousand bricks, against Rs. 15 per thousand selling at the local markets. The outturn of the brick manufacturing operations is therefore satisfactory—a result due to the zeal and supervision of the District Engineer. Some 4,500 maunds of lime have also been purchased. Out of the quantity 3,855 maunds were brought from the Government manufactory at Chuttuck through the Superintendent of Works, Assam Division. Arrangements are now being made to get the required quantity of lime for the current year's works from the same manufactary.

10. *Repairs.*—A sum of Rs. 41,417 was spent on repairs, against Rs. 68,956 of the previous year. With this sum all the roads and tracks in the district were repaired and kept in order as far as funds at the disposal of the Committee permitted. Out of the amount spent on repairs a sum upwards of Rs. 10,000 was spent in putting down stoneware pipes of 21 inch diameter, aggregating 2,000 r. ft. on all minor openings for village drainage and for irrigation purposes. The roads received great attention and are improving every year.

11. *Village roads.*—A sum of Rs. 5,886 was spent on the village roads, against Rs. 6,000 budgetted for. Part of this sum was entrusted to private gentlemen for the repairs of village roads within their jurisdiction, and the balance distributed amongst the sub-divisional officers of Gaibanda, Kurigram, and Nelphamari for proper management. The money appears to have advantageously been spent, and the working agencies, both officials and non-officials, have shown great interest in the matter of village communications. The thanks of the Committee are due to Rai Romoni Mohan Rai Chowdhury Bahadoor, zemindar of Tooshbhander, and Baboo Trailucco Nath Lahiree, Manager of Burdhonkote, wards estates, for undertaking repairs of certain roads and satisfactorily carrying them out.

12. *Arboriculture.*—A sum of Rs. 693 was spent on tree-planting. The trees that were hitherto planted on the sides of some of the important district roads have been kept in fair order. The nursery started for young plants during the years 1883-84 was maintained in fair order. A large number of mahagony and sissoo trees will be fit for transplanting during the next rains.

SYAMAKUMUD MUKERJI,
Vice-Chairman, District Road Cess Committee, Rungpore.

Chairman's Report on Roads.

THE best praise that I can give the roads is that in each cold weather tour I can drive a spring conveyance over more and more of the principal and even some of the village roads. We are pushing on now with bridges, and hope by the end of the present year to have abolished all those unsatisfactory bamboo bridges which cost so much, and even never safe, and to have in their places substantial masonry or timber bridges constructed to last for many years.

H. J. NEWBERY,
Chairman, District Road Cess Committee, Rungpore.

S. K. MUKERJI,
Vice-Chairman.

EXPLANATORY NOTE ON THE ANNUAL ACCOUNTS FOR 1884-85.

Repairs.

THE repairs of certain roads have excceded the budget allotments on account of repairs done to the damages caused to the roads and bridges by heavy rains The excess expenditures have, however, been met from the total savings on the allotment under the head "Repairs."

Tools and Plant.

The expenditure under this head has exceeded the budget allotment by Rs. 77-3-3. The excess is owing to the purchase of office boxes for the use of Vice-Chairman and District Engineer. The one hitherto used by the latter officer was taken by the Divisional Superintendent of District Road Works, Rajshahye Division, during his last inspection. The excess expenditure has, however, been met from the general savings on the budget.

S. K. MUKERJI,

Vice-Chairman, District Road Cess Committee, Rungpore.

No. , dated Bogra, the

From—The Chairman, District Road Cess Committee, Bogra,
To—The Commissioner of the Rajshahye Division.

I HAVE the honour to submit herewith the annual account and report of the District Road Fund operations for the cess year ending 30th September 1885.

2. The Cess Act has worked smoothly. The total cess collections amounted to 101·8 per cent. on the amount entered in last year's budget as the year's demand.

* * * *

4. The District Road Fund and the District Engineer's offices were inspected by the Assistant Examiner of Accounts during the year, and the suggestions made by him were generally carried out.

5. The different establishments under the committee worked on the whole fairly well. This is subject to the explanations contained in paragraph 10.

6. As stated in my reports of previous years, the principal roads in the district are above high flood level and bridged. None of the roads are metalled, but most of them were easily drivable throughout the year, and many of them in a really good condition. All other minor roads were maintained during the year, and some were considerably improved.

The Doobchachia Burigunge and Khetlal Shirhutty roads, which existed only in parts, are now complete.

The two feeder roads—Joypore to Joypore Hât, and Sonamookhee to Nowabgunge—constructed by the Public Works Department, were taken over to be maintained on the District Road Cess Fund. The former has been included in the list as No. 37. The latter road, viz, Sonamookhee to Nowabgunge, is not separately entered in the list, as it is already included in the Doobchachia Nowabgunge road, which is borne on the list as No. 13. The part from Sonamookhee to Nowabgunge of this road having been realigned, embanked, and bridged by the Public Works Department.

7. Rupees 1,802-15 were spent from the village road allotment on the following works :—

		Rs.	A.	P.
1.	Bhanderpore to Nowabgunge	70	0	0
2.	Gybanda	50	0	0
3.	Madla	60	0	0
4.	Narhatta	150	0	0
5.	Doobchachia Dhup	89	5	5
6.	Hilli Ghoraghat	339	0	11
7.	Dhunot road	50	0	0
8.	Khas mehal	930	0	0
9.	Hilli Town road	14	3	11
10.	Baniadighi hât	50	4	9
	Total ...	1,802	15	0

8. *Arboriculture.*—During the last year young jack and mangoo trees were planted on the sides of the Doobchachia Burigunge and parts of the Serajgunge, Rungpore, Dinagepore, and Sultanpore roads. The following is a statement of trees planted up to date on roads of the district:—

NAME OF ROAD.	Length of road planted.	Number planted last year	Number of trees planted	Total.
Doobchachia Burigunge ...	Whole way ...	880	880	
Matidally cross	Ditto ..	.....	136	
Rungpore	Up to 6 mile ...	400	941	
Dinagepore	,, 11½ ,, ...	100	1,434	
Sharyakandy	,, 8 ,, ...	.....	744	
Serajgunge	,, 13½ ,,	1,000	2,392	
Nattore	,, 4 ,, ...	.....	700	
Sultanpore	,, 26 ,, ...	.....	3,146	
		2,380		10,373

The whole of this large number of trees are growing vigorously and excellently, with few or no failures. It is confidently expected that in a few years these trees will form a source of a very considerable income to the Road Cess Fund.

9. In the current year's budget provisions have been made for repairing, maintaining, and improving all the existing roads of the district as far as the funds allow, as also for the completion of the remaining work of the Gobaile to Durgapore relief road.

10 The District Engineer has given satisfaction in the discharge of his duties, and the good state of the Bogra roads generally is a tangible proof of his being a good, efficient officer. The cases of the late accountant and head clerk and of the estimator were specially reported to you, and have all been disposed of otherwise, and since the road cess establishment has worked fairly well.

FORM OF AUDIT CERTIFICATE.

I HEREBY certify that books and accounts specified below prescribed for the Road Cess office and for the office of the District Engineer are duly kept up, and that they have been posted for the month of and have been duly scrutinized by the Sub-Committee.

Also that the treasury officer's abstract of the accounts of the Committee for the year have been duly received, checked with the cash and pass books and found to agree therewith (except in respect of uncashed cheques, which are above enumerated, and have been duly noted in cash book).

That the vouchers for the payments of the months have been cancelled.

That all necessary steps have been taken for the recovery or adjustment of outstanding advances.

That none but duly sanctioned expenditure has been incurred, and that in case of original works the register of monthly expenditure shows clearly the amount of sanctioned estimate, the grant for the year, and the expenditure of each work to end of the month, and generally that the work of the office has been performed with carefulness and regularity and with due observance of the rules prescribed by Government.

MOHES CHANDRA SEN,
Vice-Chairman.

Explanatory Note to accompany the Annual Accounts.

RECEIPTS.

Cess on Lands.—The arrear outstanding at the close of the preceding year was collected during this year; hence the collection was larger than the amount budgetted for.

Rent of Road Cess Bungalow.—The decrease under the above head is caused owing to the road cess bungalow having been burnt down by the fire taking place on the 21st April last, and it has not been reconstructed; hence the amount realized under this head during the year was less than that estimated for.

EXPENDITURE.

Percentage Cost of Establishment for the Offices of Account and Control.—The excess expenditure under this heading is owing to the payment of a part of demand for the previous year having been made during the year under report.

Original Works.—Compensation for land acquired for the Jeypore-Khetlal, Hilli-Pattiram, and Gohail-Durgapore roads have not yet been paid, and hence the savings under this head.

Kancha Godown in the Road Cess Office Compound.—This work was completed during 1883-84, but owing to the contractor's absence the part of his demand was paid during the year under review.

Repairs.—The excess expenditure on road No. 3 was incurred for keeping the road drivable during the rains. A larger quantity of sand being thrown on this road for the purpose than was estimated for.

Nothing was spent on road No. 20 by the Committee. This road was transferred to the Department Public Works for reconstruction.

The increase of Rs. 249, Rs. 748, Rs. 43, Rs. 438, Rs. 326 6, and Rs. 110 for repairs to the roads Nos. 1, 4, 10, 14, 23, and Mokamtollah bungalow, respectively, as shown in the column "Amount as per budget estimate," over the amount shown under those heads in the Road Fund budget estimate is due to subsequent appropriations sanctioned by the Committee from the savings of other roads.

MAHES CHANDRA SEN,
Vice-Chairman.

No. 45D.R., dated Pubna, the 19th December 1885.

From—C. VOWELL, Esq., Chairman, District Road Cess Committee, Pubna,
To—The Commissioner of the Rajshahye Division.

UNDER section 179 of the Cess Act, I have the honour to submit the Road Fund annual account and report for the cess year 1884-85.

2. *The working of the Cess Act.*—The Cess Act worked smoothly as in previous years. People now complain, not of having to pay the cess, but of having so little in return for it in the shape of new and embanked roads.

3. *Working of the District Committee.*—Such of the committee as attended evinced a lively and intelligent interest in their work, but as usual mofussil members were seldom present at meetings.

* * * *

4. *The working of the Branch Committee.*—The Chairman of the Branch Road Cess Committee of Serajgunge reports that it was rather difficult to induce the members to take any very lively interest in their work, having but little to do on account of the limited funds at their disposal. The allotment for tracks and village roads for the Serajgunge sub-division was at the disposal of the Branch Committee, and they have performed the work satisfactorily.

5. *Original Works.*—Under the head of "Original Works" very little was done, and nothing that deserves specific mention. Some of the works provided for were not undertaken, the estimates having been prepared and sanctioned late in the year, and owing also to the paucity of the supervising staff.

6. *Repairs.*—All the roads and tracks in the district were repaired and maintained in fair order. It should be stated here that towards the close of the year the unusually high flood did very heavy damages to the roads, especially to those of the Pubna sub-division. This liability to damage by flood is a great drawback to roads in this district, as almost every year the work of the previous years is to a great extent undone during the rains.

7. *State of the Roads as a whole, whether improved or deteriorated.*—I have not myself seen many of the roads yet, but despite the damage done by the floods, those that I have seen are somewhat improved in appearance.

8. *Village Roads.*—The expenditure on village roads was Rs. 678-1-9 in the Pubna sub-division, and Rs. 737-12 in Serajgunge, out of an allotment of Rs 2,000. In some cases the work was done by departmental agency, and in others the grant was made over to the villagers to be spent by them as best suited their convenience. The people of the villages of Taras and Gudhibari in Serajgunge, and Saruria and Koladi in Pubna, contributed Rs. 150, Rs. 50, Rs. 20 and Rs. 10 to supplement the grant sanctioned for their respective villages.

9. *Planting of Trees.*—Almost nothing was done during the year on planting of new trees on roadsides. The trees planted in previous years were well tended.

10. *Audit and Inspection of Accounts.*—The accounts of the Road Cess Committee's and the District Engineer's offices were regularly audited by a standing sub-committee. In a few cases the audit, instead of being monthly, was taken up a month after being due, in consequence of the inability of the members to meet at the proper time. The result of the audit was satisfactory The accounts were inspected in January last by the Inspector of Local Accounts, and his report does not point to any material defects in the accounts.

WORKING OF THE ESTABLISHMENTS.

11. *Establishment for collection of Cess.*—The collections are good, despite heavy work thrown on the staff by the revaluation of lakhiraj properties

Establishment on Works.—I have not yet seen enough of the work to be able to pass a decided opinion, but there seems to have been some delay in starting preliminary repairs necessary to make roads at once passable.

PROTAP CHANDRA ROY,
Vice-Chairman.

Explanatory Memoranda on the Road Fund Annual Account for 1884-85.

THE increase of Rs. 379, Rs. 67, and Rs. 375 in the allotments for original works and repairs and public works establishment, respectively, as shown in the column "Amount as per budget estimate" of the annual account for 1884-85 over the amounts shown under the same heads in Government, Public Works Department, Resolution No. 1469R.C., dated the 24th April 1885, is due to subsequent appropriations sanctioned in Commissioner's letter No. 14P.W., dated 14th May 1885, No. 27P.W., dated 18th May 1885, No. 73P.Wct., dated 28th July 1885, and No. 62P.W., dated 12th September 1885.

2. The decrease of Rs. 863-12-6 and Rs. 1,200 in the amounts shown in the annual account against "Fees, fines, and forfeitures" and "Miscellaneous," respectively, as compared with the corresponding figures shown under the same sub heads in the column for progressive totals in the schedule of receipts for September 1885, is due to the amounts having been transferred to the sub-heads "Advances" and "Grant from Government" in accordance with the instructions contained in paragraphs 4 and 5 of the Government Resolution quoted above.

3. The decrease and increase of Rs. 1,166-14-6 in the amounts shown in the annual account against provincial rates and advances, respectively, as compared with the corresponding figures in the schedule of disbursements for September 1885, are to be accounted for as above.

PROTAP CHANDRA ROY,
Vice-Chairman, District Road Committee, Pubna.

PUBNA,
The 4th December 1885.

No 223, dated Darjeeling, the 7th January 1886.

From—W. B. OLDHAM, ESQ., C.S., Deputy Commissioner and Chairman, District Road Cess Committee, Darjeeling,

To—The Commissioner of the Rajshahye Division.

I HAVE the honour to forward the annual report and accounts of the District Road Fund, Darjeeling, for the cess year ending 30th September 1885.

2. The balance at credit of the fund on 1st October 1884 was Rs. 11,508-13-3: the revenue collected under the several heads made up a total of Rs. 42,638-15-2. The total expenditure during the year was Rs. 26,617-5-1, leaving a balance of 16,015-10-1 available for the current year.

3. During the year under review, out of the current demand, sums of Rs. 17,841 and on account of the arrears Rs. 585 were collected, making in all a total of Rs. 18,426. This includes Rs. 460 collected in advance during the previous years. Rupees 17,561 were realized during this year, leaving Rs. 403 unrealized at its close.

There was also a remission of Rs. 2 only.

4. The number of meetings of the District Committee held during the year was three. The average attendance was four out of eight officials, and six out of 18 non-officials. There was only one meeting of the Terai Branch Committee held at Silliguri.

5. As in former years, the planter members took a very lively interest in the proceedings of the Committee, and rendered considerable assistance in supervising the expenditure of grants made to them for repairs to roads in their neighbourhood.

6. The list of district roads contains 21 hill roads and 11 terai roads, same as last year.

7. The Government grant for the execution of original works not being available during the year, the Committee resolved to undertake the same from their own savings, and make the necessary appropriations. The plans and estimates for bridging the hill streams were prepared, but are now pending before the Government of Bengal, Public Works Department, for sanction; consequently nothing further could be done.

8. Rupees 4,756-5-10 were spent on hill roads, Rs. 6,723-0-6 on the terai roads, making a total expenditure of Rs 11,479-6-4. Besides the above, a sum of Rs. 614-11-6 was spent on village roads in the Terai. As reported last year, no expenditure was incurred on arboriculture.

9. The Cess Act worked smoothly during the year, the total collection being 100 5 per cent. on the current demand.

10. The establishment worked on the whole satisfactorily. An incompetent overseer has been replaced by a qualified District Engineer.

11. The Road Fund Office was not inspected by the Examiner of Local Accounts during the year under report.

Explanatory Memorandum to accompany the Annual Accounts for the cess year 1884-85.

RECEIPTS.

(1.) THE arrear outstanding at the close of the preceding year was fully collected during this year; hence the collection was larger than the amount budgetted for.

(2.) The increase is due to an additional grant of Rs. 1,000 made from the one-anna cess fund during the current financial year, *i.e.*, after the budget estimates were framed.

EXPENDITURE.

(3.) The excess over allotment under this heading is owing to the payment of a part of the demand for the previous year having been made during the year under report.

(4.) The following original works have not been taken up, the Government grant for their execution not being available during the year—*vide* Government order No. 46TB, dated 30th April 1885, communicated with the Commissioner's No. 20PWct, dated 2nd May 1885:—

1. Bridge over Little Rungeet at Pulbazar on road No. 2.
2. Ditto Mohanudi on road No. 14.
3. Ditto Rungbong on road No. 13.
4. Ditto Balasun at Namsoo on road No. 15.

(5.) The allotment for the original work on road No. 18 was transferred under the head "repairs" to that road—*vide* Commissioner's No. 200PWct, dated 19th March 1885. This also accounts for the increase of allotment for repairs to that road.

(6.) The expenditure on some of the works under the head "repairs" exceeded the budget grants, but the extra cost was met from the savings under other items of repairs. In other cases in which excess expenditure is shown it occurred in the following way. The expenditures on works executed in the previous year were adjusted during the current year, and thus the expenditure appears to be in excess over the allotments provided in the budget of the year under report.

(7.) Rupees 230-3-8 were actually expended on the road No. 15, but as the detailed account was not received during the year, the necessary adjustments have not been made.

(8.) The following bridges were repaired during the year at a cost of Rs. 810-2 sanctioned by the Committee, after the preparation of the budget estimates in order to keep the traffic open during the rains:—

1. Bridge over the Little Rungeet at Pulbazar.
2. Numsoo cane bridge.
3. Cane bridge over Great Rungeet.
4. Rungbong bridge (temporary).

(9.) The expenditure incurred on account of pay of overseer and his peon was met from the provision of Rs. 4,800 made for the District Engineer and his establishment. The Committee thought it necessary to retain the services of the overseer till the District Engineer could join his appointment.

A. RATTRAI,

Vice-Chairman, District Road Cess Committee, Darjeeling.

No. 51, dated Julpiguri, the 19th December 1885.

From—G. J. B. T. DALTON, Esq., Deputy Commissioner and Chairman of the District Road Cess Committee, Julpiguri,

To—The Commissioner of the Rajshahye Division.

I HAVE the honour to submit herewith, in duplicate, the annual accounts of income and expenditure of the Julpiguri District Road Fund for the cess year ending 30th September 1885, and to report as follows.

* * * * * * *

3. *Branch Committees.*—There are no Branch Committees in this district.

4. *Feeling of people towards Road Cess.*—Nothing has transpired during the year to throw any fresh light on the real feelings with which the people regard the tax.

It is paid willingly enough, and probably by the poorer classes looked on as an addition to their rent, much the same as any other enhancement. The better classes, however, appreciate the benefit to be derived from improved communications, and petitions are frequent asking that more may be done for particular tract.

The tea-planters, as a body, although they pay little road cess, seem to think that it is the Committee's duty to find money for their roads somehow. They would, I think, readily pay far more than they do. The next valuation will bring a large number of gardens on the list of cess-paying estates, which at present pay nothing.

5. *State of Roads.*—All the important roads in the district, except portions of the Dalimkat and the Nagrakuta roads, were in traffic order all the year round. Petty repairs to the principal roads, when required, were executed as promptly as possible. For execution of petty repairs to the roads gangs of Dhangar coolies were entertained throughout the

year. All the roads under the Committee, as per the printed list, were repaired and maintained in order so far as the limited funds at the disposal of the Committee admitted. Owing to the retention of Rs. 10,000 as a working balance, no important original works, except the reconstruction of few bridges on the Julpiguri to Alipur road, were undertaken during the year under report.

6. *Village Roads.*—A sum of Rs. 1,580 was allotted in the budget estimate for the repairs of village roads. Of this allotment Rs. 1,434-2-9 was expended during the year. All the village roads provided for in the estimate were repaired.

7. *Tree-planting.*—Rupees 200 was allotted in the budget under this head, and Rs. 200-4-6 was expended during the year. Some sissoo, jack, and mangoe trees were planted on the side of the Damdim, Alipur, and Nagrakuta roads. They are thriving well, and strong bamboo fences have been provided for their protection. The Indian rubber trees planted on the side of the Julpiguri to Damdim road are also thriving well.

8. *Work Establishment.*—The establishment on work consists of one District Engineer, one overseer, and two sub-overseers.

The District Engineer, Baboo Gagen Chunder Biswas, proved himself a zealous and effective officer throughout the year. He is very active and hardworking, and gave me general satisfaction. He reports well of his subordinates, whose qualifications do not come much under my personal observation.

9. *Committee's Establishment.*—The establishment of the Committee consists of one head clerk and accountant, and one assistant clerk. The head clerk and accountant keeps the accounts and books prescribed by Government of the offices of the Committee and the District Engineer, as the latter has no separate accountant for his own office. The head clerk and accountant, Baboo Chandra Mohun Dass, continued throughout the year, and deserves credit for the efficient discharge of his duties. He is a very intelligent young officer.

His subordinates on the whole worked well.

10. *Inspection of Office.*—The office was inspected by W. H. Dobbie, Esq., Examiner of Local Accounts, Bengal, on the 28th and 29th January 1885. He found that the accounts in the office of the Vice-Chairman were neatly and accurately kept. He suggested that the talabana accounts of the collection department should be treated and accounted for as advances, and that the District Engineer should keep in his office a challan book for money remitted by him, such as sale proceeds, &c., and a register of works.

11. *Audit of Accounts.*—The accounts of the Committee were audited and passed monthly by a standing sub-committee, consisting of the Vice-Chairman and two other members of the Committee. The annual accounts were passed by the Sub-Committee on the 25th November 1885, and by the General Committee held on the 30th November 1885.

* * * * * * * *

13. *Explanations of Excess Expenditure over Budget Allotments.*—Budget allotment to the Julpiguri to Alipore road original work (old estimate) has been exceeded by nearly Rs. 300. This is owing to reconstruction of bridge No. 11 in the 9th mile of the road, which was not provided for in the budget. Budget allotments for original and repair works have nowhere else been so far exceeded as to call for an explanation.

PREO NATH BANERJEE,
Vice-Chairman, District Road Committee.

No. 5P.Wct., dated Darjeeling, the 14th April 1886.

From—LORD H. ULICK BROWNE, Commissioner of the Rajshahye Division,
To—The Secretary to the Government of Bengal, Public Works Department.

I HAVE the honour to forward in original the District Road Fund annual accounts and reports of the several districts of this division for the cess year 1884-85.

2. The reports and the accounts of the districts were received in my office in proper time, but most of them had to be returned for revision, and the revised account of one district was not received till March 29th, 1886.

3. Under the instructions in paragraph 6 of Government circular No. 973A., dated 14th September 1880, my report will be brief.

4. *Receipts and Expenditure.*—The year opened with a balance of Rs. 1,15,596 in the hands of the several committees in the division, and the total revenue of the year was Rs. 4,71,620 against Rs. 5,28,681 of previous year. The falling off of Rs. 57,061 is on account of the contribution of Government being less by Rs. 56,208 than in the previous year.

The net disbursements of the year amounted to Rs. 3,74,666, against a budget allotment of Rs. 4,73,812. This short expenditure is partly due to contemplated original works in the Pubna and Darjeeling districts not being carried out for want of sanction, and to others in the Bogra district being unavoidably postponed, and partly owing to Government circular No. 2121R.C., dated 17th June 1885.

Ninety-one per cent. of the estimated expenditure on repairs was incurred.

5. *Original Works.*—The only original work of importance carried out in this division was the further progress made towards the completion of the Mahadebpore to Sultanpore feeder road, both by the Rajshahye and Dinagepore Road Cess Committees, and this year will see the completion of this important feeder road to the Northern Bengal State Railway.

Fair progress was made in Rungpore in the manufacture and collection of materials for bridge works, the estimates for which were received back too late to enable the works to be completed during the year.

6. *Repairs.*—All the roads in the lists of the Committees were repaired so far as the funds at their disposal permitted, and the general condition of the roads in this division continues to improve. I may say that during the dry season vehicles on springs can be driven with comfort over most of the roads in the division.

7. *Establishments.*—The expenditure on different establishments, exclusive of the Divisional Superintendent's charges, was 20 per cent. of the net aggregate income of the committees in this division, and the expenditure on account of the pay, travelling allowance, and contingent charges of the Divisional Superintendent of Works during the year amounted to Rs. 15,065, or 3·35 per cent. of the aggregate income of all the committees in the division, excepting Darjeeling, which does not contribute towards the cost of the Divisional Superintendent of Works.

8. Mr. Beatty has continued his efficient supervision over works and estimates and the movements of the District Engineers, and given the committees and myself much valuable advice and assistance.

Burdwan Collectorate, the May 1886. D. N. ADDY, Deputy Collector in charge.

NOTICE is hereby given that the proprietary right of Government to the undermentioned lands, known as Government Lottery Committee lands, situated in the Town of Calcutta, will be put up to sale by public auction at the Calcutta Collectorate at 12 A.M. on the 12th July 1886, corresponding with 29th of Assar 1293 B.S.

The purchase will be subject to the following conditions of sale :—

Conditions of Sale.

1*st*.—The lands to be sold to the highest bidder above the upset price. The purchaser of the lands will be considered as the proprietor of the lands, and the entire proprietary right of Government in such lands will be transferred to him subject to the payment of Government revenue of 3 annas per kottah.

2*nd*.—The sale to be subject to existing leases.

3*rd*.—If the amount of purchase-money do not exceed Rs. 100 (rupees one hundred), the whole amount to be paid at once.

4*th*.—If the amount of purchase-money exceeds Rs. 100 (rupees one hundred), one-fourth the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or if that be a close holiday, then by the noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the land to be again put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

PART III.

Act of the Bengal Council.

GOVERNMENT OF BENGAL.

LEGISLATIVE DEPARTMENT.

[Third Publication.]

THE following Act, passed by the Lieutenant-Governor of Bengal in Council, received the assent of His Honour on the 29th March 1886, and having received the assent of His Excellency the Governor-General on the 28th May 1886, is hereby published for general information :—

ACT No. II OF 1886.

An Act to amend Act II (B.C.) of 1866, and the Calcutta Police Act, 1866.

Preamble.

WHEREAS it is expedient to amend Bengal Act II of 1866 and the Calcutta Police Act, 1866 : It is enacted as follows :—

Commencement of Act.

1. This Act shall come into force from the date on which it may be published in the *Calcutta Gazette* with the assent of the Governor-General.

New section substituted for section 41, Act II (B.C.) of 1866, and section 68, Act IV (B.C.) of 1866.

2. For section 41 of Bengal Act II of 1866, and for section 68 of the Calcutta Police Act, 1866, the following shall be substituted :—

Penalty for drunkenness, or riotous or indecent behaviour, in public.

"Whoever is found drunk and is incapable of taking care of himself, or is guilty of any riotous or indecent behaviour, in any public street or thoroughfare, or in any place of public amusement or resort; shall be liable, on summary conviction before a Magistrate, to a fine not exceeding twenty rupees, or to imprisonment, with or without hard labour, for a term not exceeding eight days."

New section to follow section 68 of Act IV (B.C.) of 1866.

3. After section 68 of the said Calcutta Police Act the following shall be added :—

Penalty for committing a nuisance in streets.

"68A. Whoever wilfully and indecently exposes his person, or commits a nuisance, by easing himself in, or by the side of, or near to, any public street or thoroughfare or place, shall be liable, on summary conviction before a Magistrate, to a fine not exceeding ten rupees, or in default thereof, to imprisonment, with or without hard labour, for a term not exceeding three days."

Amendment of section 72 of Act IV (B.C.) of 1866.

4. After section 72 of the said Calcutta Police Act the following words shall be added :—

"if the name and address of such person be unknown to such police officer, and cannot be ascertained by him then and there."

GORDON LEITH,

Offg. Asst. Secy. to Govt. of Bengal,
Legislative Department.

LIBERALITY OF BABOO HURIHUR INDUR SAHAI.

GENERAL DEPARTMENT.—EDUCATION.

Darjeeling, the 18th June 1886.

RESOLUTION.

READ—

A letter from the Commissioner of the Patna Division, No. 341G, dated the 28th May 1886, reporting, for the information of Government, that Baboo Hurihur Indur Sahai, a resident of Manjha, in the district of Sarun, has contributed Rs. 5,000 towards the cost of construction of the "Thompson Goutama Patshala" building in the Revelgunge Municipality, and has also made a free gift to the school of his share of the land on which it is built.

The Lieutenant-Governor tenders his thanks to Baboo Hurihur Indur Sahai for his liberal donation in the cause of education.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette*, and that copies of it be forwarded to the Commissioner of the Patna Division for information and for communication to Baboo Hurihur Indur Sahai, and to the Director of Public Instruction, for information.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Offg. Secretary to the Govt. of Bengal.

TRANSFER OF THE MANAGEMENT OF CERTAIN GOVERNMENT COLLEGES TO LOCAL BODIES.

GENERAL DEPARTMENT—EDUCATION.

Darjeeling, the 18th June 1886.

RESOLUTION.

READ—

Letter No. 7102, dated 7th November 1885, from the Officiating Director of Public Instruction, Bengal.

Letter No. 2877, dated 29th April 1886, from the Officiating Director of Public Instruction, Bengal.

Re-read—

Paragraph 10 of the Resolution of the Government of India, in the Home Department, No. 1—60, dated the 3rd February 1882 (under which Resolution the Education Commission of 1882-83 was appointed). Recommendations on the subject of the transfer of the management of certain Government Colleges to the local bodies, contained in Chapter VIII, section 20 of the Report of the Education Commission, and the Resolution of the Government of India, Home Department, thereon, No. 10—309, dated the 23rd October 1884.

Paragraphs 16 and 17 of letter No. 2285T—G, dated 25th September 1884, from the Government of Bengal, addressed to the Government of India, on the subject of the Report of the Education Commission.

Paragraphs 13 and 33 of Resolution No. 10—309, dated 23rd October 1884, by the Government of India, in the Home Department, on the above-named Report.

Paragraph 4 of letter from the Government of India, in the Home Department, No. 323C, dated 28th October 1884.

Paragraph 2 of letter No. 9427, dated 30th December 1884, from Mr. C. B. Clarke, Officiating Director of Public Instruction, Bengal.

Paragraph 7 of letter No. 229, dated 15th June 1885, from the Government of Bengal, addressed to the Director of Public Instruction, Bengal.

The Government of India, in the Resolution appointing the Education Commission of 1882, expressed a desire to offer every encouragement to native gentlemen interested in the subject to come forward and assist even more extensively than they had done previously in the cause of public instruction, considered necessary to secure that freedom and variety which are essential conditions in any sound and complete educational system. The Resolution continues :—

"The Government is ready therefore to do all that it can to foster such a spirit of independence and self-help. It is willing to hand over any of its own colleges or schools in suitable cases to bodies of native gentlemen who will undertake to manage them satisfactorily as aided institutions; all that the Government will insist upon being that due provision is made for efficient management and extended usefulness. It will be for the Commission to consider in what mode effect can most fully be given to these views, and how the grant-in-aid system may best be shaped so as to stimulate such independent effort, and make the largest use of the available Government funds."

2. The Education Commissioners, in discussing the subject, observed that if, as had been shown, private enterprise even now produces results which are found by ordinary tests to be by no means unsatisfactory, and produces them at an average cost in colleges of one-eighth, and in secondary schools of one-fourth the amount spent on each pupil in departmental institutions, it does not seem unreasonable to hope that it will at some future period meet all, or all except the very highest, educational wants of the community at an expense to public funds that will be little more than nominal. They were in favour of a gradual and cautious withdrawal of the State from the immediate management, as distinguished from the control, of colleges, and their specific recommendations were as follows :—

"That in dealing with the question of the withdrawal of Government from the management of existing colleges, these colleges be regarded as divided into three classes, viz.—

(1) Those from which it is premature for Government to consider the propriety of withdrawal on the ground that they are, and will long continue to be, the institutions on which the higher education of the country mainly depends.

(2) Those that might be transferred with advantage, as a measure promising useful political results, to bodies of native gentlemen, provided the new managers give satisfactory guarantees that the colleges will be maintained (*a*) permanently, (*b*) in full efficiency, (*c*) in such a way as to make it adequate for all the wants of the locality.

(3) Those which have been shown to be unsuccessful, or of which the cost is not of proportion to the utility, and from which Government might advantageously withdraw even with less stringent guarantees for permanent efficiency. Such colleges should be closed if, after due notice, no local body be formed to carry them on with such a grant-in-aid as the rules provide."

* * * We have therefore no hesitation in recommending that the Government of Bengal be requested to consider the propriety of dealing with the Rajshahye and Krishnagur Government colleges on the principle applicable to the second class, and with the colleges at Berhampore, Midnapore, and Chittagong on the principles applicable to the third class, as suggested by the Bengal Provincial Committee.

3. In the Resolution recorded by the Government of India in the Home Department, under date the 23rd October 1884, on the report of the Commission, it stated that—

"The Government of India accepts the cautious and well considered proposals of the Commission on the subject of the gradual withdrawal of the Government from the charge of institutions of a high order, and especially from colleges These recommendations are quite in accordance with the policy of Government as explained in paragraph 10 of the Resolution appointing the Commission. It is left to the Local Governments to give effect to the recommendations on this subject gradually and as local circumstances permit. It is, as has been repeatedly declared, in no degree the wish of the Government of India to discourage high education in any way whatever. On the contrary, it believes it to be one of its most important duties to spread and foster it. What it specially, however, desires is to secure assistance to the limited funds of the State by calling forth every available private agency in connection with every branch of public instruction. It is in connection with high education, and in view of the direct pecuniary advantages which it holds out to those who follow it, that the Government thinks it can most properly insist on the fullest development of the principle of self-help."

4. The Lieutenant-Governor took an early opportunity of intimating his agreement with the views expressed upon this subject by the Commission, and of instituting enquiries with a view to give practical effect to their recommendations. An application recently received from Narail, in the district of Jessore, for the establishment at that place of a college on the grant-in-aid system, is receiving the favourable consideration of Government, and it is hoped that such an institution upon an independent basis will be opened before the end of the current year. The colleges of Rajshahye and Krishnagur will be transferred only in case any body of native gentlemen can give adequate guarantees for permanent and efficient management, and as yet no arrangement under such conditions has been possible It has been represented, with regard to Chittagong, that the town is so isolated and cut off from other centres of education that there are good reasons for maintaining a college in it, whether a local body comes forward to undertake the management or not. In all these cases, while inviting offers from residents of position, it is necessary to wait until public opinion has matured, and the change recommended can be effected with the cordial co-operation of all concerned. In the meantime attention of public officers is drawn to the following passage in the report of the Commission as indicating the attitude they should at present adopt:—

"Of course a Director has no means of compelling private parties to come forward, and in ordinary cases we are not prepared to recommend the closing of departmental institutions which local effort is not willing to provide for. But a Director, and still more a Government, can do much to influence public opinion, and patient persistence in carrying out the policy of withdrawal whenever a suitable opportunity occurs will doubtless make it generally felt in course of time that all should co-operate in such measures who are capable of taking broad and comprehensive views of popular education and its true necessities."

5. The Midnapore College dates its existence from January 1873, when the people of the district, with much public spirit, subscribed a sum of Rs. 60,000 for the purpose of improving the status of the zillah school; and in consideration of this fact Sir George Campbell, in sanctioning the establishment of the college and law classes, fixed the Government grant at Rs. 3,000 a year for the following five years These classes were to be maintained from a sum of Rs. 3,000 representing interest on endowments, and fees estimated at Rs. 1,200, the Government grant of Rs 3,000 being devoted to defraying the expenses of the school department alone. The charges properly debitable to the college largely exceeded the estimated Rs. 4,200; and on a redistribution of the expenditure between the two departments in 1878, it was ascertained that, while the College Department was working at a loss of Rs. 1,600 a year,

there was an annual profit in the School Department of over Rs. 3,000. The Government grant was then redistributed, Rs. 2,000 being assigned to the college and Rs. 1,000 to the school. The limit of Rs. 2,000 for the college, however, was not very strictly observed, and the Government contribution to the College Department increased, with increase of expenditure, from Rs. 2,077-1-4 in 1880-81 to Rs. 2,850-2-8 in 1883-84. In 1884-85 large reductions were effected, and the Government grant dropped to Rs. 623-8-6 in that year, and to Rs. 406-15-7 in 1885-86. The receipts from interest on endowments and from fees in 1885-86 were Rs 2,912-10 and Rs. 1,649-11 respectively, or Rs. 4,562-5 together; and as the total expenditure was only Rs 4,969-4, it appears that the income from these two sources is almost sufficient to meet all the current expenses of this college, the amount contributed by Government during the past year having amounted to little more than 8 per cent. of the whole receipts.

6. The School Department of this institution, known as the Midnapore Collegiate School, has hitherto received a fixed annual grant of Rs. 1,000; and its total income, including the grant, in 1885-86 was Rs 7,282-1, while the expenditure amounted to Rs. 6,813-14-3. The Municipal Commissioners of Midnapore have now offered to take over the management of the Midnapore College without making any reference to the school; but it has been strongly urged by the District School Committee, whose arguments are emphatically endorsed by the Inspector of Schools and the Director of Public Instruction, that the collegiate school should go with the college. It is represented that they are in fact two departments of one institution, sharing the expenses of a common establishment, viz the head pundit, the clerk, the librarian, and menial servants; sharing also the same library, and working on the same premises. It is clear to the Lieutenant-Governor that, under these circumstances, division of management would only lead to grave inconveniences; and there appears to be no objection to transferring the school, as well as the college, to local management. The Education Commission recommended that all Directors of Public Instruction should aim at the gradual transfer to native management of Government schools of secondary instruction (including schools attached to first or second grade colleges), whenever the transfer could be effected without lowering the standard or diminishing the supply of education, and without endangering the permanence of the institution transferred. The Commission further advised that the experiment should begin with schools which had already won a high position, and laid down the following test:—"The fact that any school raises more than 60 per cent. of its entire expenditure from fees to be taken as affording a presumption that the transfer of such school to local management can be safely effected." This test, which was accepted as reasonable by the Lieutenant-Governor, has been fully satisfied in the case of the Midnapore Collegiate School.

7. The average sum required from Government by the college during the last two years has been Rs. 514; but the Lieutenant-Governor recognises the fact that the expenditure, especially on contingencies, must vary from year to year, and to provide for possible increases he is willing to allow a net grant of Rs. 600 to the College Department. He is also prepared to continue the present grant of Rs. 1,000 to the School Department. Both grants will be made for three years, after which period they will, if necessary, be revised.

8. The Lieutenant-Governor is assured that the Midnapore Municipality, or a body constituted under section 64 of the Local Self-Government Act, 1885, will be willing to assume the management of both the college and school on the terms above indicated. The Lieutenant-Governor therefore will be glad if the Director of Public Instruction will take the earliest opportunity of giving effect to the transfer of the double institution on the conditions stated in the present Resolution.

9. The Berhampore College was first opened in 1853. It was raised in 1865 to the status of a full college teaching the B A. course, but in 1872 it was reduced to a lower class, teaching only up to the F.A. standard, on the ground that the Calcutta and Hooghly Colleges would suffice for such of the Berhampore students as might desire a more complete education. In 1879 it was noticed, in the Government Resolution on the Educational Report for 1878-79, that the number of students had fallen to 32, and that each of these cost the Government

Rs. 605 a year—about twice the average expense at a Government college. The question of the abolition of the institution was then taken into consideration; but although it appeared that this step would set free funds which might probably have been employed elsewhere with greater benefit to the educational needs of the province, the Government was unwilling, having regard to the past history of the college, and the feeling of the people of Moorshedabad on the subject, to adopt the extreme measure of final closure. The opportunity was, however, taken to make certain changes in the establishment with the view of at once increasing efficiency and diminishing expenditure. The effect of these reforms was to reduce the cost of education to a nearer approximation to the provincial average, and in 1884-85 the average total cost of educating each scholar was Rs. 376, the cost to Government being Rs. 253.

10. The number of students at the Berhampore College continues to be much the same as in 1878-79, and the proportion of the expense of their education borne by the State is still excessive. The monthly cost of maintaining the institution is Rs. 1,185, and the income derived exclusively from fees is only Rs. 167. In this case no direct offer has as yet been received from any local body to take over the charge of the institution, but it is understood that proposals for that purpose may soon be made. Government will be prepared to give to any responsible and suitable managers the maximum grant-in-aid allowed by the rules, and to make over considerable endowment funds for a hostel, as well as for buildings and for scholarships in connection with the college. There is a school attached to the college, the management of which should be transferred at the same time and on the same conditions.

11. In pursuance of the policy indicated by the Education Commission, and affirmed by the Government of India, it will be necessary, in the Lieutenant-Governor's opinion, to close the Midnapore and Berhampore Colleges if no arrangement can be made before the 1st of May 1887 for the transfer of their charge. It is thus left to those interested to determine for themselves whether these institutions shall continue to exist, and the Lieutenant-Governor confidently anticipates that the public spirit and interest in high education, for which both the important districts immediately affected are remarkable, will be found equal to the occasion.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Offg. Secretary to the Government of Bengal.

The 22nd June 1886.—The following is published for general information.

P. NOLAN,
Offg. Secretary to the Government of Bengal.

CYCLONE OF SEPTEMBER 1885 IN THE ORISSA DIVISION.

No. 840, dated Cuttack, the 7th of May 1886.

From—C. T. METCALFE, Esq., C.S.I., Commissioner of the Orissa Division,
To—The Offg. Under-Secretary to the Government of Bengal, Revenue Dept.

WITH reference to your No. 21391—R, dated 3rd November 1885, and subsequent reminders, I have the honour to submit a further report on the cyclone of September 1885, confining my narrative as to the extent of damage done in the districts of this Division.

2. Mr. Grant's report No. 982, dated 25th September, which had been forwarded direct to you, gave details of the injury caused on the northern twenty miles of the coast of his district. He promised a further report about the condition of the rest of his district, and directed the Sub-Divisional Officer of Bhadruck to make enquiries. Since then petitions were received from the tenants of the Government estate Birso, praying for relief on account of loss of their crops. These petitions were enquired into both by the khas tehsildar of Balasore and the sub-divisional officer. As the results of the first enquiries were too speculative in their character to be reported, it was thought best to wait till the loss actually suffered could be estimated by the outturn of the harvest.

3. From the Collector's report it is clear that, of all the other parts of the district of Balasore, the tenants of the Government estate Birso had lost most in crops and cattle. In speaking of the state of the crops on this estate in his letter No. 1096, Mr. Grant then observed:—"What I do know is that half the crop is certainly lost, that about half the rest (one-fourth of the whole) seems safe, and that the other half is doubtful. I say that one-fourth seems safe, because credible persons affirm that even that is not safe. It looks well and flourishing now, but I am assured that, when the moisture around the roots dries up, the small amount of salt it holds will become fatal because of its being then left undiluted."

4. The Government estate (Birso) is situated on the sea-face of the district; a small sketch map of the part of the country in which it lies is herewith annexed. At the northern portion of this tract, the Goomai river crosses the coast canal and falls into the sea. The banks of the canal have been cut away for a length of 1,000 feet to allow the river to pass over it. Immediately to the south of Goomai a sea embankment runs southward along the coast in a direction parallel to the coast for some 12 or 14 miles. To the west of this embankment runs the coast canal embankment, and the Government estate of Birso lies between these two embankments. The bulk of the sea-wave flowed southward between the canal embankment and the sea embankments. These latter prevented the prompt return of the salt water to the sea, and consequently the area between the double banks suffered more than any other part by the wave.

5. After the crops had been harvested, it appeared that most of the tenants in this estate had lost either their whole crop, or at least three-fourths of it. In the way of relief they asked for—

(1) a remission of the entire rent for the year 1293 F. S.;
(2) a postponement of the unpaid 3 annas kist for the year 1292 till the beginning of 1294,
(3) a tuccavi advance of Rs. 1,000 at the time of the harvest.

Of these proposals Mr. Grant refused to admit the second, and I agreed with him that it would be inexpedient to grant remissions of *past* arrears on account of unforeseen *present* calamities, which at best are only temporary in their effects. The first and third proposals were recommended to the Board in my letter No. 432, dated 16th February, and sanctioned in their No. 76A, dated 18th March last. Copies of this correspondence are herewith submitted for the information of Government.

6. The report of the khas tehsildar showed that Nuanand also suffered from the effects of the cyclone; but there was very little loss of paddy crops in the estate. Here, as in other parts of the Balasore district over which the cyclone passed, there had been a large number of huts and trees blown down by the wind. In some places the sugarcane plants were uprooted, but the loss caused thereby is reported to have been very slight, and no notice has therefore been taken of it.

7. In addition to the damage done in Government estates as above described, I have received no authentic reports of any other parts of the district having been injured in any appreciable extent by the late sea-wave and cyclone. Happily the greater portion of the sea coast is covered with jungle and is uninhabited, otherwise the loss of life would have been much greater. Happily also the centre of the storm travelled in a narrow track, thus limiting the injury. Some of the tenants of pergunnahs Ankura and Bhera submitted two memorials to His Honor the Lieutenant-Governor during his recent visit to Orissa. These were forwarded to me with your memorandum No. 3700—350Fam., dated 28th December last. The tenants complained of loss of other crops and scarcity of fresh water for drinking purposes, &c.

8. The properties situated in these pergunnahs are private properties of zemindars, and although their crops suffered from the violence of the wind, they were not affected by the sea-wave, which was stopped by the embankment of the sea coast canal Whatever may be the financial result of this canal, it has at least proved of great service in protecting life and property. But for its embankment, hundreds of square miles would have been submerged, with much loss of life and absolute destruction of crops. During my visit to this part of the division after the cyclone, it was remarkable how all the land to the south of the canal looked black and charred, and wherever the salt water had reached, the vegetation was burnt up. The effect of this canal bank shows the advisability of constructing an embankment in Kuldeep and Kurara.

9. In the interior of the Cuttack district, about Jajpur, there was great destruction of trees and houses. Three hundred lives were lost by falling trees, walls and homesteads. The Executive Engineer's house at Aquapada was entirely wrecked, the roof bodily carried away, and some of the masonry pillars destroyed; the Europeans (one a lady) at the time in the house were driven outside, and were for some hours exposed to the violence of the wind and rain. At times they were unable to stand and lay on the ground, moving forward when the wind lulled, and again throwing themselves down when the terrific gusts came.

10. The storm also passed into the Gurjats, the centre travelling into Keonjhar. At Nilgiri, a little to the east of the centre, the storm was a strong gale only; but where the centre passed the destruction of trees in the forest was very great; the roads were completely blocked by fallen timber and rendered impassable even for elephants.

11. It is marvellous how quickly the villages have recovered from the effects of the storm. Trade was for a time suspended, whilst the inhabitants set to work to repair their homesteads, but within a short time few vestiges of the destructive character of the storm remained. Enquiries have shown that nowhere was there such complete wreckage of house property with total destruction of crops as in Kuldeep and Kurara and in part of Koojung.

12. The Government is already in possession of the steps taken to relieve the people by systematic distribution of grain to the survivors, of whom lists were immediately made, and later by advances of money, which are now being given under the orders of the Board and Government. Work was commenced very shortly after the storm-wave in cutting channels from the drinking tanks to draw off the salt water, and in digging out the salt impregnated soil. It was ascertained that amongst cattle, buffaloes suffered more than cows and oxen from want of fresh water; that whilst the latter could, in common with deer, quench their thirst by standing in brackish water, buffaloes could obtain no such relief, and wildly strayed for miles in spite of the efforts of the herdsmen in search of fresh water.

13. No trace of the remains of the houses which stood at Hookeytollah has been found, nor of the treasure chest of the Port and Customs

Department. I cannot conceive that the chest could have been washed away. Possibly it may have been stolen. One chest was found with its lid broken in, the work of wreckers immediately after the storm; but it was not the one in which cash was kept, as it stood in a small unused masonry cesspool, which probably accounted for its being left standing. The cesspool had disappeared together with the surrounding soil, of which a depth of five feet was washed away. A new coil of hose was found twisted and deeply buried in the soil. It has also been found that the set of the tide to the northward along the coast deposited hundreds of dead bodies along the sea-face, and amongst them, seven months after the disaster, the body of Mrs. Douglas has been identified by her clothing. It was found some 40 miles away from Hookeytollah.

14. Reference to former correspondence show that Orissa has frequently been visited by storm-waves, and that every ninth year the sea-coast has suffered from the effects of a cyclone.

15. I believe all that could reasonably be done has been done to relieve those who survived. The ready and generous aid given by the Government, by one of the English newspaper presses of Calcutta, and by the Inundation Fund, enabled the district officers to render immediate assistance, while the fortunate circumstance of the Kanika estate being under the Court of Wards has enabled the Board to give continued assistance from funded savings to the royts who had lost everything, which they could not have received if the estate had been in the hands of the proprietor.

During the year 1885-86 the assets of the Fine Funds upon the Bengal Provincial Railways were expended as follows;—

Northern Bengal State Railway.—Schools Rs. 1,367, institutes Rs. 100, amusements Rs 150, sick employés Rs. 69-6-3.

Tirhoot State Railway.—Schools Rs. 149, institutes Rs. 297-7, amusements Rs. 780, sick and miscellaneous Rs. 361-1, and volunteering Rs. 200.

Dacca State Railway.—Institute Rs. 300.

Nalhati State Railway.—Schools Rs. 49, institutes Rs. 90, sick employés Rs. 28-5-10.

Of the balance at credit of the Northern Bengal State Railway Fund, Rs. 500 represented the balance of last year's loan to the Railway Co-operative Stores Association, which was still outstanding at the end of 1885-86.

RESOLUTION.

In the Resolution on the Fine Fund reports last year, attention was drawn to the necessity of avoiding any undue accumulation of balances, and the Lieutenant-Governor observes in the present reports that on the Tirhoot State Railway and Nalhati State Railway the balances have been reduced. On the Northern Bengal State Railway, however, the balance still shows a tendency to increase, and the Manager should take steps to avoid this. A larger proportion of the assets of the fund on this line may with advantage be spent in providing amusements and recreation for the employés.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Secretary to the Government of India, Public Works Department, and to the Managers of the Bengal Provincial Railways, for information, and that the Resolution be published in the *Calcutta Gazette.*

By order of the Lieutenant-Governor of Bengal,

S. T. TREVOR, *Col.*, R. E.,

CALCUTTA, *the 21st June* 1886.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 18TH OF JUNE 1886.

The most important feature of the meteorology of the past week has been the formation of a cyclonic storm of considerable intensity at the head of the Bay, and its passage in a north-westerly direction, as far certainly as the Bikaneer desert, where the storm was situated on Sunday, the 20th, though at this time it had become very feeble and had almost broken up. By the advance of this storm over the country, the monsoon rains have been brought up to the whole of Bengal, and thus the storm will probably form an important feature in the meteorological history of the year.

From the observations received on Saturday, the 12th June, there were no indications of the existence of the storm; pressure was, however, falling rapidly, particularly at the head of the Bay, and while very light winds were blowing in South Bengal, in the centre and south of the Bay a fairly strong monsoon current was reported. The observations, however, which were received on Sunday, the 13th, showed very distinctly that a feeble cyclonic storm was in process of formation at the head of the Bay. The storm continued to develop, remaining almost stationary on the 14th, and on this day very strong monsoon winds were reported from the whole of the centre and south of the Bay, showing clearly that the storm had intensified. On Tuesday, the 15th, the storm had again intensified still further, and was evidently advancing in a northerly or north-westerly direction, and storm signal No. 6, denoting that a small cyclonic storm was advancing towards the head of the Bay, was hoisted at the signal stations in the river Hughli at 2-30 A.M. of the 15th. On this day the centre of the storm was probably to the east or south-east of False Point, though a considerable distance from land. During the whole of this day it was evident that the storm was intensifying and slowly, but steadily, advancing, and as it progressed it became evident that it would reach the coast not very far from Saugor Island, so at 6-30 P.M. orders were issued to hoist a further signal indicating the advance of the storm towards Saugor Island. The storm centre continued to approach nearer and nearer to Saugor Island during the night of the 15th and the morning of the 16th, and as the storm was evidently of considerable size and intensity, it was thought desirable to hoist the first or warning signal in the Calcutta Port, indicating the existence of a cyclone near Saugor Island, and its probable approach towards Calcutta. This signal is the only one available for the Port of Calcutta to indicate the existence of a storm which is near Saugor and approaching northward, whether the storm be of the most intense kind or of comparatively small intensity.

The storm centre reached the coast to the east of Saugor Island at 7 A.M. on the morning of the 16th, and travelling in a north-westerly direction its centre was a little to the north of that station at 10 A.M. of this day, where the excessively low pressure of 29·106″ at 9 A.M. was reported. So far as observations have been received up to the present time, it would appear that the centre of the storm was accompanied by winds which were of very considerable violence, though comparatively little damage was done; but at Mud Point it may be mentioned the violence of the wind was such that it broke the signal flagstaff on which the storm signals are hoisted, so that for the present storm signals cannot be hoisted at that station. From the light-vessel at the mouth of the Mutlah it has been since reported that they were visited by a cyclone on the 16th, so it is probable that the storm centre passed either over this place or close to it, and then advancing in a north-westerly direction to the north of Saugor Island, it passed through the Midnapore district. At 10 A.M on the 17th the centre of the cyclonic storm was in the south or south-west of Chutia Nagpur, probably to the south-west of Ranchi, while at 10 A.M. on the morning of the 18th the storm was passing from South Behar into the North-West Provinces, the centre being probably to the south-west of Dehree, and on the morning of the 19th the telegraphic report from the Meteorological Reporter of the Government of India at Simla showed that the storm had advanced to Jhansi, and on the morning of the 20th it had advanced to the Bikaneer desert, where it finally broke up. The storm therefore travelled over a course of about 1,200 miles, and after it passed over the land, it advanced in a north-westerly direction at the rate of about 200 miles a day.

When the storm centre had advanced well inland, the storm signals which had been hoisted in the Port and in the river were lowered at 4 A.M. of the 17th instant.

The advance of the storm over the land was accompanied by very heavy rain, and in the rear of the storm a very strong advance of monsoon winds took place over the whole Bay, which, following the storm, have caused the rainy season to set in over the whole province. The rainfall has of course been heaviest in the line of the advance of the storm, and some extremely heavy falls of rain are thus reported in South-West Bengal, Orissa, Chutia Nagpur and South Behar, while the rainfall has been lighter in other districts.

The pressure variations during the week have been exceptionally large, for, as before pointed out, the pressure accompanying the storm was exceptionally low, and it is probable that, when detailed information of the storm is received, it will be found that pressure was decidedly below 29 inches at its centre, which is of course exceptionally low. Pressure has consequently been much below the normal, the greatest defects occurring in the path of the storm. Thus at Saugor Island the mean pressure for the week has been 0·159″ below the normal, at False Point the defect has been 0·156″, and so on. The mean pressure for the whole province has been 0·072″ below the normal for the week.

With the heavy rainfall which has attended and followed the advance of the storm, temperature fell with great rapidity from Wednesday, the 16th, but previous to this temperature was largely above the normal in all districts. The mean temperature of the province for the week is thus 1·2° in excess of the normal, while in North Behar the excess has been no less than 4·7° and in South Behar 2·7°.

Rainfall, as stated previously, has been particularly heavy in South-West Bengal, Chutia Nagpur, Orissa and South Behar, while comparatively small quantities have fallen in other districts. In South-West Bengal the average fall for the week is 5·14 inches, which is nearly double the normal fall; in Orissa the fall has been 6·00 inches, the normal amount being 1·86 inches, and thus this district has received three times the normal fall. In Chutia Nagpur the actual fall has been 3·82 inches the normal being 2·47 inches, so that this division has received about one and a half times the usual amount. South Behar reports 3·12 inches against the normal 2·13 inches, or an inch in excess. The other districts have received falls in defect of the normal—thus East Bengal has received 3·90 inches against 5·74 inches, North Bengal 1·90 inches against the normal 4·47 inches, and North Behar 1·31 inches against 2·93 inches, so in each case the fall is considerably below the normal. The heavy rainfall accompanying the advance of the storm is shown by the fact that on the 16th the following stations reported falls exceeding 4 inches:—Balasore, Howrah, Jehanabad, and Cox's Bazar, while ten stations reported amounts between 3 and 4 inches and seventeen stations between 2 and 3 inches. On the 17th 29 stations reported amounts over three inches and 38 stations over two inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 18th of June 1886:—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, d drizzling rain, t thunder, p passing temporary showers.

MEMORANDUM.

DURING the week ending 5th June 1886, the returns of the principal Municipalities in Bengal disclosed the following particulars.

1. That births and deaths were registered in these Municipalities at the rates, respectively, of 14·8 and 20·2 per 1,000 of population as opposed to 17·4 and 22·1 per 1,000, respectively, during the preceding week ending 29th May, indicating a considerable reduction in the registration of both events.

2. That these events were returned at the highest rates by the following Municipalities :—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille.*
Gya	21·9	Beauleah	60·4
Serampore	21·6	Patna	37·6
Howrah	21·2	Comillah	34·7
		Bhagulpore	29·9

3. That the mortality from the specific death-causes mentioned in the table appended to this memorandum, compared with similar information for the preceding week, stood as follows :—

	Ratio per *mille* during the weeks ending—	
	5th June 1886.	29th May 1886.
Cholera	1·4	1·1
Small-pox	·1	·2
Fever	9·4	10·3
Bowel-complaints	3·5	3·6
Injury	·5	·5
Other causes	5·3	6·4

The only noticeable fact revealed by the above figures is that the death-rates from fever and the maladies classed under the head of "Other causes" had diminished sensibly.

4. That referring to the diseases mentioned above, excluding small-pox and injury, the mortality from which was nowhere high, and fever and "other causes" which proved fatal only in Beauleah and Puri towns at the rates of 55·2 and 16·8 per 1,000 of their populations, respectively, cholera and bowel-complaints caused the highest mortality in the following Municipalities :—

Cholera.	Ratio per *mille.*	*Bowel-complaints.*	Ratio per *mille.*
Patna	4·2	Comillah	15·4
Howrah	2·8	Patna	10·7
Suburbs of Calcutta	2·5		

5. That the death-rates in relation to *Sex*, *Class* and *Age* stand at the rates noted below :—

According to Sex.	Ratio per *mille.*
Males	21·2
Females	19·0
Ratio of male deaths to every 100 female deaths.	126

According to Class.	Ratio per *mille.*
Christians ...	21·7
Hindus ...	20·7
Mahomedans ...	19·2

According to Age.	Ratio per *mille.*

GENERAL REMARKS AND EXPLANATIONS.

The total weight of traffic carried during the month under review was 25,652·93 tons against 16,476·45 tons lifted during the corresponding period last year; the net result being an increase of 9,176·48 tons or 55·69 per cent. The increases are principally made up under the heads of Food-grains, Miscellaneous, Piece-goods, Railway material, Salt and Tea, while the decreases have been caused by a falling off in Ginger, Jute, Seed and Tobacco.

Increases.

Ale ... ... ·58 tons.
The increase, though small, shews that the demand for Sonada beer is increasing.

Food-grain ... ... 10,316·09 tons.
A brisk traffic in paddy and rice as usual accounts for this satisfactory result.

Miscellaneous ... ... 127·26 tons.
This is principally due to large consignments of garden machinery having been despatched to Tea districts.

Piece-goods ... ... 30·54 tons.
Markets in the interior are being stocked against the rains, and a corresponding falling off later on is expected.

Railway material ... ... 1,930·25 tons.
Increase is due to larger quantities of material for the Assam-Behar State Railway and Loco. coal having been carried this month than in the corresponding period last year.

Salt ... ... 24·40 tons.
The explanation given against piece-goods applies to salt also.

Sugar ... ... 4·12 tons.
The month's working represents an increase of 4·78 per cent.

Tea ... ... 57·67 tons.
Crop due to early rainfall.

Decreases.

Ginger ... ... 352·08 tons.
There was little doing in the Calcutta market in this staple during the month.

Jute ... ... 1,899·04 tons.
Calcutta market dull and transactions limited.

Seed ... ... 666·68 tons.
The market for all descriptions of seeds seems to be more or less dull.

Tobacco ... ... 396·69 tons.
1,067·42 tons of tobacco were carried during the month under notice against 1,463·91 in the corresponding period last year, showing a decrease of 27·08 per cent.
